Reading and Use of English

Simulacro 01 · paper 1 de 4

Parts 1–7 · 53 preguntas · 1 hora 30 minutos · sin diccionario

INSTRUCTIONS TO CANDIDATES

Time: **1 hour 30 minutes**.

There are **seven** parts to the test. Answer **all** the questions.

Write your answers on the answer sheet. Use capital letters for Parts 2, 3 and 4.

Parts 1, 2, 3 and 7 carry one mark per question; Part 4 carries up to two marks per question; Parts 5 and 6 carry two marks per question.

Partes y tiempos

Part	Tarea	Preguntas	Puntos	Tiempo orientativo
1	Multiple-choice cloze	1–8	8	8 min
2	Open cloze	9–16	8	9 min
3	Word formation	17–24	8	8 min
4	Key word transformations	25–30	12	12 min
5	Multiple choice	31–36	12	18 min
6	Gapped text	37–43	14	17 min
7	Multiple matching	44–53	10	15 min
	Total	**53**	**72**	**90 min** (con 3 de repaso)

Cómo hacer el simulacro

1. Imprime el PDF o ten a mano papel para las respuestas. Pon un cronómetro de 90 minutos y no lo pares.
2. Haz las siete partes en orden o en el que prefieras, pero apunta la hora al terminar cada una: los tiempos de la tabla son una referencia para repartir los 90 minutos.
3. Escribe las respuestas en la hoja de respuestas (después de la Part 7). En las Parts 2, 3 y 4, en mayúsculas; la ortografía cuenta.
4. Corrige con las soluciones y anota la puntuación de cada parte en la tabla final de la hoja de respuestas. Lee también las explicaciones de los aciertos dudosos.

Material no oficial, sin afiliación con Cambridge University Press & Assessment. Audio con voces sintéticas.

Part 1 Multiple-choice cloze

For questions 1–8, read the text below and decide which answer (A, B, C or D) best fits each gap. There is an example at the beginning (0). Mark your answers on the answer sheet.

Example:

0	**A** overcome	**B** overtake	**C** overdo	**D** overrun

The answer is **A** (overcome).

The potato's unlikely champion

Few foods have had to **(0)** _____ as much prejudice as the potato. In eighteenth-century France it was widely thought fit only for animals, and to many people, eating it **(1)** _____ of desperation. Rumours that it caused leprosy were **(2)** _____, and polite society **(3)** _____ the plant short shrift.

Antoine-Augustin Parmentier knew better. An army pharmacist who had been taken prisoner during the Seven Years' War, he had lived on little else in captivity, and he came home convinced that the potato could help **(4)** _____ famine in years of poor harvests.

He set out to **(5)** _____ over his compatriots with considerable flair, serving elaborate potato dinners to distinguished guests and presenting the king with a bouquet of potato flowers. According to one much-repeated story, he even had a field of potatoes guarded by soldiers during the day but left unwatched at night, so that curious locals would steal the plants. Whatever the truth of the tale, his efforts eventually **(6)** _____ fruit. Within a generation the potato had **(7)** _____ on, and today Parmentier is **(8)** _____ with turning a despised crop into a national staple.

1	**A** hinted	**B** smacked	**C** echoed	**D** bordered
2	**A** replete	**B** profuse	**C** rife	**D** prolific
3	**A** paid	**B** dealt	**C** showed	**D** gave
4	**A** avert	**B** evade	**C** elude	**D** deter
5	**A** hand	**B** win	**C** take	**D** turn
6	**A** carried	**B** brought	**C** bore	**D** held
7	**A** caught	**B** looked	**C** turned	**D** set
8	**A** attributed	**B** acknowledged	**C** recognised	**D** credited

Part 2 Open cloze

For questions 9–16, read the text below and think of the word which best fits each gap. Use only one word in each gap. There is an example at the beginning (0). Write your answers IN CAPITAL LETTERS on the answer sheet.

Example: (0) WITH

The psychology of waiting

Some years ago, the managers of a busy American airport were faced (0) _____ a curious problem. Passengers were complaining bitterly about the time it took for their luggage to reach them, so the airport took on extra baggage handlers and cut the average wait to eight minutes, comfortably within the industry norm. (9) _____ so, the complaints kept coming. It took some time for the managers to work out (10) _____ was really going on: passengers reached the baggage hall within a minute of leaving the plane and then found (11) _____ standing by the carousel for seven more. The solution the managers came (12) _____ with was ingenious. Arriving flights were moved to gates further from the main terminal, so that the walk took six times as long, and the complaints all but disappeared.

The episode illustrates a principle that researchers have long understood: what matters is not so much the length of a wait (13) _____ how it feels. Time spent doing something passes more quickly than time spent doing nothing. It is (14) _____ this reason that so many lifts have mirrors beside them, and that restaurants hand menus to diners who are still waiting for a table. Uncertainty makes matters worse, too: a wait of unknown length seems longer than one (15) _____ end is in sight. And there is (16) _____ quite as infuriating as watching someone who arrived after you being served first.

Part 3 Word formation

For questions 17–24, read the text below. Use the word given in **capitals** at the end of some of the lines to form a word that fits in the gap in the same line. There is an example at the beginning (0). Write your answers **IN CAPITAL LETTERS** on the answer sheet.

Example: (0) **DISBELIEF**

The man who braved the rain

When the merchant Jonas Hanway began to carry an umbrella through the streets of London in the 1750s, he was greeted with open (0) _____. Umbrellas were familiar enough as accessories for women, but a man who sheltered under one risked having his (17) _____ called into question. **BELIEVE** **MASCULINE**

Hanway, a tireless (18) _____ who campaigned on behalf of the city's poor, was not easily deterred. He had seen umbrellas in everyday use on his travels in Persia, and he could see no reason why a sensible man should arrive at his destination soaked to the skin. His (19) _____ habit did not endear him to the coachmen of London, who relied on wet weather for much of their trade and are said to have jeered at him in the street. **PHILANTHROPY** **CONVENTION**

Hanway's (20) _____ eventually paid off. **PERSIST**
(21) _____ the mockery he endured, other men gradually followed his lead, and by the time of his death in 1786 the umbrella was well on its way to becoming (22) _____ among respectable Londoners. The appeal of staying dry, it seems, had proved (23) _____. Today Hanway is remembered less for his charitable work than as the (24) _____ of every commuter who has ever unfurled an umbrella on a wet Monday morning. **STAND** **COMMON** **RESIST** **RUN**

Part 4 Key word transformations

For questions 25–30, complete the second sentence so that it has a similar meaning to the first sentence, using the word given. **Do not change the word given.** You must use between **three** and **eight** words, including the word given. Here is an example (0).

Example:

0 Jack started learning the cello three years ago.

BEEN

Jack has been learning the cello for three years.

The gap can be filled by the words 'has been learning the cello', so you write:

0 HAS BEEN LEARNING THE CELLO

Write only the missing words IN CAPITAL LETTERS.

---

25 Demand for tickets was so great that the festival's website crashed within minutes.

SUCH

_____ that the festival's website crashed within minutes.

26 I'm sure Helen didn't intend her remarks to offend anyone.

MEANT

Helen can't _____ offence with her remarks.

27 As the negotiations dragged on, the two sides became increasingly reluctant to compromise.

MORE

The longer the negotiations dragged on, _____ to compromise.

28 Even after reading the instructions twice, Paul still had no idea how to assemble the wardrobe.

WISER

Paul read the instructions twice, but _____ as to how to assemble the wardrobe.

29 Tom didn't tell anyone about his plans because he was worried that his colleagues would laugh at him.

FEAR

Tom said nothing about his plans _____ by his colleagues.

30 Our head teacher always takes the trouble to learn the name of every new pupil.

POINT

Our head teacher always _____ the name of every new pupil.

Part 5 Multiple choice

You are going to read an article about the history of sleep. For questions 31–36, choose the answer (**A, B, C** or **D**) which you think fits best according to the text. Mark your answers on the answer sheet.

The hour between sleeps

Our ancestors, it seems, routinely woke in the middle of the night. What, if anything, should we make of that?

For most of my adult life, waking at three in the morning has felt like a small emergency. The routine will be familiar to many readers: the glance at the clock, the hurried calculation of how many hours remain before the alarm goes off, the creeping conviction that the coming day is already ruined. Sleeplessness of this kind, which arrives not at bedtime but in the dead of night, is generally treated as a malfunction, to be corrected with pills, apps or a stern regime of 'sleep hygiene'. It had simply never occurred to me that it might once have been regarded as nothing of the sort.

That it may have been is largely the discovery of a historian. While researching what the night was like in early modern Britain, A. Roger Ekirch kept coming across references to something called 'first sleep'. They turned up in diaries and letters, in prayer books and medical treatises, and in the statements of witnesses in court, who would mention quite casually that they had seen or heard something after their first sleep. What struck Ekirch was less the phrase itself than the fact that nobody ever paused to explain it. A term that needs no gloss is one that everybody already understands, and the conclusion he eventually drew was that sleeping in two instalments, with a spell of wakefulness in between, had once been entirely unremarkable.

That spell, which might last an hour or more, seems to have been put to every conceivable use. People prayed, and some devotional books supplied prayers composed for the occasion. They got up to tend the fire or see to the animals; they talked, made love, or lay quietly turning over the dreams from which they had just surfaced. Some, inevitably, made use of the darkness for less innocent purposes. What they did not do, as far as the records show, was fret about being awake. Only gradually, as artificial lighting spread and bedtimes drifted later, did the two sleeps merge into one, and by the early twentieth century the very idea of a first sleep had all but vanished from ordinary speech.

Historians' hunches seldom find support in a laboratory, but this one did. In the early 1990s the psychiatrist Thomas Wehr, working at the National Institute of Mental Health in the United States, asked a group of volunteers to spend fourteen hours of every twenty-four in darkness, roughly the length of a winter night before the arrival of cheap lighting. After some weeks, their sleep began to divide: a first stretch of several hours, a period of calm wakefulness, and then a second stretch that lasted until morning. The convergence of the archive and the sleep laboratory is genuinely striking, and it is not hard to see why the story has travelled so far.

Travelled it certainly has, and not always in the best of company. A modest industry has grown up around the notion that we are all sleeping 'wrongly', and that by recovering the rhythm of our ancestors we might recover their supposed serenity too. There is already no shortage of advice on retraining the body into two tidy sleeps, and it can surely be only a matter of time before someone opens a retreat that charges handsomely for the privilege of being woken at midnight. The reasoning behind all this is seductive and, I think, muddled. That people once slept in a particular way tells us how they lived, not how we ought to; our ancestors also ate badly, died young and treated most illnesses with remedies that did more harm than good. Nor is the evidence quite as tidy as the marketing suggests. Researchers who recorded the sleep of three present-day societies without electricity, in Africa and South America, found little sign of a regular break in the night.

And yet I would not want to dismiss the history altogether, because its real value lies somewhere the wellness industry has little reason to look. Much of the misery of waking at night comes not from the waking itself but

from the panic that follows it: the conviction that something has gone wrong, and the frantic effort to put it right, which more or less guarantees that it will not be put right. Knowing that a wakeful spell in the small hours was, for centuries, simply part of the night does nothing to change the body. It can, however, change what we make of it, and that is a point some sleep specialists have been quick to take up.

I have not, I should add, rediscovered some lost rhythm. I still wake at three, and I still occasionally lie there doing sums. But I no longer reach for my phone or curse the dark, and on a good night I let my thoughts wander wherever they please, which is, I suspect, much what my great-great-grandparents did. Whether that amounts to progress or regression, I am happy to leave undecided.

31 In the first paragraph, the writer admits to having

A assumed without question that waking in the night was a disorder.
B kept quiet about a problem that is in fact widely shared.
C relied on pills and apps to get back to sleep.
D become resigned to waking in the night.

32 According to the second paragraph, what led Ekirch to conclude that sleeping in two parts had once been normal?

A the frequency with which the phrase ‘first sleep’ appeared in legal records
B the accounts witnesses gave of what they had done during the night
C the fact that the phrase was never thought to need explaining
D the detailed descriptions of the interval found in personal diaries

33 What is implied by the sentence ‘What they did not do, as far as the records show, was fret about being awake’?

A The records give only a partial picture of how the interval was spent.
B Being awake in the night was not regarded as a cause for concern.
C People were kept too busy during the interval to feel anxious.
D Worrying about sleep is a problem that did not exist before modern times.

34 How does the writer present Wehr’s experiment in the fourth paragraph?

A as more convincing than the historical evidence it seemed to support
B as proof that artificial light is to blame for poor sleep today
C as a deliberate attempt to test the historian’s findings
D as an unexpected confirmation from a very different kind of research

35 The writer mentions that ‘our ancestors also ate badly, died young’ and relied on harmful remedies in order to

A illustrate how much healthier modern habits have become.
B question the idea that what was once usual must be good for us.
C explain why the practice of two sleeps eventually died out.
D ridicule the customers of the sleep industry for their credulity.

36 What does the writer conclude about the history of segmented sleep?

A It offers a pattern of sleep that many people today would do well to adopt.
B It is of limited interest because the evidence for it is uncertain.
C It can ease the distress of waking at night even if it changes nothing physically.
D It shows that modern insomnia is caused by the habits of industrial societies.

Part 6 Gapped text

You are going to read an extract from a magazine article about bird ringing. Seven paragraphs have been removed from the extract. Choose from the paragraphs **A–H** the one which fits each gap (37–43). There is one extra paragraph which you do not need to use. Mark your answers on the answer sheet.

A ring for every traveller

Our writer spends an autumn morning with the volunteers of a coastal bird observatory and comes away looking at small birds rather differently.

It was still dark when I pulled into the car park behind the dunes, and the only sound was the sea. The observatory turned out to be a low brick building that had once housed the coastguard. Inside, a gas heater was hissing, a kettle was coming to the boil and four people in layers of fleece were pulling on waterproofs with the unhurried air of those who have done this hundreds of times. The wind had dropped overnight, which, I was told, was exactly what everyone had been hoping for.

37 _____

We set off in single file along a track through the scrub, Darby leading with a head torch that she switched off as soon as the sky began to pale. The nets, ten in all, had been put up the previous evening and furled overnight, and each now had to be opened, a fiddly business of unhooking loops and adjusting guy ropes. By the time the last was ready, it was light enough to make out birds moving in the bushes, and the first round of checks began.

38 _____

Back in the ringing room, the bags were hung in a row on hooks along one wall, each of them twitching faintly. What followed had the brisk precision of a production line. Each bird was taken out, identified and, where its plumage allowed, aged and sexed. Its wing was laid flat along a small steel rule and measured to the nearest millimetre; then it was slipped head first into a plastic tube on a set of electronic scales and weighed. A volunteer at the desk wrote everything down in a ledger.

39 _____

That number is the whole point of the exercise. A ringed bird that is never encountered again tells researchers almost nothing, and the overwhelming majority are never encountered again. Every year, however, a small fraction are caught by another ringer or found dead by a member of the public, and each of those encounters is reported to the British Trust for Ornithology, which runs the national scheme. Pieced together over decades, the reports show where birds go, how long they live and, increasingly, which species are quietly disappearing.

40 _____

Darby's own favourite is altogether more modest. Pinned above the desk is a letter, yellowing now, from a man in western France who found one of the observatory's blackcaps sheltering in his garden one October and sent in the number on its ring, with an apology for his English. 'It found its own way there, at night, without a map,' she said. 'And a complete stranger took the trouble to write. Both of those things still amaze me.'

41 _____

Then, a little after nine, everything changed. Goldcrests began to come in off the sea in their dozens, so exhausted by the crossing that some dropped into the first bushes they reached, and the nets were soon full of them. Britain's smallest bird, a goldcrest weighs about as much as a twenty-pence coin, and many of these had probably left Scandinavia the night before. Darby ringed one in front of me, placed it in my palm and went to

fetch more bags. Through its feathers I could feel a heartbeat so rapid that it was less a beat than a hum.

42 _____

The last bird of the morning turned out to be the most remarkable. A blackbird came out of the final net already wearing a ring, and when its number was checked against the ledger, it proved to have been ringed here as a nestling seven summers before. In all that time nobody had set eyes on it, although it had presumably never strayed far from the observatory. 'Seven years,' Darby said, writing it up. 'Not bad for a bird most people wouldn't look at twice.'

43 _____

If that sounds dispiriting, it did not feel so as I walked back past the furled nets. I could no longer look at a bush full of small brown birds and see only that. Each of them, ringed or not, was a traveller with a history of its own, most of which nobody would ever know. That, I suspect, is what brings the ringers out before dawn: not the rare species or the far-flung recovery, but the chance of learning, now and then, where one of them has been.

A I was to release it, she had told me, simply by opening my hand beside the door. For a second or two the bird sat there as if weighing up its options; then it was gone, a scrap of olive green heading for the pines. The rush lasted until almost eleven, when a freshening breeze set the mesh billowing and the nets were closed one by one.

B In the third net hung a robin, hopelessly entangled, or so it seemed to me. Darby had it free in well under a minute, easing the mesh back over each wing in the reverse of the order in which the bird had flown into it and talking to it quietly throughout. Then it went, head first, into a small cotton bag, the first of a dozen we carried back.

C Not every encounter, though, requires a second capture. Larger birds, gulls and waders in particular, are often fitted with coloured plastic rings as well as a metal one, and these can be read through a telescope from the far side of an estuary, so that a single individual may be reported dozens of times without ever being handled again.

D Some of the most celebrated of those reports have answered questions centuries old. It was a single swallow, ringed in England and found in South Africa more than a hundred years ago, that settled where British swallows spend the winter, a puzzle for naturalists since the days when a few of them believed the birds slept through it at the bottom of ponds.

E The reason, explained Helen Darby, who has run the ringing programme here for the best part of twenty years, is that a net is useless in a breeze. Moving mesh is visible mesh, and birds simply fly round it. On a still morning, by contrast, the fine black netting hangs slack and is almost impossible to see against the bushes.

F That entry, pencilled into a ledger that already ran to several volumes, seemed to me to sum up the whole enterprise. I had arrived thinking of ringing as bird-watching with equipment. I left thinking of it as a kind of bookkeeping, slow, unglamorous and cumulative, in which the entries that matter may not be read for years, and then often by somebody else entirely.

G None of these figures would mean much without the ring, fitted before anything else. It is a narrow band of soft metal, stamped with a unique number and an address to write to, and it is closed round the leg with special pliers, loose enough to turn freely but too small to slip over the foot. On a robin it looks rather like a wedding ring on a child's finger.

H Amazement, I soon discovered, is rationed. The second round produced nothing at all, the third a solitary wren, and by half past eight I had lost most of the feeling in my fingers. The ringers seemed not to notice. Every half hour, whatever the nets were likely to hold, somebody set off to walk the line again.

Part 7 Multiple matching

You are going to read an article in which four people describe spending a winter at a research station in Antarctica. For questions 44–53, choose from the people (**A–D**). The people may be chosen more than once. Mark your answers on the answer sheet.

Which person

44 had worries before leaving that proved to be groundless?

45 applied for the job on the spur of the moment?

46 found it unexpectedly difficult to focus on intellectual tasks?

47 regrets how they spent some of their leisure time?

48 initially dismissed guidance that turned out to be sound?

49 took on a supportive role that was not part of their job?

50 learnt to detect signs of distress in others' behaviour at mealtimes?

51 felt overwhelmed by ordinary surroundings on returning home?

52 recalls a petty disagreement that got out of hand?

53 has less patience with routine aspects of work since coming back?

The longest night

Four people who stayed on through the Antarctic winter look back on the experience.

A Ruth Calder, glaciologist

I went south to measure how quickly the ice shelf beneath the station was moving, and I assumed that the winter, with no fieldwork possible, would be the most productive period of my career. I had a list of papers I meant to finish and a stack of books I had been saving for years. In the event, I barely opened them. Something about the endless dark made sustained thought almost impossible: I would sit down after breakfast with every intention of writing and find, at lunchtime, that I had managed a paragraph. Before we left, a psychologist had spent an afternoon warning us that winterers often lose the capacity to concentrate, and urging us to set ourselves modest daily goals. I remember thinking it faintly patronising – we were, after all, a group of reasonably accomplished adults. By June I had pinned her list of suggestions above my desk. It was a humbling admission, but the small goals worked, and by the time the sun came back I had, somewhat to my own surprise, finished the one paper that really mattered.

B Owen Prys, chef

I saw the advertisement on a Sunday evening, filled in the form before I could talk myself out of it and had forgotten all about it by the time they called me for an interview. Morale, I was told there, would be as much my responsibility as the menu, and I soon understood why. Once the last aircraft had gone, there was nothing fresh to be had until the spring, so I spent the winter coaxing variety out of tins, flour and a freezer the size of a garage. Food became our calendar: Friday was curry, Sunday was a roast, and Midwinter's Day was a feast we planned for weeks. I learnt to read the base from the serving hatch, too. When someone started skipping breakfast or pushing food round the plate, it was usually the first sign that they were struggling, often long before they admitted it to themselves. Not that we were saints. The worst row of the winter began over who had finished the last jar of peanut butter, and for a fortnight two grown men refused to sit at the same table.

C **Leila Haddad, doctor**

As the only doctor on the station, I spent the months before departure acquiring skills I had never expected to need, from filling teeth to running an operating theatre with a mechanic as my assistant. What kept me awake in those months was the thought of a burst appendix or a serious fall in the depths of winter, when no aircraft could reach us. In the end, the gravest thing I treated was a broken wrist. What took up most of my time turned out to be something nobody had mentioned on any training course. People came to the surgery with a stiff back or a sleepless night and stayed an hour to talk about a marriage under strain or a parent who was ill at home. I became, without ever quite deciding to, the person everyone confided in, and I took that more seriously than any of the medicine. It was lonely in its own way, since there was nobody I could unburden myself to in turn. I came home with an enormous respect for counsellors and for anyone else who listens to other people's troubles for a living.

D **Callum Reid, generator mechanic**

I had wanted to go south since I was a boy, and I applied three times before they finally took me. My job was to keep the generators running, because if they failed, so did everything else: heat, water, light, the lot. A man who had done three winters told me that the cold would be the least of my worries, and he was right; at minus forty you simply dress for it. What nobody could prepare me for was coming back. The first time I walked into a supermarket I had to leave after five minutes – the noise, the smells, thirty kinds of bread. I had spent eight months in a place where every job had an obvious purpose, and now I sit in meetings about meetings and find myself far less patient with them than I used to be. If I have one regret, it is that I spent so many winter evenings tinkering in the workshop. The aurora was out on many clear nights, and I watched it far less often than I should have.

Hoja de respuestas

Part 1 · Multiple-choice cloze

Escribe la letra elegida (A, B, C o D). Al corregir, marca 1 punto por acierto; una respuesta doble vale 0.

Nº	Respuesta (A–D)	Punto

6	Gapped text	_____ / 14
7	Multiple matching	_____ / 10
	Total	**_____ / 72**

Referencia orientativa, no oficial: en los tests publicados, el aprobado con nota C2 (200 en la Cambridge English Scale) suele quedar en torno al 60 % de la puntuación bruta, unos 43 de 72 puntos; la conversión exacta cambia de un examen a otro.

SOLUCIONES

Part 1 · Multiple-choice cloze

1 punto por acierto. Cada solución indica el tipo de distinción, explica por qué es correcta la clave y por qué falla cada distractor, y remite al apartado de UOE-P1_Teoria_v1 que lo trabaja.

Clave rápida

Nº	Clave	Tipo de distinción	Teoría
1	B · smacked	Complementación	§6.1 Preposición dependiente
2	C · rife	Casi-sinónimos	§5.1 Significado preciso y alcance · §3.2 Adjetivo + sustantivo
3	D · gave	Expresión fija	§4.2 Idioms con una palabra evaluada
4	A · avert	Casi-sinónimos	§5.1 Significado preciso y alcance
5	B · win	Phrasal verb	§7.1 Misma partícula, distinto verbo
6	C · bore	Expresión fija	§4.2 Idioms con una palabra evaluada
7	A · caught	Phrasal verb	§7.1 Misma partícula, distinto verbo
8	D · credited	Complementación	§6.1 Preposición dependiente

1 • B smacked

Por qué: smack of sth: dar la impresión de algo malo, «oler a» (it smacked of desperation). Es el único de los cuatro que se construye con of en este sentido.

A hinted: hint va con at (it hinted at desperation); *hinted of no existe.

C echoed: echo es transitivo (it echoed an earlier crisis); *echoed of no existe.

D bordered: border en sentido figurado va con on (it bordered on desperation); con of no funciona.

Teoría: §6.1 Preposición dependiente

2 • C rife

Por qué: rife: muy extendido, y casi siempre de algo malo (rumours were rife, corruption is rife). Funciona como predicativo, sin complemento.

A replete: replete exige complemento (replete with: repleto de); solo, al final de la oración, queda cojo.

B profuse: profuse: abundante en lo que se da o se vierte (profuse apologies, profuse bleeding); no se dice de rumores que circulan.

D prolific: prolific: muy productivo, que produce mucho (a prolific writer); los rumores no producen nada.

Teoría: §5.1 Significado preciso y alcance · §3.2 Adjetivo + sustantivo

3 • D gave

Por qué: give sb/sth short shrift: despachar algo con desdén, no prestarle ninguna atención. Expresión fija; gave es el pasado.

A paid: *pay short shrift es un cruce frecuente con pay scant attention, pero no es la expresión (paid).

B dealt: deal forma otras combinaciones (deal a blow); *dealt short shrift no existe.

C showed: *show short shrift tampoco existe (showed).

Teoría: §4.2 Idioms con una palabra evaluada

4 • A avert

Por qué: avert: impedir a tiempo que ocurra algo malo (avert famine, a crisis, a disaster). La patata podía evitar el hambre en los años de malas cosechas.

B evade: evade: eludir con habilidad o con trampa algo que te persigue o te obliga (evade tax, capture, a question); no se evita así una hambruna.

C elude: elude: escaparse de alguien (elude the police) o no ser alcanzado (success eluded him); no significa impedir.

D deter: deter: disuadir a alguien (deter sb from doing sth); su objeto es una persona, no un hecho.

Teoría: §5.1 Significado preciso y alcance

5 • B win

Por qué: win sb over: ganarse a alguien, convencerlo de algo de lo que desconfiaba. Encaja con la campaña que se describe a continuación (cenas, flores para el rey).

A hand: hand sb over: entregar a alguien (a la policía, a otra autoridad).

C take: take over: hacerse con el control; con personas como objeto no significa convencer.

D turn: turn sb over: entregar a alguien a la justicia (turn sb over to the police).

Teoría: §7.1 Misma partícula, distinto verbo

6 • C bore

Por qué: bear fruit: dar fruto, tener éxito al cabo del tiempo (his efforts bore fruit). Expresión fija; bore es el pasado de bear.

A carried: *carried fruit no forma la expresión; carry es «llevar» en sentido literal.

B brought: *brought fruit tampoco; bring results sí existe, pero no con fruit.

D held: *held fruit no existe (held).

Teoría: §4.2 Idioms con una palabra evaluada

7 • A caught

Por qué: catch on: hacerse popular, extenderse. En una generación la patata se impuso.

B looked: look on: mirar sin intervenir; no tiene sentido con the potato como sujeto.

C turned: turn on: encender, o volverse contra alguien (turn on sb).

D set: set on: atacar (the dogs set on him); intransitivo y con este sujeto no significa nada.

Teoría: §7.1 Misma partícula, distinto verbo

8 • D credited

Por qué: be credited with sth / with doing sth: atribuirle a alguien un mérito. La preposición with y el gerundio turning solo encajan con credited.

A attributed: attribute va con to y con la cosa como sujeto pasivo (the change is attributed to Parmentier); *attributed with es un error frecuente.

B acknowledged: acknowledged va con as (acknowledged as the pioneer), no con with + gerundio.

C recognised: recognised también va con as o for (recognised for his work); con with no funciona.

Teoría: §6.1 Preposición dependiente

Part 2 · Open cloze

1 punto por acierto. En esta hoja hay huecos que admiten varias respuestas: vale cualquiera de las que recoge la clave, pero solo una por hueco (con dos respuestas, el hueco vale 0). Cada solución explica por qué valen todas las de la clave y por qué no valen otras que parecen posibles, y remite al apartado de UOE-P2_Teoria_v1.

Clave rápida

Nº	Clave	Tipo de hueco	Teoría
9	EVEN	Conector compuesto even so	7.2 La primera mitad de un conector compuesto
10	WHAT	Relativo nominal	8 Relativos y nominales
11	THEMSELVES	Reflexivo en find oneself + -ing	4 Referencia y sustitución · 6.3 Palabras gramaticales dentro de expresiones fijas
12	UP	Partícula de phrasal verb	6.2 Partícula de phrasal verb
13	AS	Correlativo not so much … as	10 Estructuras de la Part 4 vistas desde el hueco · 7.2 La primera mitad de un conector compuesto
14	FOR	Cleft con frase preposicional	10 Estructuras de la Part 4 vistas desde el hueco · 6.3 Palabras gramaticales dentro de expresiones fijas
15	WHOSE	Relativo posesivo	8 Relativos y nominales
16	NOTHING / LITTLE	Cuantificador negativo	3 Determinantes y cuantificadores

Explicación por ítem

9 · EVEN · Conector compuesto even so

Por qué: Detrás del hueco va so y una coma: even so = aun así. Han reducido la espera por debajo de lo normal y, pese a ello, siguen las quejas.

No vale: and (and so introduce una consecuencia, y aquí hay contraste); **just** o **ever** (no forman conector con so).

Teoría: 7.2 La primera mitad de un conector compuesto

10 · WHAT · Relativo nominal

Por qué: work out necesita objeto, y el hueco es a la vez ese objeto y el sujeto de was really going on: what = «lo que». Los dos puntos dan después la respuesta.

No vale: that o **which** (necesitan un antecedente que no hay); **it** (*work out it was going on no tiene sentido).

Teoría: 8 Relativos y nominales

11 · THEMSELVES · Reflexivo en find oneself + -ing

Por qué: find oneself doing sth: verse en una situación sin haberla buscado. El reflexivo concuerda con el sujeto plural passengers.

No vale: them (con find, el pronombre que remite al sujeto tiene que ser reflexivo: found them standing hablaría de otras personas); **it** (no tiene antecedente).

Teoría: 4 Referencia y sustitución · 6.3 Palabras gramaticales dentro de expresiones fijas

12 • UP • **Partícula de phrasal verb**

Por qué: come up with: idear, dar con una solución. El with ya está detrás del hueco.

No vale: out (come out with = soltar un comentario o lanzar un producto); **across** (come across no lleva with).

Teoría: 6.2 Partícula de phrasal verb

13 • AS • **Correlativo** not so much … as

Por qué: not so much X as Y: no tanto X como Y. El not so much anterior anuncia el as.

No vale: but (*not so much X but Y es un cruce frecuente con not X but Y, pero no es correcto); **than** (no hay comparativo).

Teoría: 10 Estructuras de la Part 4 vistas desde el hueco · 7.2 La primera mitad de un conector compuesto

14 • FOR • **Cleft con frase preposicional**

Por qué: It is … that destaca una frase preposicional: for this reason, «por esta razón». La razón es la frase anterior: el tiempo ocupado pasa más deprisa.

No vale: by o **with** (no forman expresión con reason); **due** (pediría to: due to this); **because** (*because this reason).

Teoría: 10 Estructuras de la Part 4 vistas desde el hueco · 6.3 Palabras gramaticales dentro de expresiones fijas

15 • WHOSE • **Relativo posesivo**

Por qué: one sustituye a a wait, y detrás del hueco va un sustantivo sin determinante (end): relativo posesivo, «una espera cuyo final está a la vista».

No vale: where o **when** (exigirían the end); **which** o **that** (*which end is in sight).

Teoría: 8 Relativos y nominales

16 • NOTHING / LITTLE • **Cuantificador negativo**

Por qué valen: there is nothing quite as … as: no hay nada tan exasperante como… Little («poca cosa») también es gramatical y conserva el sentido, aunque con quite suena menos natural.

No vale: no (*there is no quite as: no necesita un sustantivo); **anything** (sin negación delante no funciona); **something** (dice lo contrario: que hay algo así de irritante, sin el valor de superlativo).

Teoría: 3 Determinantes y cuantificadores

Part 3 · Word formation

1 punto por acierto. La clave recoge todas las formas aceptables de cada hueco; basta con una. Cada solución explica qué decide la forma, cuenta los cambios sobre la palabra base, señala las respuestas tentadoras que no valen y remite al apartado de UOE-P3_Teoria_v1 que lo trabaja.

Clave rápida

Nº	Clave	Tipo de hueco	Teoría
17	MASCULINITY / MASCULINENESS	Sustantivo · -ity	§4.1 · §8.2
18	PHILANTHROPIST	Sustantivo de persona	§4.4 · §8.3
19	UNCONVENTIONAL	Adjetivo · prefijo un-	§4.2 · §6.1
20	PERSISTENCE / PERSISTENCY	Sustantivo · -ence	§4.1 · §8.4
21	NOTWITHSTANDING	Preposición compuesta	§7.3 · §2.2
22	COMMONPLACE	Adjetivo · compuesto	§7.2
23	IRRESISTIBLE	Adjetivo · prefijo ir- y -ible	§6.1 · §8.4
24	FORERUNNER	Sustantivo · prefijo fore-	§6.4 · §4.4 · §8.1

Explicación por ítem

17 · MASCULINITY / MASCULINENESS · Sustantivo · -ity

Por qué: his + hueco + called into question: sustantivo. Lo que se ponía en duda era su hombría. Masculineness figura en algún diccionario como derivado, pero la forma normal es masculinity.

Cambios: masculine → masculinity: -ity, y la e final se pierde. Un cambio.

No vale: MASCULINE (es la palabra base y es adjetivo); **MASCULINISM** (ideología, no cualidad); ***MASCULINEITY** (conserva una e que se pierde).

Teoría: §4.1 Sufijos nominales · §8.2 La e final

18 · PHILANTHROPIST · Sustantivo de persona

Por qué: a tireless + hueco + who campaigned: un sustantivo de persona en singular. Hanway era un filántropo.

Cambios: philanthropy → philanthropist: la y final se sustituye por -ist. Un cambio.

No vale: PHILANTHROPIC (adjetivo); **PHILANTHROPISTS** (plural tras a).

Teoría: §4.4 Sustantivos de persona · §8.3 La y final

19 · UNCONVENTIONAL · Adjetivo · prefijo un-

Por qué: His + hueco + habit: adjetivo. El párrafo anterior explica que un hombre con paraguas rompía las normas: hábito poco convencional.

Cambios: convention → conventional (-al) → unconventional (un-). Dos cambios.

No vale: CONVENTIONAL (dice lo contrario de lo que cuenta el texto); ***INCONVENTIONAL** (el prefijo es un-).

Teoría: §4.2 Sufijos adjetivales · §6.1 Elegir el prefijo negativo

20 • PERSISTENCE / PERSISTENCY • **Sustantivo • -ence**

Por qué: Hanway's + hueco + eventually paid off: sustantivo. Su insistencia acabó dando resultado. Persistency es una variante registrada, mucho menos frecuente.

Cambios: persist → persistence: -ence (no -ance). Un cambio.

No vale: *__PERSISTANCE__ (grafía con a); __PERSISTENT__ (adjetivo).

Teoría: §4.1 Sufijos nominales · §8.4 -able o -ible; -ance o -ence; -ant o -ent

21 • NOTWITHSTANDING • **Preposición compuesta**

Por qué: Hueco + the mockery he endured + coma + oración principal: hace falta una preposición concesiva, «pese a». Notwithstanding se forma sobre withstand.

Cambios: stand → withstand (with-) → notwithstanding (not- y -ing). Tres cambios.

No vale: WITHSTANDING (participio de withstand, «resistir»: haría a other men resistir las burlas que sufrió Hanway, que no tiene sentido); **OUTSTANDING** (adjetivo, «excelente» o «pendiente»).

Teoría: §7.3 Partícula + verbo · §2.2 Categoría: diagnóstico por el entorno del hueco

22 • COMMONPLACE • **Adjetivo • compuesto**

Por qué: becoming + hueco + among respectable Londoners: adjetivo predicativo. El paraguas se estaba volviendo algo habitual.

Cambios: common + place → commonplace, en una sola palabra. Un cambio.

No vale: COMMONER (comparativo o sustantivo, «plebeyo»); **UNCOMMON** (lo contrario); **COMMONALITY** (sustantivo).

Teoría: §7.2 Adjetivos compuestos

23 • IRRESISTIBLE • **Adjetivo • prefijo ir- y -ible**

Por qué: had proved + hueco: adjetivo. Las ventajas de ir seco resultaron imposibles de resistir; por eso los demás imitaron a Hanway.

Cambios: resist → resistible (-ible) → irresistible (ir-). Dos cambios.

No vale: *__IRRESISTABLE__ (la terminación es -ible); **RESISTANT** (no encaja con el sujeto the appeal); *__UNRESISTIBLE__ (el prefijo es ir-).

Teoría: §6.1 Elegir el prefijo negativo · §8.4 -able o -ible; -ance o -ence; -ant o -ent

24 • FORERUNNER • **Sustantivo • prefijo fore-**

Por qué: as the + hueco + of every commuter: sustantivo singular. Hanway es el precursor de todos los que hoy abren un paraguas.

Cambios: run → runner (-er, con doble n) → forerunner (fore-). Dos cambios.

No vale: RUNNER (corredor); *__FORERUNER__ (sin duplicar la n); **FORERUNNERS** (plural tras the y con every commuter).

Teoría: §6.4 Prefijos de grado, posición y relación · §4.4 Sustantivos de persona · §8.1 Duplicación de consonante

Part 4 · Key word transformations

Corrige cada ítem por mitades: 1 punto por cada mitad correcta y bien escrita. Se acepta cualquiera de las variantes indicadas; las respuestas fuera de 3–8 palabras o con la palabra clave cambiada valen 0.

25 SUCH WAS THE DEMAND FOR TICKETS (6 palabras)

También vale: SUCH WAS [THE] DEMAND FOR TICKETS (5–6) · **[THE] DEMAND FOR TICKETS WAS SUCH** (5–6) · **THERE WAS SUCH [GREAT / HIGH] DEMAND FOR TICKETS** (6–7) · **THERE WAS SUCH A [GREAT / HIGH] DEMAND FOR TICKETS** (7–8) · **TICKETS WERE IN SUCH [GREAT / HIGH] DEMAND** (5–6)

Mitades: Such was | the demand for tickets

Por qué: so great that → such was … that: con such al principio, el verbo va delante del sujeto. También valen la forma sin inversión, con such detrás del verbo (the demand for tickets was such that), y las construcciones con such (a) + sustantivo: there was such (great) demand, tickets were in such demand.

No puntúa: *SUCH WAS THE DEMAND (falta for tickets: la segunda mitad no puntúa); *SUCH THE DEMAND FOR TICKETS WAS (sin inversión, such no puede ir delante); *SO GREAT WAS THE DEMAND FOR TICKETS (no usa la palabra clave tal cual: el ítem vale 0).

Teoría: §3.1 Inversión tras adverbiales negativos y restrictivos · §3.7 Comparación y grado

26 POSSIBLY HAVE MEANT TO CAUSE ANY (6 palabras)

También vale: [POSSIBLY] HAVE MEANT TO (CAUSE / GIVE) [ANY / ANYONE] (4–6)

Mitades: have meant | to cause / give (any)

Por qué: I'm sure … didn't sobre el pasado → can't have + participio. Offence pide su verbo: cause / give (any) offence o cause / give anyone offence.

No puntúa: *MEANT TO CAUSE ANY (can't + pasado no existe: hace falta have meant); *HAVE MEANT CAUSING ANY (mean + -ing significa «implicar», no «tener intención»); *HAVE MEANT TO MAKE ANY (*make offence no es collocation); *HAVE MEANT ANYONE TO TAKE (take offence va con at: *take offence with her remarks no es correcto).

Teoría: §3.5 Modales perfectos y grados de certeza · §5.1 Verbos comodín + sustantivo

27 THE MORE RELUCTANT THE TWO SIDES BECAME (7 palabras)

También vale: THE MORE (RELUCTANT / UNWILLING) (THE TWO SIDES / BOTH SIDES / THE SIDES) (BECAME / GREW / GOT / WERE) (6–7) · **THE MORE (RELUCTANT / UNWILLING) WERE (THE TWO SIDES / BOTH SIDES)** (6–7)

Mitades: the more reluctant | the two sides became

Por qué: increasingly → comparativo correlativo: the longer …, the more …. Detrás de the more reluctant van el sujeto y el verbo; con were también cabe la inversión, más formal (the more reluctant were the two sides).

No puntúa: *THE MORE THE TWO SIDES BECAME RELUCTANT (el adjetivo tiene que ir pegado a the more); *THE MORE RELUCTANT THEY BECAME (they remitiría a the negotiations: falta el sujeto real); *MORE RELUCTANT THE TWO SIDES BECAME (falta el the del segundo término).

Teoría: §3.7 Comparación y grado

28 WAS STILL NONE THE WISER (5 palabras)

También vale: [HE] (WAS STILL / WAS / REMAINED / ENDED UP) NONE THE WISER (4–6) · **[HE] (WAS STILL / WAS) NOT ANY THE WISER** (5–7) · **[HE] [STILL] WASN'T ANY THE WISER** (5–7) · **[HE] (WAS STILL / WAS / REMAINED) NO WISER** (3–5) · **[HE] (WAS STILL / WAS) NOT ANY WISER** (4–6) · **[HE] [STILL] WASN'T ANY WISER** (4–6)

Mitades: (he) was (still) | none the wiser

Por qué: be none the wiser: seguir sin entender, no saber más que antes. Tras but, el sujeto puede repetirse (he) u omitirse, porque es el mismo. También valen las variantes not any the wiser y no wiser, menos idiomáticas pero con el mismo sentido.

No puntúa: *WAS NOT MUCH THE WISER (not much the wiser supone que entendió algo más: cambia el sentido); *HE WAS NOT THE WISER (la expresión exige none, not any o no); *HE WAS NONE WISER (falta the: la forma es none the wiser).

Teoría: §5.2 Idioms frecuentes por palabra clave

29 FOR FEAR OF BEING LAUGHED AT (6 palabras)

También vale: (FOR / OUT OF / THROUGH) FEAR OF BEING (LAUGHED AT / MOCKED / RIDICULED / MADE FUN OF) (5–8) · **FOR FEAR [THAT] HE (WOULD / MIGHT / SHOULD) BE (LAUGHED AT / MOCKED / RIDICULED)** (6–8) · **FOR FEAR HE (WOULD / MIGHT / SHOULD) BE MADE FUN OF** (8)

Mitades: for fear of | being laughed at

Por qué: for fear of + -ing: por miedo a. Como detrás viene by his colleagues, el gerundio va en pasiva: being laughed at, con la preposición de laugh at al final. También valen los sinónimos (mocked, ridiculed, made fun of) y for fear (that) he would be laughed at.

No puntúa: *FOR FEAR OF BEING LAUGHED (falta at: laugh at la conserva en pasiva); *FOR FEAR OF LAUGHING AT (voz activa: no encaja con by his colleagues); *IN FEAR OF BEING LAUGHED AT (in fear of es «temiendo, amenazado por» (live in fear of); para el motivo se usa for fear of).

Teoría: §5.4 Frases preposicionales · §3.3 Pasiva impersonal y causativa

30 MAKES A POINT OF LEARNING (5 palabras)

También vale: MAKES A POINT OF (LEARNING / MEMORISING / MEMORIZING / GETTING TO KNOW) (5–7) · **MAKES IT A POINT TO (LEARN / MEMORISE / MEMORIZE / GET TO KNOW)** (6–8)

Mitades: makes a point | of learning

Por qué: make a point of doing sth: hacer algo a propósito, con especial empeño, porque se considera importante; equivale a take the trouble to. La variante make it a point to do sth también existe.

No puntúa: *MAKES A POINT TO LEARN (con a point va of + -ing; to exige make it a point); *IS MAKING A POINT OF LEARNING (always + presente simple: es un hábito); *MAKES THE POINT OF LEARNING (make the point that es «señalar, argumentar»).

Teoría: §5.2 Idioms frecuentes por palabra clave · §5.1 Verbos comodín + sustantivo

Part 5 · Multiple choice

2 puntos por acierto. Cada solución indica el pasaje, una respuesta propia como la que pide el método (§2.2), por qué la clave es correcta y por qué falla cada distractor, con su tipo (§7) y la cita del texto que lo descarta. Los números de sección remiten a RDG-P5_Teoria_v1.

Clave rápida

Nº	Clave	Tipo de pregunta	Distractores	Teoría
31	**A**	Implicación	B §7.7/7.1 · C §7.1/7.7 · D §7.5	§3.2 · §6.1
32	**C**	Detalle	A §7.3/7.1 · B §7.1 · D §7.7	§2.2 · §6.1
33	**B**	Implicación	A §7.1 · C §7.5 · D §7.3	§3.1 · §3.2
34	**D**	Opinión y actitud	A §7.7 · B §7.3/7.5 · C §7.7	§4.2 · §6.2
35	**B**	Propósito	A §7.2 · C §7.8 · D §7.4/7.3	§5.1 · §5.2
36	**C**	Global	A §7.4 · B §7.6 · D §7.5/7.7	§5.4 · §4.3

Explicación por pregunta

31 · A · Implicación

Pregunta: In the first paragraph, the writer admits to having

Pasaje: párrafo 1. **Respuesta propia:** Hasta hace poco, el autor daba por hecho que despertarse de madrugada era una avería que había que arreglar; nunca se le había ocurrido otra cosa.

A assumed without question that waking in the night was a disorder.
Correcta. For most of my adult life, despertarse a las tres has felt like a small emergency, y la última frase revela la suposición que el autor nunca había puesto en duda: It had simply never occurred to me that it might once have been regarded as nothing of the sort. Nothing of the sort remite a a malfunction: compartía la idea general sin cuestionarla. Without question parafrasea never occurred to me, y disorder, malfunction (§6.1).

B kept quiet about a problem that is in fact widely shared.
Falla (ausente §7.7, eco léxico §7.1). Recoge will be familiar to many readers (el problema es común), pero el autor no dice en ninguna línea que lo haya ocultado: lo cuenta con toda naturalidad.

C relied on pills and apps to get back to sleep.
Falla (eco léxico §7.1, ausente §7.7). pills, apps or a stern regime of 'sleep hygiene' son los remedios que se suelen aplicar (is generally treated as a malfunction), no algo que el autor diga haber usado.

D become resigned to waking in the night.
Falla (lógica §7.5). Lo contradice el tono de todo el párrafo: para el autor era a small emergency, con the hurried calculation y the creeping conviction that the coming day is already ruined. Eso es alarma, no resignación.

Teoría: §3.2 De dónde sale una inferencia · §6.1 Grados de paráfrasis

32 · C · Detalle

Pregunta: According to the second paragraph, what led Ekirch to conclude that sleeping in two parts had once been normal?

Pasaje: párrafo 2. **Respuesta propia:** Que nadie explicara nunca qué era el first sleep: si nadie lo explica, es que todo el mundo lo entendía.

A the frequency with which the phrase 'first sleep' appeared in legal records
Falla (alcance §7.3, eco léxico §7.1). Los juicios son solo una de las fuentes (and in the statements of witnesses in court), y el texto no habla de frecuencia. Además, la frase clave le quita peso a la expresión en sí: less the phrase itself than.

B the accounts witnesses gave of what they had done during the night
Falla (eco léxico §7.1). Toma witnesses y seen or heard something, pero lo que importa de esos testimonios es que mencionan el primer sueño quite casually, no lo que los testigos hacían por la noche.

C the fact that the phrase was never thought to need explaining
Correcta. El párrafo separa la expresión de lo que la hace reveladora: What struck Ekirch was less the phrase itself than the fact that nobody ever paused to explain it. La frase siguiente da el razonamiento (A term that needs no gloss is one that everybody already understands) y de ahí sale la conclusión: had once been entirely unremarkable. Never thought to need explaining parafrasea nobody ever paused to explain it sin repetir sus palabras.

D the detailed descriptions of the interval found in personal diaries
Falla (ausente §7.7). Los diarios aparecen en la lista de fuentes (They turned up in diaries and letters), pero ninguna fuente describe el intervalo con detalle; al contrario, nobody ever paused to explain it.

Teoría: §2.2 Del enunciado al pasaje · §6.1 Grados de paráfrasis

33 · B · Implicación

Pregunta: What is implied by the sentence 'What they did not do, as far as the records show, was fret about being awake'?

Pasaje: párrafo 3. **Respuesta propia:** Que despertarse a media noche no preocupaba a nadie: era lo normal.

A The records give only a partial picture of how the interval was spent.
Falla (eco léxico §7.1). Se apoya en el inciso as far as the records show, que es una cautela del autor, no lo que la frase quiere decir. El texto no insinúa que falten datos sobre el intervalo.

B Being awake in the night was not regarded as a cause for concern.
Correcta. Tras la lista de actividades, la frase cierra el contraste con el primer párrafo: la gente de entonces no hacía lo que hace el autor (fret about being awake). El resto del párrafo lo confirma: el intervalo era parte de la noche hasta que the two sleeps merge into one. Not regarded as a cause for concern es la paráfrasis de did not … fret.

C People were kept too busy during the interval to feel anxious.
Falla (lógica §7.5). Añade una relación de causa que el texto no establece. El párrafo enumera lo que se hacía (They got up to tend the fire or see to the animals) e incluye actividades tranquilas (lay quietly turning over the dreams): no dice que la gente no se preocupara por estar ocupada.

D Worrying about sleep is a problem that did not exist before modern times.
Falla (alcance §7.3). Generaliza demasiado: el texto habla solo de no inquietarse por estar despierto en ese intervalo, y lo matiza con as far as the records show. No dice nada de cualquier preocupación por el sueño antes de la época moderna (§6.4).

Teoría: §3.1 Inferencia legítima y sobreinterpretación · §3.2 De dónde sale una inferencia

34 · D · Opinión y actitud

Pregunta: How does the writer present Wehr's experiment in the fourth paragraph?

Pasaje: párrafo 4. **Respuesta propia:** Como un respaldo inesperado: un laboratorio confirma lo que el historiador había deducido de los archivos, y al autor le parece muy llamativo.

A as more convincing than the historical evidence it seemed to support
Falla (ausente §7.7). El autor no compara la fuerza de las dos pruebas: habla de convergence, es decir, de que coinciden, no de que una pese más que la otra.

B as proof that artificial light is to blame for poor sleep today
Falla (alcance §7.3, lógica §7.5). El experimento muestra que con fourteen hours of every twenty-four in darkness el sueño se divide; no demuestra que la luz artificial cause problemas de sueño hoy. Proof y to blame van mucho más allá del texto.

C as a deliberate attempt to test the historian's findings
Falla (ausente §7.7). Nada indica que Wehr quisiera comprobar las conclusiones de Ekirch: el texto solo dice que la intuición del historiador encontró apoyo (but this one did), no que el experimento se diseñara para eso.

D as an unexpected confirmation from a very different kind of research
Correcta. La primera frase anuncia la sorpresa (Historians' hunches seldom find support in a laboratory, but this one did) y la última la valora: The convergence of the archive and the sleep laboratory is genuinely striking. Seldom hace inesperada la confirmación; el contraste archive / laboratory es la very different kind of research.

Teoría: §4.2 Marcadores de postura · §6.2 Lo concreto del texto, lo abstracto de la opción

35 · B · Propósito

Pregunta: The writer mentions that ‘our ancestors also ate badly, died young’ and relied on harmful remedies in order to

Pasaje: párrafo 5. **Respuesta propia:** Para mostrar que «antes se hacía así» no significa «es lo mejor»: también hacían cosas que nadie querría imitar.

A illustrate how much healthier modern habits have become.
Falla (no responde §7.2). Se deduce que hoy vivimos mejor, pero esa no es la función de la frase: el autor no compara hábitos de salud, sino que desmonta el argumento de que lo de entonces era mejor (not how we ought to).

B question the idea that what was once usual must be good for us.
Correcta. El ejemplo apoya la frase que lo introduce: That people once slept in a particular way tells us how they lived, not how we ought to. Es la razón por la que el autor llama al razonamiento de la industria seductive and, I think, muddled: lo antiguo no es bueno por ser antiguo. Question the idea recoge la función del fragmento (§5.1).

C explain why the practice of two sleeps eventually died out.
Falla (pasaje vecino §7.8). Por qué desapareció el doble sueño se explica en el tercer párrafo: as artificial lighting spread and bedtimes drifted later. Este pasaje no trata de eso.

D ridicule the customers of the sleep industry for their credulity.
Falla (voz §7.4, alcance §7.3). La ironía del párrafo apunta a la industria y a su razonamiento (The reasoning behind all this is seductive and, I think, muddled), no a sus clientes, de los que el texto no dice nada; y ridicule exagera el tono de muddled.

Teoría: §5.1 Para qué sirve un fragmento · §5.2 Verbos de función en las opciones

36 · C · Global

Pregunta: What does the writer conclude about the history of segmented sleep?

Pasaje: el texto completo. **Respuesta propia:** Que no sirve como receta para dormir de otra manera, pero quita angustia: cambia cómo vivimos el despertar, no el cuerpo.

A It offers a pattern of sleep that many people today would do well to adopt.
Falla (voz §7.4). Es la idea de la industria del bienestar (by recovering the rhythm of our ancestors we might recover their supposed serenity too), que el autor rechaza; él mismo dice I have not, I should add, rediscovered some lost rhythm.

B It is of limited interest because the evidence for it is uncertain.
Falla (medio cierto §7.6). La mitad sobre las pruebas tiene apoyo (Nor is the evidence quite as tidy as the marketing suggests), pero el autor no le resta interés a la historia: I would not want to dismiss the history altogether, y el paralelo con el laboratorio le parece genuinely striking.

C It can ease the distress of waking at night even if it changes nothing physically.
Correcta. El autor sitúa el valor de la historia lejos de la industria del bienestar (its real value lies somewhere the wellness industry has little reason to look): saber que el despertar era normal does nothing to change the body, pero It can, however, change what we make of it. El último párrafo lo confirma con su caso: no ha recuperado ningún ritmo (I still wake at three), pero ya no se angustia (I no longer reach for my phone or curse the dark).

D It shows that modern insomnia is caused by the habits of industrial societies.
Falla (lógica §7.5, ausente §7.7). El texto relaciona la luz artificial con la desaparición del doble sueño (as artificial lighting spread), no con el insomnio actual. Lo que, según el autor, empeora el despertar nocturno es the panic that follows it.

Teoría: §5.4 Preguntas globales · §4.3 Ironía, understatement y concesión

Part 6 · Gapped text

2 puntos por acierto. Cada solución explica qué une el párrafo con lo de antes (←) y con lo de después (→), con citas de los dos lados; cuando hay un párrafo tentador, por qué falla; y, al final, por qué el sobrante no entra en ningún hueco. Los números de sección remiten a RDG-P6_Teoria_v1.

Explicación por hueco

37 · E · *The reason, explained Helen Darby, who has run the…*

← Con lo anterior. El párrafo anterior deja algo sin explicar: el viento ha amainado, which, I was told, was exactly what everyone had been hoping for. E empieza dando la explicación con un sustantivo que la anuncia: The reason, explained Helen Darby, y la razón es justo esa calma: a net is useless in a breeze.

→ Con lo siguiente. E presenta a Darby con nombre completo y cargo (Helen Darby, who has run the ringing programme here), y el párrafo siguiente ya la nombra solo por el apellido: Darby leading with a head torch (§3.4). Además, E habla de las redes en general (the fine black netting) y el párrafo siguiente pasa a las de esa mañana: The nets, ten in all.

Teoría: §4.1 Pistas hacia atrás · §3.4 Progresión temática

38 · B · *In the third net hung a robin, hopelessly entangled…*

← Con lo anterior. El párrafo anterior termina cuando empieza la primera revisión de las redes: the first round of checks began. B cuenta lo que encontraron en ella: In the third net hung a robin.

→ Con lo siguiente. B termina con el pájaro dentro de una bolsa (into a small cotton bag, the first of a dozen we carried back), y el párrafo siguiente presupone esas bolsas y la vuelta a la caseta: Back in the ringing room, the bags were hung in a row. Ningún otro párrafo menciona las bolsas antes de ese punto.

Tentador: H. The second round produced nothing at all parece seguir a the first round of checks began, pero se salta la primera ronda sin contarla, Amazement, I soon discovered, is rationed no tiene ningún asombro anterior que recoger y el párrafo siguiente contradice a H: tras nothing at all y a solitary wren no puede haber una fila de bolsas (the bags were hung in a row).

Teoría: §3.1 Hilo narrativo · §4.1 Pistas hacia atrás

39 • G • *None of these figures would mean much without the…*

← Con lo anterior. El párrafo anterior enumera los datos que se toman de cada ave: la longitud del ala, el peso y todo lo que se anota (A volunteer at the desk wrote everything down in a ledger). G los recoge con un sustantivo resumen y un demostrativo: None of these figures (§4.4).

→ Con lo siguiente. G describe la anilla y lo que lleva grabado: stamped with a unique number and an address to write to. El párrafo siguiente retoma ese número con un demostrativo: That number is the whole point of the exercise. G además pasa al presente (It is a narrow band of soft metal), el plano de la explicación que sigue (§3.3).

Tentador: F. That entry, pencilled into a ledger parece recoger A volunteer at the desk wrote everything down in a ledger, pero F cierra la visita (I left thinking of it as a kind of bookkeeping) cuando la mañana acaba de empezar, y no menciona ningún número para That number is the whole point of the exercise.

Teoría: §4.1 Pistas hacia atrás · §3.3 Textos mixtos

40 • D • *Some of the most celebrated of those reports have…*

← Con lo anterior. El párrafo anterior termina con los avisos que llegan al BTO y lo que revelan: each of those encounters is reported, the reports show where birds go. D los retoma con un demostrativo: Some of the most celebrated of those reports.

→ Con lo siguiente. D cuenta un hallazgo célebre, la golondrina that settled where British swallows spend the winter, y el párrafo siguiente se compara con él: Darby's own favourite is altogether more modest. Sin un caso famoso delante, favourite no tiene a qué referirse y more modest no tiene con qué compararse (§4.1, comparativos).

Tentador: C. Encaja muy bien por detrás: Not every encounter, though, requires a second capture recoge each of those encounters is reported. Pero falla por delante: C explica una técnica, las anillas de colores, no un hallazgo célebre, así que altogether more modest se queda sin término de comparación.

Teoría: §4.1 Pistas hacia atrás · §3.2 Hilo argumentativo

41 • H • *Amazement, I soon discovered, is rationed.*

← Con lo anterior. El párrafo anterior termina con la cita de Darby: Both of those things still amaze me. H recoge el verbo con un sustantivo (Amazement, I soon discovered, is rationed) y vuelve del comentario al relato de la mañana (§3.3, §4.4 nominalización).

→ Con lo siguiente. H describe una mañana parada (The second round produced nothing at all, the third a solitary wren), y el párrafo siguiente rompe esa espera: Then, a little after nine, everything changed. La hora encaja: H llega a by half past eight.

Tentador: F. That entry podría parecer la carta del francés (sent in the number on its ring), pero F cierra la visita (I left thinking of it as a kind of bookkeeping) y el párrafo siguiente sigue la mañana (Then, a little after nine): cronología imposible.

Teoría: §4.4 Cadenas léxicas · §3.3 Textos mixtos

42 • A • *I was to release it, she had told me…*

← Con lo anterior. El párrafo anterior deja al narrador con un reyezuelo en la mano: placed it in my palm and went to fetch more bags. A empieza con ese pájaro (it) y con lo que Darby le había dicho que hiciera: I was to release it, she had told me. El color confirma la especie: a scrap of olive green.

→ Con lo siguiente. A cierra la sesión (the nets were closed one by one), y el párrafo siguiente lo presupone: The last bird of the morning solo tiene sentido si las redes ya se están recogiendo.

Tentador: B. Otro pájaro en una red (In the third net hung a robin) podría parecer parte de la avalancha, pero deja sin soltar el reyezuelo que el narrador tiene en la mano y no cierra la sesión, así que The last bird of the morning no tiene apoyo. Además, the first of a dozen we carried back solo tiene sentido en la primera ronda.

Teoría: §4.1 Pistas hacia atrás · §3.1 Hilo narrativo

43 · F · *That entry, pencilled into a ledger that already ran…*

← Con lo anterior. El párrafo anterior termina con Darby anotando la recaptura del mirlo: writing it up. F empieza con esa anotación: That entry, pencilled into a ledger.

→ Con lo siguiente. F define el anillamiento como contabilidad lenta y poco lucida (slow, unglamorous and cumulative, may not be read for years), y el párrafo siguiente responde a esa idea: If that sounds dispiriting, it did not feel so. Además, F se despide (I left thinking) y el párrafo siguiente es el camino de vuelta: as I walked back past the furled nets.

Tentador: D. Una anilla célebre después de una recaptura parece un buen enlace, pero those reports no tiene antecedente: el mirlo lo han recapturado los propios anilladores, nadie lo ha notificado. Y D es un éxito, nada que pueda resultar dispiriting: If that sounds dispiriting se queda sin referente.

Teoría: §4.1 Pistas hacia atrás · §3.2 Hilo argumentativo

El párrafo sobrante

C · *Not every encounter, though, requires a second capture.*

- **Huecos 37–39.** Not every encounter, though presupone que el texto ya ha hablado de reencuentros con aves anilladas, y hasta el párrafo de each of those encounters is reported no lo hace. Además, C no presenta a Darby (Darby leading with a head torch), no habla de bolsas (the bags were hung in a row) ni de ningún número (That number is the whole point).
- **Hueco 40.** Encaje por un solo lado (§5.1): recoge bien each of those encounters is reported, pero Darby's own favourite is altogether more modest necesita delante un hallazgo célebre con el que compararse, y C solo describe las anillas de colores.
- **Huecos 41 y 42.** C es una explicación en presente sin ningún suceso de la mañana: no prepara la espera que rompe Then, a little after nine, everything changed, ni suelta el reyezuelo que el narrador tiene en la mano ni cierra la sesión que presupone The last bird of the morning.
- **Hueco 43.** Por detrás podría seguir a la recaptura del mirlo, pero no recoge writing it up y no hay nada desalentador en un método que multiplica los avisos: If that sounds dispiriting se queda sin referente.

Teoría: §5.1 Cómo se fabrica el sobrante · §5.2 Trampas de encaje

Part 7 · Multiple matching

1 punto por acierto. Cada solución da una línea del texto para cada elemento de la pregunta y, cuando hay una sección tentadora, explica por qué falla y de qué tipo es (los tipos de distractor de RDG-P5 §7). Los demás números de sección remiten a RDG-P7_Teoria_v1.

Reparto de claves: A 2 · B 3 · C 2 · D 3. Cada sección es la respuesta de al menos una pregunta.

Explicación por pregunta

44 · C · Leila Haddad, doctor

Pregunta: Which person had worries before leaving that proved to be groundless?

Elementos (2), cada uno con su línea:

1. Preocupación previa: What kept me awake in those months was the thought of a burst appendix or a serious fall in the depths of winter (in those months remite a the months before departure).
2. Infundada: In the end, the gravest thing I treated was a broken wrist.

Tentadora: D (ausente, RDG-P5 §7.7). Habla del frío antes de ir y de que no fue para tanto (at minus forty you simply dress for it), pero nunca dice que le preocupara: lo que se cumple es un consejo ajeno (A man who had done three winters told me that the cold would be the least of my worries). El temor previo hay que suponerlo.

Teoría: §4.1 Preguntas de uno y de dos elementos · §3.3 Prever la paráfrasis

45 · B · Owen Prys, chef

Pregunta: Which person applied for the job on the spur of the moment?

En el texto: filled in the form before I could talk myself out of it; lo poco que lo pensó se confirma con had forgotten all about it by the time they called me for an interview.

Tentadora: D (lógica, RDG-P5 §7.5). También cuenta cómo llegó al puesto, pero es lo contrario de un impulso: un deseo de toda la vida y varios intentos (I applied three times before they finally took me).

Teoría: §3.3 Prever la paráfrasis

46 · A · Ruth Calder, glaciologist

Pregunta: Which person found it unexpectedly difficult to focus on intellectual tasks?

En el texto: Lo que esperaba: I assumed that the winter, with no fieldwork possible, would be the most productive period of my career. Lo que pasó: Something about the endless dark made sustained thought almost impossible.

Tentadora: C (medio cierto, RDG-P5 §7.6). Lo que la ocupó tampoco fue lo que esperaba (What took up most of my time turned out to be something nobody had mentioned on any training course), pero lo sorprendente es su contenido, no que le costara concentrarse.

Teoría: §4.1 Preguntas de uno y de dos elementos · §3.3 Prever la paráfrasis

47 · D · Callum Reid, generator mechanic

Pregunta: Which person regrets how they spent some of their leisure time?

En el texto: If I have one regret, it is that I spent so many winter evenings tinkering in the workshop; lo que se perdió: I watched it far less often than I should have.

Tentadora: A (ausente, RDG-P5 §7.7). Tampoco aprovechó el tiempo como pensaba (In the event, I barely opened them), pero no expresa ningún pesar: lo explica por la oscuridad y lo que cuenta después es cómo lo resolvió.

Teoría: §3.3 Prever la paráfrasis · §3.4 Señales de postura y de cambio

48 · A · Ruth Calder, glaciologist

Pregunta: Which person initially dismissed guidance that turned out to be sound?

Elementos (2), cada uno con su línea:

1. Consejo recibido y desdeñado: I remember thinking it faintly patronising.
2. Acertado al final: By June I had pinned her list of suggestions above my desk, y the small goals worked.

Tentadora: D (medio cierto, RDG-P5 §7.6). Recibió un consejo que resultó cierto (and he was right), pero en ningún momento lo despreció: falta el primer elemento.

Teoría: §4.1 Preguntas de uno y de dos elementos · §3.4 Señales de postura y de cambio

49 · C · Leila Haddad, doctor

Pregunta: Which person took on a supportive role that was not part of their job?

En el texto: I became, without ever quite deciding to, the person everyone confided in; que no era parte del puesto lo dice antes: something nobody had mentioned on any training course.

Tentadora: B (medio cierto, RDG-P5 §7.6). También cuida del ánimo del grupo, pero como parte explícita de su trabajo: Morale, I was told there, would be as much my responsibility as the menu.

Teoría: §3.3 Prever la paráfrasis · §4.3 La sección tentadora

50 · B · Owen Prys, chef

Pregunta: Which person learnt to detect signs of distress in others' behaviour at mealtimes?

En el texto: When someone started skipping breakfast or pushing food round the plate, it was usually the first sign that they were struggling.

Tentadora: C (medio cierto, RDG-P5 §7.6). También descubre los problemas de los demás, pero en la consulta y porque se los cuentan (stayed an hour to talk about a marriage under strain), no observando cómo comen.

Teoría: §3.3 Prever la paráfrasis

51 · D · Callum Reid, generator mechanic

Pregunta: Which person felt overwhelmed by ordinary surroundings on returning home?

En el texto: The first time I walked into a supermarket I had to leave after five minutes: the noise, the smells, thirty kinds of bread.

Tentadora: C (no responde, RDG-P5 §7.2). También habla de la vuelta (I came home with an enormous respect for counsellors), pero de lo que aprendió, no de un choque con el entorno.

Teoría: §3.3 Prever la paráfrasis

52 · B · Owen Prys, chef

Pregunta: Which person recalls a petty disagreement that got out of hand?

En el texto: The worst row of the winter began over who had finished the last jar of peanut butter, y fue a más: for a fortnight two grown men refused to sit at the same table.

Tentadora: C (eco léxico, RDG-P5 §7.1). Aparecen conflictos (a marriage under strain), pero son problemas personales que los demás le cuentan, ni triviales ni entre miembros de la base.

Teoría: §3.3 Prever la paráfrasis · §4.1 Preguntas de uno y de dos elementos

53 · D · Callum Reid, generator mechanic

Pregunta: Which person has less patience with routine aspects of work since coming back?

Elementos (2), cada uno con su línea:

1. El contraste que lo explica: every job had an obvious purpose.
2. Menos paciencia ahora: now I sit in meetings about meetings and find myself far less patient with them than I used to be.

Tentadora: C (medio cierto, RDG-P5 §7.6). La experiencia también cambió su mirada sobre el trabajo, pero en sentido contrario y sobre el de otros: I came home with an enormous respect for counsellors and for anyone else who listens to other people's troubles for a living.

Teoría: §4.1 Preguntas de uno y de dos elementos · §3.4 Señales de postura y de cambio
