Listening

Simulacro 02 · paper 3 de 4

Parts 1–4 · 30 preguntas · unos 40 minutos · audio: SIM-02_LST.mp3

INSTRUCTIONS TO CANDIDATES

Time: approximately **40 minutes**, including five minutes to copy your answers.

There are **four** parts to the test. You will hear each part **twice**.

Write your answers on the question paper as you listen. At the end of the test you will have five minutes to copy them onto the answer sheet.

Each question carries one mark.

Partes y tiempos

Part	Tarea	Preguntas	Puntos	En el MP3
1	Three extracts	1–6	6	0:37
2	Sentence completion	7–15	9	8:52
3	Interview	16–20	5	18:14
4	Multiple matching	21–30	10	26:24
	Copiar las respuestas en la hoja			34:27
	Total	**30**	**30**	**39:48**

Cómo hacer el simulacro

1. Ten delante solo los enunciados (las páginas siguientes). Reproduce el MP3 de principio a fin, sin pausar: las pausas para leer las preguntas y para revisar ya están en el audio, con el guion del examen.
2. Responde en los enunciados mientras escuchas y, en los cinco minutos finales, pasa las respuestas a la hoja de respuestas (después de la Part 4). En la Part 2, escribe las palabras que oyes, sin cambiarlas.
3. Corrige con las soluciones: incluyen la transcripción completa, con la frase que da cada respuesta resaltada.
4. Si fallas una pregunta, vuelve a escuchar ese tramo con la transcripción delante; el mapa del MP3 está en esta página.

Voces sintéticas con acentos británico, irlandés, australiano, neozelandés y norteamericano; el narrador es siempre el mismo. Ninguna respuesta depende solo de la entonación.

Material no oficial, sin afiliación con Cambridge University Press & Assessment. Audio con voces sintéticas.

Part 1 Three extracts

You will hear three different extracts. For questions 1–6, choose the answer (**A, B** or **C**) which fits best according to what you hear. There are two questions for each extract.

Extract One

You hear two friends talking about a community choir that the woman has joined.

1 What does the woman say about the choir leader?

A She sets high standards without embarrassing individual singers.
B She holds auditions so that newcomers can be placed in the right section.
C She believes that music lessons in schools do more harm than good.

2 What does the woman value most about the choir?

A the chance to sing music she would not otherwise hear
B the opportunity to make friends outside work
C the way it stops her dwelling on other concerns

Extract Two

You hear a volcanologist talking about her work.

3 What does the volcanologist say about most of her working time?

A It is spent on visits to the craters of active volcanoes.
B It is largely taken up with checking that equipment works.
C It involves detecting very subtle signals in her data.

4 What does the volcanologist find hardest about her job?

A persuading local people to leave their homes when necessary
B accepting that her forecasts cannot resolve the dilemma officials face
C keeping up with the science of predicting eruptions

Extract Three

You hear two friends discussing a podcast about failed inventions.

5 What is the man's opinion of the presenter?

A She is too ready to make fun of other people's misfortunes.
B She has not looked into the inventors' lives carefully enough.
C She spends too long on each episode's subject.

6 What do the two friends agree about?

A The episode about the electric car was the best one.
B The presenter treats the inventors with respect.
C Many failed ideas were simply launched at the wrong time.

Part 2 Sentence completion

You will hear a historian called Daniel Reeve giving a talk about the nineteenth-century trade in natural ice. For questions 7–15, complete the sentences with a word or short phrase.

The frozen water trade

Tudor's very first shipment of ice was sent to the island of ___7___.

In 1812 Tudor was briefly imprisoned as a result of his ___8___.

The material that Tudor found worked best as insulation was ___9___.

Wyeth's invention was a ___10___ pulled by horses that made it possible to cut identical blocks.

Residents of Calcutta paid for a purpose-built ___11___ to keep future cargoes in.

Tudor gave free ice for a year to ___12___ to encourage a taste for cold drinks.

Thoreau saw Irish workers harvesting ice on ___13___.

By the 1880s, doctors feared that ice cut from rivers might spread ___14___.

In the speaker's view, what finally killed off the trade was ___15___.

Part 3 Interview

You will hear part of an interview with Tom Halloran, who records the sounds of wildlife. For questions 16–20, choose the answer (**A, B, C** or **D**) which fits best according to what you hear.

16 What point does Tom make about recording wildlife?

- **A** Good equipment is beyond the means of most beginners.
- **B** Patience and choice of location matter more than the equipment.
- **C** The best results are usually obtained at night.
- **D** Short recordings are often more valuable than long ones.

17 According to Tom, his work has become more difficult mainly because

- **A** animals have become more wary of people.
- **B** the remotest places are harder to get to than before.
- **C** recordings now need to be much longer to be usable.
- **D** it is increasingly hard to escape man-made noise.

18 What is Tom's attitude to combining sounds from different recordings?

- **A** He believes it gives a false impression of a place.
- **B** He thinks the results are generally of poor quality.
- **C** He accepts it provided that listeners are informed.
- **D** He considers it too time-consuming to be worthwhile.

19 What did Tom find moving about his recordings of great tits?

- **A** the fact that birds in the city sang more frequently
- **B** how alike the birds in the two places sounded
- **C** the way the birds had adapted to living near people
- **D** the discovery of something researchers had overlooked

20 What does Tom hope his recordings will do?

- **A** persuade people to campaign for the environment
- **B** help people learn to identify different birds
- **C** preserve sounds that may soon disappear for good
- **D** encourage people to pay closer attention to their surroundings

Part 4 Multiple matching

You will hear five short extracts in which people are talking about giving up their car. While you listen, you must complete both tasks.

TASK ONE

For questions 21–25, choose from the list (**A–H**) what finally prompted each speaker to give up their car.

A a change in their health
B the cost of a repair
C a move to a new home
D a minor accident
E a question from a child
F concern about the environment
G a long period without using it
H pressure from their partner

Speaker 1	21
Speaker 2	22
Speaker 3	23
Speaker 4	24
Speaker 5	25

TASK TWO

For questions 26–30, choose from the list (**A–H**) what each speaker has found to be the main benefit.

A feeling less stressed
B meeting new people
C getting to know their local area
D making good use of travelling time
E becoming fitter
F saving money
G spending more time with family
H a greater sense of independence

Speaker 1	26
Speaker 2	27
Speaker 3	28
Speaker 4	29
Speaker 5	30

Hoja de respuestas

Part 1 · Three extracts

Marca una sola letra por pregunta. Al corregir, 1 punto por acierto; los errores no restan. En el examen en papel se responde en el cuadernillo y al final hay 5 minutos para pasar las respuestas a la hoja.

Nº	A	B	C	Puntos
1	A	B	C	/ 1
2	A	B	C	/ 1
3	A	B	C	/ 1
4	A	B	C	/ 1
5	A	B	C	/ 1
6	A	B	C	/ 1
			Total	**/ 6**

Part 2 · Sentence completion

Escribe las palabras que oyes, sin cambiarlas, y comprueba que encajan en la frase y que están bien escritas. 1 punto por respuesta correcta. En el examen en papel: mayúsculas, una letra por casilla.

Nº	Respuesta	Puntos
7	_____	/ 1
8	_____	/ 1
9	_____	/ 1
10	_____	/ 1
11	_____	/ 1
12	_____	/ 1
13	_____	/ 1
14	_____	/ 1
15	_____	/ 1
	Total	**/ 9**

Part 3 · Interview

Marca una sola letra por pregunta. Al corregir, 1 punto por acierto; los errores no restan. En el examen en papel se responde en el cuadernillo y al final hay 5 minutos para pasar las respuestas a la hoja.

Nº	A	B	C	D	Puntos
16	A	B	C	D	/ 1
17	A	B	C	D	/ 1
18	A	B	C	D	/ 1
19	A	B	C	D	/ 1
20	A	B	C	D	/ 1
				Total	**/ 5**

Part 4 · Multiple matching

Una letra por casilla; en cada tarea, cada letra se usa una sola vez y sobran tres. 1 punto por acierto; los errores no restan. En el examen en papel se responde en el cuadernillo y al final hay 5 minutos para pasar las respuestas a la hoja.

Hablante	Nº	Task One	Nº	Task Two	Puntos
Speaker 1	21		26		/ 2
Speaker 2	22		27		/ 2
Speaker 3	23		28		/ 2
Speaker 4	24		29		/ 2
Speaker 5	25		30		/ 2
				Total	**/ 10**

Puntuación total

Part	Tarea	Puntos
1	Three extracts	_____ / 6
2	Sentence completion	_____ / 9
3	Interview	_____ / 5
4	Multiple matching	_____ / 10
	Total	**_____ / 30**

Referencia orientativa, no oficial: el aprobado con nota C2 suele quedar en torno al 60 % de la puntuación bruta, unos 18 de 30 puntos; la conversión exacta cambia de un examen a otro.

SOLUCIONES

Part 1 · Three extracts

1 punto por acierto. Para cada extracto: la transcripción, con la frase que da cada respuesta en negrita y el número de la pregunta; después, por qué la clave es correcta y por qué falla cada distractor, con su tipo (§4) y la cita que lo descarta. Los números de sección remiten a LST_Teoria_v1.

Extract One

You hear two friends talking about a community choir that the woman has joined.

Voces · Woman: Emily, inglés irlandés · Man: Ryan, inglés británico

Woman You'll laugh, but I've actually joined that choir that meets in the library on Tuesdays.

Man I'm not laughing, I'm impressed. You always said you couldn't sing a note.

Woman I still can't, really. That's why I was dreading some sort of audition. But Maggie, the woman who runs it, won't hear of auditions. Her view is that anyone who can speak can sing, and that what stops most people is having been told otherwise at school.

Man That rings a bell. I was told to just mouth the words in the school play.

Woman Exactly. Not that she lets us get away with anything. **She's a stickler for going over the same few bars until we get them right**[1]. **But she never singles anyone out**[1].

Man So what keeps you going back? The music?

Woman Partly. But **mostly it's that for two hours I can't think about anything else**[2]. You can't worry about work and count beats at the same time.

Man I know what you mean. That's how I feel about climbing, although your hobby is rather less likely to land you in hospital.

1 · A · Detalle

Pregunta: What does the woman say about the choir leader?

A She sets high standards without embarrassing individual singers.
Correcta. Las dos mitades de la opción están en una misma intervención: exige (She's a stickler for going over the same few bars until we get them right) y no deja a nadie en evidencia (But she never singles anyone out). High standards recoge stickler y without embarrassing individual singers, never singles anyone out.

B She holds auditions so that newcomers can be placed in the right section.
Falla (lógica alterada §4.6). Dice lo contrario: la directora won't hear of auditions.

C She believes that music lessons in schools do more harm than good.
Falla (eco léxico §4.1, grado y alcance §4.5). Recoge at school, pero lo que culpa la directora es que a la gente le dijeran que no sabía cantar (having been told otherwise at school), no las clases de música en general.

Teoría: §5.3 Part 1: tipos de pregunta · §3.1 Lo que se dice y lo que se da a entender

2 · C · Actitud y opinión

Pregunta: What does the woman value most about the choir?

A the chance to sing music she would not otherwise hear
Falla (mencionado y descartado §4.2). La música se menciona y se rebaja: The music? — Partly. No es lo que más valora.

B the opportunity to make friends outside work
Falla (ausente §4.8, eco léxico §4.1). Recoge work, pero la mujer no habla de amistades: el trabajo aparece como lo que deja de preocuparle.

C the way it stops her dwelling on other concerns
Correcta. A la pregunta del amigo responde con una concesión y luego lo principal: Partly … But mostly it's that for two hours I can't think about anything else, y lo explica: You can't worry about work and count beats at the same time. La segunda idea es la que manda (§3.3).

Teoría: §3.3 La segunda idea manda · §5.3 Part 1: tipos de pregunta

Extract Two

You hear a volcanologist talking about her work.

Voces · Volcanologist: Natasha, inglés australiano

> Whenever I tell people what I do, they picture me in a heat-proof suit, standing at the edge of a crater while lava spurts out behind me. I have done that, once or twice, but it's a tiny part of the job. Most of my working life is spent in front of a screen, studying graphs of ground movement and gas readings, **looking for changes so slight that you could easily mistake them for a fault in the equipment**[3]. The science, frankly, is the straightforward bit. What keeps me awake is having to tell a local mayor that there's, say, a thirty per cent chance of an eruption in the next month. Should she evacuate twenty thousand people on those odds? If she does and nothing happens, she'll be reluctant to do it again, and so will they. If she doesn't, and it does erupt, the consequences hardly bear thinking about. **I can give her the best numbers available, but I can't make the decision any easier**[4], and that's something I've had to learn to live with.

3 · C · Detalle

Pregunta: What does the volcanologist say about most of her working time?

A It is spent on visits to the craters of active volcanoes.
Falla (mencionado y descartado §4.2). Es la imagen que tiene la gente, y ella la rebaja: it's a tiny part of the job.

B It is largely taken up with checking that equipment works.
Falla (eco léxico §4.1). Eco de a fault in the equipment: los fallos de los aparatos aparecen solo como aquello con lo que se pueden confundir los cambios.

C It involves detecting very subtle signals in her data.
Correcta. Most of my working life is spent in front of a screen, buscando changes so slight that you could easily mistake them for a fault in the equipment. Very subtle signals parafrasea changes so slight.

Teoría: §5.3 Part 1: tipos de pregunta · §2.4 Matización

4 · B · Sentimiento

Pregunta: What does the volcanologist find hardest about her job?

A persuading local people to leave their homes when necessary
Falla (voz equivocada §4.4, eco léxico §4.1). La que decide si se evacua es la alcaldesa (Should she evacuate twenty thousand people); la vulcanóloga no habla de convencer a nadie.

B accepting that her forecasts cannot resolve the dilemma officials face
Correcta. Lo que le quita el sueño es la decisión de la alcaldesa (What keeps me awake is having to tell a local mayor), y lo resume al final: I can give her the best numbers available, but I can't make the decision any easier. Accepting recoge something I've had to learn to live with.

C keeping up with the science of predicting eruptions
Falla (lógica alterada §4.6). Dice lo contrario: The science, frankly, is the straightforward bit.

Teoría: §3.3 La segunda idea manda · §5.3 Part 1: tipos de pregunta

Extract Three

You hear two friends discussing a podcast about failed inventions.

Voces · Man: Andrew, inglés norteamericano · Woman: Sonia, inglés británico

Man	Have you heard that podcast about inventions that flopped? Someone at work recommended it.
Woman	I've listened to a few episodes. The one about the little electric car from the eighties was brilliant.
Man	I gave up after two, I'm afraid. **The presenter seems to think every failure is hilarious**[5]. **There's an awful lot of sniggering at people who lost everything**[5].
Woman	I'd have said she was laughing with them rather than at them. And she certainly does her homework. She tracks down the inventors' families, reads their letters…
Man	Maybe so. I just found the tone grating.
Woman	Fair enough. What I like, though, is that **it shows how often failure was simply a matter of bad timing**[6]. Half the ideas that flopped came back twenty years later and made somebody else a fortune.
Man	**Now that I can't argue with**[6]. Most of what's on my phone was somebody's failure first.

5 · A · Actitud y opinión

Pregunta: What is the man's opinion of the presenter?

A She is too ready to make fun of other people's misfortunes.
Correcta. La crítica está en dos frases concretas: The presenter seems to think every failure is hilarious y There's an awful lot of sniggering at people who lost everything. Make fun of parafrasea sniggering at y misfortunes, people who lost everything. Cuando ella lo defiende, él no cambia de opinión: I just found the tone grating.

B She has not looked into the inventors' lives carefully enough.
Falla (voz equivocada §4.4). De la investigación habla ella (she certainly does her homework), y él no la discute: Maybe so. Su queja es el tono.

C She spends too long on each episode's subject.
Falla (ausente §4.8). Nadie habla de la duración de los episodios; él lo dejó por el tono (I gave up after two).

Teoría: §3.4 Léxico de actitud en las opciones · §5.3 Part 1: tipos de pregunta

6 · C · Acuerdo

Pregunta: What do the two friends agree about?

A The episode about the electric car was the best one.
Falla (voz equivocada §4.4). Solo lo dice ella (was brilliant); él dejó el pódcast después de dos episodios.

B The presenter treats the inventors with respect.
Falla (voz equivocada §4.4, lógica alterada §4.6). Es la opinión de ella (laughing with them rather than at them); él no está de acuerdo: I just found the tone grating.

C Many failed ideas were simply launched at the wrong time.
Correcta. Ella propone la idea (it shows how often failure was simply a matter of bad timing), la apoya con un dato (came back twenty years later) y él la suscribe sin reservas: Now that I can't argue with (§3.6). At the wrong time parafrasea bad timing.

Teoría: §3.6 Acuerdo y desacuerdo entre hablantes · §5.3 Part 1: tipos de pregunta

Part 2 · Sentence completion

1 punto por respuesta correcta y bien escrita. La clave sigue la convención de Cambridge: las palabras entre paréntesis son opcionales y la barra separa alternativas. Debajo de cada respuesta van las que no valen: candidatos que se oyen pero no cumplen la condición de la frase (§6.3), formas que no encajan o palabras que no se oyen (§6.4) y errores de ortografía (§6.5). Los números de sección remiten a LST_Teoria_v1.

Transcripción

Voz · Mitchell, inglés neozelandés

Good evening. If I asked you to name the most unlikely export in history, I doubt many of you would suggest frozen water. Yet for most of the nineteenth century, ice cut from the lakes and ponds of New England was shipped all over the world, and the man who started it all was a young Bostonian called Frederic Tudor. In 1806 Tudor loaded a ship with ice and sent it south to the Caribbean. Havana would later become one of his best markets, but **that first cargo went to the island of Martinique** [7], and it was a disaster. Much of the ice arrived intact, but nobody there had the faintest idea what to do with it, and most of it simply melted on the quayside.

The years that followed were hardly kinder. Shipments were lost, partners lost interest, and in 1812 **Tudor's debts grew so large that he spent a short time behind bars** [8]. What saved him was partly stubbornness and partly a series of practical discoveries. The most important concerned insulation. Ice melts from the outside in, so the trick is to stop warm air reaching it. Tudor experimented with straw and with hay, both of which were heavy and tended to rot in a damp hold. **The answer turned out to be sawdust** [9], which the timber mills of Maine were only too glad to give away, since for them it was simply waste.

Cutting the ice was the next problem. At first, men worked on the frozen ponds with axes and hand saws, and the blocks they produced came in every shape imaginable, which made them awkward to stack and quick to melt. In 1825 one of Tudor's suppliers, Nathaniel Wyeth, **came up with a horse-drawn plough** [10] that scored the surface in a grid, so that the ice could be broken into identical blocks. Identical blocks could be packed tightly, and that alone reduced losses dramatically.

With these improvements, Tudor could think much bigger. In 1833 a cargo of around a hundred and eighty tons of his ice set off on a voyage of four months to Calcutta. Remarkably, more than half of it was still frozen when the ship arrived. The British residents of the city were so delighted that, rather than simply renting a warehouse at the docks, they raised money for **a purpose-built ice house** [11] to store future shipments.

> You can't sell a product that people don't know they want, so Tudor set about creating demand. In cities from Charleston to New Orleans **he offered free ice to bar owners for a whole year** [12], on the understanding that they would sell cold drinks at the same price as warm ones. Once customers had tasted an iced drink in the heat of summer, he reasoned, they would never want to go back, and he was right. He also supplied hospitals, where ice was used to bring down fevers, but it was the bars that made his fortune.
>
> By the middle of the century the trade had grown into a huge industry. Tudor's own favourite source was Fresh Pond, in Cambridge, Massachusetts, but ponds all over New England were harvested every winter, **among them Walden Pond** [13], where the writer Henry David Thoreau, who lived beside it, watched gangs of Irish labourers cutting the ice. Thoreau liked to imagine people in India drinking the water from his pond.
>
> So what brought the whole business to an end? Partly the fact that, as towns and factories grew up along the rivers, the ice cut from them became increasingly dirty, and by the 1880s **doctors were warning that it could spread disease** [14]. That alone did serious damage to the trade's reputation. Some people also blamed a run of unusually mild winters, which certainly caused shortages, but **the decisive blow was mechanical refrigeration** [15]. Once ice could be manufactured cleanly and cheaply, in any town and in any season, nobody needed to cut it from a lake. By the 1930s the natural ice trade had all but vanished, and Tudor's achievement had melted away, fittingly enough, from public memory.

Explicaciones

7 • Martinique

Frase: Tudor's very first shipment of ice was sent to the island of **Martinique**.

Se oye: that first cargo went to the island of Martinique

Se acepta: Martinique

Primero menciona un mercado posterior y después da el primero: Havana would later become one of his best markets, but that first cargo went to the island of Martinique. Very first shipment reformula that first cargo.

No vale Havana (candidato §6.3). Fue un buen mercado más tarde (would later become), no el primer destino; además, es una ciudad, no una isla.

No vale the Caribbean (candidato §6.3). Es la región (sent it south to the Caribbean), no la isla.

Teoría: §6.3 Varios candidatos para un mismo hueco · §2.3 Señales del discurso oral

8 • debts / debt

Frase: In 1812 Tudor was briefly imprisoned as a result of his **debts**.

Se oye: Tudor's debts grew so large that he spent a short time behind bars

Se acepta: debts · debt

in 1812 Tudor's debts grew so large that he spent a short time behind bars: behind bars = en la cárcel, y briefly imprisoned lo reformula. Se acepta también el singular.

No vale stubbornness (candidato §6.3). Es lo que lo salvó después (What saved him was partly stubbornness), no la causa de la cárcel.

No vale partners (candidato §6.3). Se oye (partners lost interest), pero no es la causa de la cárcel.

Teoría: §6.3 Varios candidatos para un mismo hueco · §6.4 Qué se escribe

9 • sawdust

Frase: The material that Tudor found worked best as insulation was **sawdust**.

Se oye: The answer turned out to be sawdust

Se acepta: sawdust

Enumera dos pruebas fallidas y da la solución: Tudor experimented with straw and with hay … The answer turned out to be sawdust.

No vale straw (candidato §6.3). Probado y descartado: both of which were heavy and tended to rot.

No vale hay (candidato §6.3). Lo mismo que straw.

No vale saw dust (ortografía §6.5). Es una sola palabra: sawdust.

Teoría: §6.3 Varios candidatos para un mismo hueco · §6.5 Ortografía

10 • (horse-drawn) plough / (horse-drawn) plow

Frase: Wyeth's invention was a **horse-drawn plough** pulled by horses that made it possible to cut identical blocks.

Se oye: came up with a horse-drawn plough

Se acepta: horse-drawn plough · plough · horse-drawn plow · plow

Antes se cortaba con herramientas de mano (with axes and hand saws); Wyeth came up with a horse-drawn plough. La frase del papel reformula horse-drawn con pulled by horses; si se escribe, no resta. Se acepta la grafía americana.

No vale saw (candidato §6.3). Era la herramienta anterior (axes and hand saws), y no la tiraban caballos.

No vale grid (candidato §6.3). Es el dibujo que marcaba el arado (scored the surface in a grid), no el invento.

Teoría: §6.3 Varios candidatos para un mismo hueco · §6.5 Ortografía

11 • ice house / icehouse / ice-house

Frase: Residents of Calcutta paid for a purpose-built **ice house** to keep future cargoes in.

Se oye: a purpose-built ice house

Se acepta: ice house · icehouse · ice-house

Contrapone lo que no hicieron y lo que hicieron: rather than simply renting a warehouse at the docks, they raised money for a purpose-built ice house. Se acepta junto, separado o con guion.

No vale warehouse (candidato §6.3). Descartado con rather than simply renting a warehouse.

No vale house (incompleta §6.4). Sin ice no dice qué clase de edificio.

Teoría: §6.3 Varios candidatos para un mismo hueco · §6.4 Qué se escribe

12 • bar owners / bars

Frase: Tudor gave free ice for a year to **bar owners** to encourage a taste for cold drinks.

Se oye: he offered free ice to bar owners for a whole year

Se acepta: bar owners · bars

he offered free ice to bar owners for a whole year, con la condición de vender las bebidas frías al mismo precio. Se acepta también bars, que se oye al final del párrafo (it was the bars that made his fortune).

No vale hospitals (candidato §6.3). También recibían hielo (He also supplied hospitals), pero no gratis ni para crear afición a las bebidas frías.

No vale customers (candidato §6.3). Son quienes debían acostumbrarse a las bebidas frías, no quienes recibían el hielo gratis.

Teoría: §6.3 Varios candidatos para un mismo hueco · §3.3 La segunda idea manda

13 • Walden Pond / Walden

Frase: Thoreau saw Irish workers harvesting ice on **Walden Pond**.

Se oye: among them Walden Pond

Se acepta: Walden Pond · Walden

Primero nombra el lago preferido de Tudor y luego el de Thoreau: Tudor's own favourite source was Fresh Pond … among them Walden Pond, where the writer Henry David Thoreau.

No vale Fresh Pond (candidato §6.3). Era la fuente preferida de Tudor, no el lago de Thoreau.

No vale New England (candidato §6.3). Es la región, no el lago.

Teoría: §6.3 Varios candidatos para un mismo hueco · §3.2 Voz propia y voces ajenas

14 • disease / diseases

Frase: By the 1880s, doctors feared that ice cut from rivers might spread **disease**.

Se oye: doctors were warning that it could spread disease

Se acepta: disease · diseases

by the 1880s doctors were warning that it could spread disease: el hielo de los ríos venía cada vez más sucio. Se acepta también el plural.

No vale dirt (sinónimo §6.4). Se oye dirty, pero lo que temían los médicos es que transmitiera enfermedades.

No vale fevers (candidato §6.3). Se oye en otro párrafo: el hielo servía para bajarlas (bring down fevers).

Teoría: §6.3 Varios candidatos para un mismo hueco · §6.4 Qué se escribe

15 • (mechanical) refrigeration

Frase: In the speaker's view, what finally killed off the trade was **mechanical refrigeration**.

Se oye: the decisive blow was mechanical refrigeration

Se acepta: mechanical refrigeration · refrigeration

Descarta una explicación ajena y da la suya: Some people also blamed a run of unusually mild winters … but the decisive blow was mechanical refrigeration. Finally killed off reformula the decisive blow.

No vale mild winters (candidato §6.3). Es lo que culpaban otros (Some people also blamed); para el historiador causaron escasez, no el final.

No vale manufactured ice (sinónimo §6.4). Resume la idea (Once ice could be manufactured cleanly), pero no es lo que se oye: la palabra que da el historiador es mechanical refrigeration.

No vale pollution (sinónimo §6.4). El hielo sucio contribuyó (Partly), pero no fue el golpe definitivo, y la palabra no se oye.

Transcripción

You will hear part of an interview with Tom Halloran, who records the sounds of wildlife.

Voces · Interviewer: Libby, inglés británico · Tom: William, inglés australiano

Interviewer My guest today is Tom Halloran, who has spent thirty years recording the sounds of the natural world for radio, film and museums. Tom, I imagine most people assume your job is all about the equipment.

Tom They do, and I understand why. The microphones are expensive, and they look impressive. But I could lend my kit to almost anyone and they'd come back with nothing usable. **The real skill lies in where you put yourself and how long you're prepared to wait** [16]. I once spent eleven nights in a hide in Scotland for forty seconds of an otter feeding her cubs. Most people would call that a dreadful return on the time. I'd call it a good week.

Interviewer Has the job become harder over the years, or is that just nostalgia talking?

Tom Much harder, and not for the reasons people expect. The animals haven't become any shyer. **What's changed is the background** [17]. When I started, there were places in Britain where I could go for an hour or more without hearing an engine of any kind. Now, even in the remotest glens, a plane goes over every few minutes, and a single jet can ruin a recording that's taken all night. I've had to give up on some of my favourite spots altogether. **These days I spend more time waiting for silence than waiting for animals** [17].

Interviewer Couldn't you simply remove the noise afterwards? The software must be very sophisticated by now.

Tom It is, and I do use it to take out the odd click or hum. But there's a line I won't cross. Some recordists will take a blackbird from one morning and a stream from another and lay them on top of each other, and the result can sound gorgeous. **I just don't think you can call it a recording of a place any more** [18]. If a museum tells its visitors that this is what a Norfolk marsh sounds like at dawn, I want that to be true, plane and all if necessary.

Interviewer Has anything you've recorded genuinely surprised you?

Tom	Plenty, but one thing stands out. A few years ago I was recording great tits, both in a city park and in a forest about thirty miles away, and the city birds were singing noticeably higher. Researchers have found the same thing elsewhere: birds in towns seem to raise their pitch so that they can be heard above the traffic. Once you knew to listen for it, the difference was obvious even without any equipment. We tend to think of wildlife either surviving in spite of us or disappearing because of us. **Here were animals quietly changing their own voices to fit in with us**[19], and nobody had asked them to. I found that oddly moving.
Interviewer	Finally, what do you hope people take away from your recordings?
Tom	I'm wary of preaching. People switch off the moment they feel they're being lectured about the environment, and I can't say I blame them. What I'd really like is for someone to hear a recording of a wood at dawn and then, **the next time they're out for a walk, to stop for a minute and actually listen**[20]. If they notice what's there, they might notice when it's gone. And they might even mind.

Explicaciones

16 · B · Actitud y opinión

Pregunta: What point does Tom make about recording wildlife?

A Good equipment is beyond the means of most beginners.
Falla (eco léxico §4.1). Eco de The microphones are expensive, pero no dice que estén fuera del alcance de nadie: al contrario, podría prestárselos a cualquiera (I could lend my kit to almost anyone).

B Patience and choice of location matter more than the equipment.
Correcta. Concede lo del equipo (They do, and I understand why) y da su punto con una señal clara: The real skill lies in where you put yourself and how long you're prepared to wait. Choice of location parafrasea where you put yourself; patience, how long you're prepared to wait.

C The best results are usually obtained at night.
Falla (eco léxico §4.1). Recoge eleven nights in a hide, un ejemplo de espera, no una regla sobre la hora del día.

D Short recordings are often more valuable than long ones.
Falla (ausente §4.8). Los forty seconds ilustran cuánto cuesta conseguir poco material, no que lo breve valga más.

Teoría: §7.2 Part 3: método · §3.3 La segunda idea manda

17 · D · Detalle

Pregunta: According to Tom, his work has become more difficult mainly because

A animals have become more wary of people.
Falla (mencionado y descartado §4.2). Lo descarta expresamente: The animals haven't become any shyer.

B the remotest places are harder to get to than before.
Falla (eco léxico §4.1). Eco de the remotest glens: el problema allí es que pasan aviones, no que sea difícil llegar.

C recordings now need to be much longer to be usable.
Falla (ausente §4.8). No dice que las grabaciones tengan que ser más largas; lo que se alarga es la espera del silencio.

D it is increasingly hard to escape man-made noise.
Correcta. Descarta la explicación esperada y da la suya: What's changed is the background. Lo concreta con los aviones (a single jet can ruin a recording) y lo resume: These days I spend more time waiting for silence than waiting for animals. Man-made noise recoge an engine of any kind y a plane.

Teoría: §7.2 Part 3: método · §3.3 La segunda idea manda

18 · A · Actitud y opinión

Pregunta: What is Tom's attitude to combining sounds from different recordings?

A He believes it gives a false impression of a place.
Correcta. Marca el límite (there's a line I won't cross) y lo justifica: I just don't think you can call it a recording of a place any more. El ejemplo del museo lo confirma: I want that to be true. A false impression of a place parafrasea las dos frases.

B He thinks the results are generally of poor quality.
Falla (lógica alterada §4.6). Reconoce lo contrario: the result can sound gorgeous. Su objeción es la veracidad, no la calidad.

C He accepts it provided that listeners are informed.
Falla (ausente §4.8). No pone ninguna condición: no lo acepta ni avisando al oyente.

D He considers it too time-consuming to be worthwhile.
Falla (ausente §4.8). No habla del tiempo que lleva mezclar sonidos; el programa lo usa para take out the odd click or hum.

Teoría: §3.1 Lo que se dice y lo que se da a entender · §3.4 Léxico de actitud en las opciones

19 · C · Sentimiento

Pregunta: What did Tom find moving about his recordings of great tits?

A the fact that birds in the city sang more frequently
Falla (lógica alterada §4.6). Cantaban más agudo, no más a menudo: singing noticeably higher.

B how alike the birds in the two places sounded
Falla (lógica alterada §4.6). Dice lo contrario: los pájaros de la ciudad sonaban distinto (noticeably higher).

C the way the birds had adapted to living near people
Correcta. Explica qué le emocionó: Here were animals quietly changing their own voices to fit in with us, frente a la idea habitual de que la fauna sobrevive a pesar de nosotros o desaparece. Adapted to living near people parafrasea changing their own voices to fit in with us.

D the discovery of something researchers had overlooked
Falla (lógica alterada §4.6). Los investigadores ya lo habían visto: Researchers have found the same thing elsewhere.

Teoría: §3.3 La segunda idea manda · §3.1 Lo que se dice y lo que se da a entender

20 · D · Actitud y opinión

Pregunta: What does Tom hope his recordings will do?

A persuade people to campaign for the environment
Falla (mencionado y descartado §4.2). Lo descarta: I'm wary of preaching, porque la gente desconecta cuando la sermonean.

B help people learn to identify different birds
Falla (ausente §4.8). No habla de reconocer especies; quiere que la gente escuche, no que aprenda nombres.

C preserve sounds that may soon disappear for good
Falla (eco léxico §4.1). Eco de when it's gone: la desaparición aparece como algo que el oyente podría notar, no como un archivo que él quiera guardar.

D encourage people to pay closer attention to their surroundings
Correcta. Rechaza sermonear (I'm wary of preaching) y dice lo que quiere: What I'd really like es que el oyente, the next time they're out for a walk, to stop for a minute and actually listen. Pay closer attention to their surroundings lo parafrasea.

Teoría: §3.3 La segunda idea manda · §3.4 Léxico de actitud en las opciones

Part 4 · Multiple matching

1 punto por acierto. Después de la clave rápida va la transcripción, con la frase que da cada respuesta en negrita y el número de la pregunta. Para cada hablante se explica la clave de cada tarea y por qué no valen las opciones que roza, con su tipo (§4) y la cita que las descarta. Al final, por qué sobran las tres opciones restantes de cada lista. Los números de sección remiten a LST_Teoria_v1.

Transcripción

Voces · 1: Connor, inglés irlandés · 2: Molly, inglés neozelandés · 3: Brian, inglés norteamericano · 4: Emma, inglés norteamericano · 5: Ava, inglés norteamericano

Speaker 1 It wasn't a documentary about climate change that did it, although I'd certainly watched a few. In the end **it was my daughter, who was seven at the time, asking me why we drove to a shop she could see from her bedroom window** [21]. I didn't have a good answer. So the car went, and I'll be honest: once you take the train fares into account, we've saved far less than people imagine. **What I hadn't expected was to discover my own town** [26]. I know the back lanes now, the bakery that opens at six, the short cut through the churchyard. You see none of that through a windscreen.

Speaker 2 My old hatchback had picked up the odd scrape over the years, nothing serious, and I'd happily have kept it going for ever. Then **the garage quoted me more to replace the gearbox than the whole car was worth, and that was that** [22]. I live at the top of a ridiculously steep hill, so I was dreading the walk home. **Six months on, I'm in better shape than I've been since university** [27]. Friends promised I'd be calmer without the traffic. I'm not, particularly. The buses run late just as often as the roads get jammed.

Speaker 3 These days I take the train to work, forty minutes each way, and **I've turned that into the most useful part of my day** [28]: I clear my emails before I reach the office and read on the way home. My wife says she'd rather I spent the time talking to her, but you can't have everything. She'd also been telling me for years that we hardly needed a car, and she was probably right, but **it took moving house to actually do something about it** [23]. Our new flat is right in the centre, and there's simply nowhere to park within half a mile.

Speaker 4 I'd love to tell you it was an environmental decision, but it wasn't really. I spent most of last year working abroad, and my car sat in a friend's garage the whole time. When I came back and went to collect it, **I realised I hadn't missed it once, so I sold it to him on the spot** [24]. I wouldn't say life's any less stressful without it. But I talk to people now. **I've got to know half the regulars at my bus stop** [29], and one of them has become a really good friend.

Speaker 5 **What I've got back, more than anything, is a kind of calm** [30]. I used to arrive everywhere with my shoulders up round my ears; now I just look out of the window. I can't claim I'm any fitter, mind you, since I take the bus everywhere. And no, it was nothing to do with my eyesight, whatever my children say. **I reversed into a lamp post in a supermarket car park at about two miles an hour** [25]. Nobody was hurt and the damage was minor, but it shook me more than it should have, and I realised I'd been dreading every journey for years.

Explicaciones

Speaker 1 · 21 E · 26 C

Task One · E a question from a child
Correcta. Descarta un motivo y da el real: In the end it was my daughter, who was seven at the time, asking me why we drove to a shop she could see from her bedroom window. A question from a child lo resume; I didn't have a good answer confirma que fue eso lo que le hizo decidir.

No es F concern about the environment **(mencionado y descartado §4.2).** Mencionado y descartado: It wasn't a documentary about climate change that did it.

Task Two · C getting to know their local area
Correcta. What I hadn't expected was to discover my own town, y lo concreta: the back lanes, the bakery that opens at six, the short cut through the churchyard.

No es F saving money **(expectativa §4.7).** El ahorro fue menor de lo esperado: we've saved far less than people imagine.

Teoría: §8.1 Part 4: la tarea · §4.2 Mencionado y descartado · §4.7 Expectativa frente a realidad

Speaker 2 · 22 B · 27 E

Task One · B the cost of a repair
Correcta. El desencadenante es el presupuesto del taller: the garage quoted me more to replace the gearbox than the whole car was worth, and that was that. That was that marca la decisión.

No es D a minor accident **(mencionado y descartado §4.2).** Los golpes fueron menores y no le hicieron dejar el coche: the odd scrape over the years, nothing serious.

Task Two · E becoming fitter
Correcta. Temía la cuesta y ha resultado lo mejor: Six months on, I'm in better shape than I've been since university. In better shape = fitter.

No es A feeling less stressed **(expectativa §4.7).** Le prometieron más calma y no ha sido así: Friends promised I'd be calmer without the traffic. I'm not, particularly.

Teoría: §8.1 Part 4: la tarea · §8.3 Trampas propias · §4.7 Expectativa frente a realidad

Speaker 3 · 23 C · 28 D

Task One · C a move to a new home
Correcta. La insistencia de su mujer es el antecedente; el desencadenante, la mudanza: it took moving house to actually do something about it, a un piso en el centro sin aparcamiento.

No es H pressure from their partner **(no responde §4.3).** Antecedente, no desencadenante (§8.3): She'd also been telling me for years that we hardly needed a car, pero no hizo nada hasta mudarse.

Task Two · D making good use of travelling time
Correcta. La respuesta de la Task Two llega antes que la de la Task One (§8.1). El tren se ha convertido en the most useful part of my day: I clear my emails before I reach the office and read on the way home.

No es G spending more time with family **(voz equivocada §4.4).** Es lo que querría su mujer, no lo que él ha ganado: she'd rather I spent the time talking to her.

Teoría: §8.1 Part 4: la tarea · §8.3 Trampas propias · §3.2 Voz propia y voces ajenas

Speaker 4 · 24 G · 29 B

Task One · G a long period without using it
Correcta. Pasó casi un año sin usarlo (my car sat in a friend's garage the whole time) y al volver I realised I hadn't missed it once, so I sold it to him on the spot.

No es F concern about the environment **(mencionado y descartado §4.2).** Mencionado y descartado: I'd love to tell you it was an environmental decision, but it wasn't really.

Task Two · B meeting new people
Correcta. But I talk to people now: I've got to know half the regulars at my bus stop, y una se ha convertido en a really good friend.

No es A feeling less stressed **(mencionado y descartado §4.2).** Lo niega: I wouldn't say life's any less stressful without it.

Teoría: §8.1 Part 4: la tarea · §4.2 Mencionado y descartado

Speaker 5 · 25 D · 30 A

Task One · D a minor accident
Correcta. El percance fue mínimo (Nobody was hurt and the damage was minor), pero it shook me more than it should have: fue lo que le hizo dejar el coche.

No es A a change in their health **(mencionado y descartado §4.2).** Lo descarta antes de contar el accidente: nothing to do with my eyesight.

Task Two · A feeling less stressed
Correcta. La respuesta de la Task Two llega antes que la de la Task One (§8.1): What I've got back, more than anything, is a kind of calm, frente a antes: I used to arrive everywhere with my shoulders up round my ears. Feeling less stressed lo resume.

No es E becoming fitter **(mencionado y descartado §4.2).** Lo niega: I can't claim I'm any fitter.

Teoría: §8.1 Part 4: la tarea · §4.2 Mencionado y descartado

Opciones que sobran

Task One

A a change in their health
Speaker 5 lo descarta antes de dar su motivo: nothing to do with my eyesight, whatever my children say.

F concern about the environment
Dos hablantes lo niegan: Speaker 1 (It wasn't a documentary about climate change that did it) y Speaker 4 (I'd love to tell you it was an environmental decision, but it wasn't really).

H pressure from their partner
La mujer de Speaker 3 llevaba años insistiendo (She'd also been telling me for years), pero lo que le hizo decidirse fue la mudanza.

Task Two

F saving money
Speaker 1 lo rebaja: we've saved far less than people imagine.

G spending more time with family
Speaker 3 lo menciona en broma, como queja de su mujer: she'd rather I spent the time talking to her.

H a greater sense of independence
Nadie lo menciona; al contrario, Speaker 5 depende ahora del autobús: I take the bus everywhere.
