SPK · PRÁCTICA 04

Speaking test completo

Hoja 04 · Part 2: personas y naturaleza · Part 3: el progreso · dificultad 4 de 6

Unos 19 minutos con el MP3 SPK_Practica_04.mp3 · sin consultar la teoría

Cómo hacer el test

1. Ten delante solo el material del candidato (págs. 2 y 3). Las preguntas de la Part 1, las instrucciones de la Part 2 y las de la discusión solo se oyen.
2. Pon a grabar el móvil y reproduce el MP3 de principio a fin, sin pausar. Los silencios están cronometrados; el Thank you del interlocutor marca el final de cada respuesta.
3. Part 2: empiezas tú cada fase. El compañero interviene en momentos fijos y no te escucha (§1.4): habla unos 20 segundos por turno y reacciona a lo que dice cuando termine.
4. Part 3: respondes las dos tarjetas y las dos preguntas de seguimiento, y luego las seis de la discusión.
5. Al día siguiente, corrige con la hoja de autocorrección y solo después mira las soluciones (§8.1).

Mapa del MP3

Minuto	Parte
0:08	Part 1 · Interview
2:42	Part 2 · Fase 1 (un minuto)
4:08	Part 2 · Fase 2 (tres minutos)
7:46	Part 3 · Tarjeta A
11:23	Part 3 · Tarjeta B
14:43	Part 3 · Discusión
19:21	Fin

Part 2 · Hoja de fotos

Documentary – Sharing the planet

Part 3 · Tarjetas

TARJETA A

Is technological progress always a good thing?

- health
- work
- relationships

TARJETA B

Who benefits most from progress?

- the wealthy
- the young
- future generations

En el examen cada candidato recibe solo su tarjeta. Aquí haces las dos, una detrás de otra.

Hoja de autocorrección

Escucha la grabación al día siguiente y marca la rúbrica antes de mirar las soluciones (preguntas completas en SPK_Teoria_v1 §8.2). Nota por criterio: 5 las cinco sí · 4 sí a las cuatro primeras · 3 falla una de las cuatro primeras · 2 fallan dos · 1 fallan tres o cuatro. GA: la fila de §8.2 que mejor describa un minuto cualquiera de la Part 3. (*) IC3 solo se valora del todo con un compañero real.

Dato	Tu resultado
Long turn A: palabras transcritas y duración	_____ palabras · ____:____ (objetivo: 250+ · 2:00)
Long turn B: palabras transcritas y duración	_____ palabras · ____:____ (objetivo: 250+ · 2:00)
Part 2: ¿llegaste a una decisión negociada?	Sí · No
Part 2: reacciones al compañero que recogían lo que había dicho	____ / 5
Notas (§8.2–8.3)	GR __ · LR __ · DM __ · PR __ · IC __ · GA __ · **total __ / 30**

Código	Pregunta	
Grammatical Resource		
GR1	Variedad de estructuras complejas, no solo frases simples	Sí · No
GR2	Errores solo como despistes, no sistemáticos	Sí · No
GR3	Ningún error dificulta la comprensión	Sí · No
GR4	Estructuras complejas en todo el test, también en la interacción	Sí · No
GR5	Gramática flexible: enfatizar, matizar, deshacer ambigüedades	Sí · No
Lexical Resource		
LR1	Palabras precisas ante lo abstracto, sin vaguedades	Sí · No
LR2	Colocaciones adecuadas, sin calcos ni falsos amigos	Sí · No
LR3	Paráfrasis sin cortar cuando falta una palabra	Sí · No
LR4	Variedad: sin repetir los mismos términos	Sí · No
LR5	Léxico menos común preciso y natural	Sí · No
Discourse Management		
DM1	Long turns de unos dos minutos y 250 palabras o más	Sí · No
DM2	Muy pocas vacilaciones	Sí · No
DM3	Relevante y coherente: postura, sin repetir ideas	Sí · No
DM4	Cohesivos y marcadores variados	Sí · No
DM5	Ideas desarrolladas con detalle; cambios de plano con soltura	Sí · No
Pronunciation		
PR1	Se entiende todo sin esfuerzo	Sí · No
PR2	Acento de palabra correcto, también en cognados	Sí · No
PR3	Sonidos claros: vocales, finales, -ed, s inicial	Sí · No
PR4	Entonación adecuada y ritmo con formas débiles	Sí · No
PR5	Acento contrastivo y entonación que realzan el significado	Sí · No

IC1	Inicio y respondo	Sí · No
IC2	Engarzo con lo que dice el otro antes de añadir	Sí · No
IC3	Invito, pregunto y apoyo, sin acaparar (*)	Sí · No
IC4	Negocio hacia un resultado en la Part 2	Sí · No
IC5	Amplío el alcance más allá de las fotos y las preguntas	Sí · No

SOLUCIONES

No hay una única respuesta correcta: estas soluciones dan ideas, lenguaje y modelos que apuntan a la banda 5. Los números de sección remiten a SPK_Teoria_v1.

Guion del MP3

Transcripción completa. Los silencios llevan entre corchetes lo que te tocaba hacer en ellos; las intervenciones del compañero van numeradas como en la tabla de la Part 2.

Minuto	Quién	Texto
0:08	Interlocutor	Good morning. My name is Sarah Hall, and this is my colleague, David Price. And your name is?
0:16		*[silencio · 4 s · tu nombre]*
0:20	Interlocutor	Thank you. First of all, we'd like to know something about you. Where do you live?
0:26		*[silencio · 15 s · tu respuesta]*
0:42	Interlocutor	And are you working or studying at the moment?
0:45		*[silencio · 15 s · tu respuesta]*
1:00	Interlocutor	How long have you lived in the place where you live now?
1:03		*[silencio · 30 s · tu respuesta]*
1:33	Interlocutor	Is there a piece of technology you couldn't live without?
1:37		*[silencio · 30 s · tu respuesta]*
2:07	Interlocutor	Would you describe yourself as an optimist or a pessimist?
2:11		*[silencio · 30 s · tu respuesta]*
2:41	Interlocutor	Thank you.
2:42	Interlocutor	Now, in this part of the test, you're going to do something together. Here are some pictures of people and nature in different situations.
2:52	Interlocutor	First, I'd like you to look at pictures A and E and talk together about what these pictures suggest about the relationship between people and wild animals. You have about a minute for this, so don't worry if I interrupt you.
3:08		*[silencio · 25 s · empiezas tú]*
3:33	**Compañero 1**	The fox looks completely at home, doesn't it? I'd guess it's been visiting that house for years. Whereas in the other one, people are queuing in their cars just to catch a glimpse of a wild animal. It's almost like a zoo in reverse.
3:50		*[silencio · 18 s · tu turno]*
4:08	Interlocutor	Thank you. Now look at all the pictures. I'd like you to imagine that a television company is making a documentary about whether people and nature can share the same space. These pictures are being considered for the opening sequence.
4:26	Interlocutor	Talk together about what each picture says about the relationship between people and the natural world. Then decide which picture would make the most powerful opening image. You have about three minutes to talk about this.
4:42		*[silencio · 25 s · empiezas tú]*
5:07	**Compañero 2**	For the opening, I'd go for the wind turbines next to the old barn. It shows the past and the future side by side, and that's really what the documentary is about.
5:19		*[silencio · 30 s · tu turno]*

Minuto	Quién	Texto
5:49	**Compañero 3**	Honestly, the rooftop garden is the answer to everything. If every building had one, our cities would be as green as the countryside within ten years!
5:59		*[silencio · 30 s · tu turno]*
6:29	**Compañero 4**	But surely the beekeeper isn't sharing anything with nature. He's just using the bees to make money, isn't he?
6:36		*[silencio · 30 s · tu turno]*
7:06	**Compañero 5**	Right, we really need to make a decision. I'm still going for the wind farm. What about you?
7:12		*[silencio · 30 s · tu turno: cerrad la decisión]*
7:42	Interlocutor	Thank you. Can I have the booklet, please?
7:46	Interlocutor	Now, in this part of the test, you're each going to talk on your own for about two minutes. You need to listen while your partner is speaking, because you'll be asked to comment afterwards.
7:59	Interlocutor	So, I'm going to give you a card with a question written on it, and I'd like you to tell us what you think. There are also some ideas on the card for you to use if you like. All right? Here is your card. It's card A. Remember, you have about two minutes to talk before we join in.
8:20		*[silencio · 10 s · preparas]*
8:30	Interlocutor	Would you like to begin now?
8:32		*[silencio · 120 s · long turn A]*
10:32	Interlocutor	Thank you.
10:33	Interlocutor	Do you think we rely too much on technology to solve our problems?
10:37		*[silencio · 45 s · pregunta de seguimiento]*
11:22	Interlocutor	Thank you.
11:23	Interlocutor	Now, it's your turn to be given a question. Here is your card. It's card B. Remember, you have about two minutes to tell us what you think, and there are some ideas on the card for you to use if you like. All right?
11:39		*[silencio · 10 s · preparas]*
11:49	Interlocutor	Would you like to begin now?
11:51		*[silencio · 120 s · long turn B]*
13:51	Interlocutor	Thank you.
13:52	Interlocutor	Is it fair that some people get the benefits of new technology long before others?
13:58		*[silencio · 45 s · pregunta de seguimiento]*
14:43	Interlocutor	Thank you.
14:43	Interlocutor	Now, to finish the test, we're going to talk about progress in general.
14:49	Interlocutor	In what ways is life better today than it was fifty years ago?
14:53		*[silencio · 40 s · tu respuesta]*
15:33	Interlocutor	Do you think people today are happier than previous generations?
15:38		*[silencio · 40 s · tu respuesta]*
16:18	Interlocutor	Is it possible to stop progress once it has started?
16:22		*[silencio · 40 s · tu respuesta]*
17:02	Interlocutor	Some people say that every solution creates a new problem. How much truth is there in this?

Minuto	Quién	Texto
17:08		*[silencio · 40 s · tu respuesta]*
17:48	Interlocutor	Who should decide which scientific research is allowed?
17:52		*[silencio · 40 s · tu respuesta]*
18:32	Interlocutor	What do you think future generations will see as the biggest mistake of our time?
18:38		*[silencio · 40 s · tu respuesta]*
19:18	Interlocutor	Thank you. That is the end of the test.

Part 1 · Respuestas posibles

Respuesta, razón o caso y matiz, en 20–30 segundos (§2).

Pregunta	Una respuesta posible
How long have you lived in the place where you live now?	About ten years — no, I tell a lie, it must be twelve now, because we moved just before I started secondary school. Long enough, anyway, to have seen most of the shops on my street change hands at least once.
Is there a piece of technology you couldn't live without?	I'd like to say no, but it would be my phone, obviously — not for the phone itself, but because it has quietly absorbed everything else: my maps, my music, my bank. Which is slightly alarming when you think about it.
Would you describe yourself as an optimist or a pessimist?	A cautious optimist, I suppose. I generally expect things to work out, but I like to know what I'd do if they didn't. A friend of mine calls that pessimism with good manners, and she may have a point.

Part 2 · Fase 1

Pregunta: What these pictures suggest about the relationship between people and wild animals (fotos A y E). Hay que especular, no describir (§5.2).

Foto	Qué se ve	Qué se puede especular
A	Un zorro cruza el umbral de una casa en plena ciudad.	Que viene a menudo y encuentra comida en la basura; que se mueve como si la calle fuera suya; que los vecinos lo toleran, o no lo saben.
E	Coches parados en una carretera de Yellowstone mientras unos osos pasan junto al arcén.	Que la gente quiere ver lo salvaje, pero sin bajarse del coche; que el animal se ha convertido en espectáculo; un zoo al revés.

Cómo puede sonar: The fox looks as though it's done this a hundred times — I suspect it knows the bins better than the people do. · What strikes me about picture E is that everyone wants to see a wild animal, but nobody seems prepared to get out of the car.

Part 2 · Fase 2

Contexto: I'd like you to imagine that a television company is making a documentary about whether people and nature can share the same space. These pictures are being considered for the opening sequence. Tarea: Talk together about what each picture says about the relationship between people and the natural world. Then decide which picture would make the most powerful opening image. Empieza fijando el criterio (§5.3).

Foto	Qué ofrece o qué dice	Para la decisión
A	La naturaleza que se adapta a nosotros sin pedir permiso.	A favor: inesperada e íntima; plantea la pregunta del documental. En contra: es un solo animal y un caso más bien anecdótico.
B	Naturaleza en la ciudad, pero diseñada y privada: ¿convivencia o decoración?	A favor: optimista y muy visual. En contra: es naturaleza domesticada, no compartida.
C	Energía limpia que transforma el paisaje: el campo como espacio de producción.	A favor: pasado y futuro en un plano. En contra: habla más de energía que de convivencia con la naturaleza.
D	Una relación de beneficio mutuo (polinización, miel) o de explotación, según se mire.	A favor: muestra cooperación concreta. En contra: es una actividad económica más que un espacio compartido.
E	La naturaleza como espectáculo, vista desde la máquina.	A favor: irónica y potente; resume la pregunta del documental. En contra: puede leerse como una simple anécdota turística.

Una decisión posible: E si el documental quiere abrir con una pregunta incómoda (miramos la naturaleza desde la máquina); A si prefiere abrir con la idea de que la naturaleza ya vive entre nosotros. B y C hablan más de diseño y de energía que de compartir espacio.

Lenguaje para esta tarea: It depends whether the opening should reassure people or unsettle them. · It's nature, but it's been tamed. · A and E are almost mirror images: … · If we had to settle on one, I'd go for the one that raises a question.

Las intervenciones del compañero

Cada intervención está pensada para provocar una reacción de §6. La reacción propuesta es una entre varias posibles: lo que cuenta es recoger lo que ha dicho antes de añadir lo tuyo (§6.2).

Nº	El compañero dice	Qué provoca	Una reacción posible
1	The fox looks completely at home, doesn't it? I'd guess it's been visiting that house for years. Whereas in the other one, people are queuing in their cars just to catch a glimpse of a wild animal. It's almost like a zoo in reverse.	Una imagen brillante (a zoo in reverse): recógela y desarróllala. §6.2 · §5.2	A zoo in reverse — I like that. And it works both ways: in picture A, the animal comes to us on its own terms, whereas in E we go to it and stay safely behind glass.
2	For the opening, I'd go for the wind turbines next to the old barn. It shows the past and the future side by side, and that's really what the documentary is about.	Una propuesta atractiva que se aleja un poco de la tarea: concede y reconduce al criterio. §6.3 · §6.4	I'll grant that it's a lovely image, but is the documentary really about energy? I thought it was about whether we can share space with other living things.
3	Honestly, the rooftop garden is the answer to everything. If every building had one, our cities would be as green as the countryside within ten years!	Una exageración: modérala con humor y un dato de sentido común. §6.4	Let's not get carried away. A few plants on a roof are lovely, but they're hardly a forest — and most of the people in that city will never set foot on one.

Nº	El compañero dice	Qué provoca	Una reacción posible
4	But surely the beekeeper isn't sharing anything with nature. He's just using the bees to make money, isn't he?	Un argumento con parte de razón: concédela y matiza. §6.3	I won't deny he makes a living out of them, but the bees get something too — and without people like him, a lot of crops would never be pollinated.
5	Right, we really need to make a decision. I'm still going for the wind farm. What about you?	Una postura firme al cierre: negocia o cierra el desacuerdo de forma explícita. §6.6 · §6.3	We may have to differ on that one. For me, the bear jam is the strongest opening, because it asks the question the whole documentary is about. Could we agree on that, with the turbines later on?

Part 3 · Tarjeta A

Is technological progress always a good thing? (health · work · relationships)

Decisión	Plan de diez segundos (§3.2)
Operación	Is … always: un juicio; el always pide matizar (§3.1).
Postura	No siempre: poder hacer más no equivale a vivir mejor.
Línea 1	La salud: el caso más claro a favor, pero con dilemas nuevos (health).
Línea 2	El trabajo y las relaciones: ganancias que traen costes ocultos (work, relationships).
Contrapunto	Rechazar la tecnología también tiene víctimas.
Cierre	El progreso es bueno cuando decidimos para qué sirve (idea propia).

LONG TURN MODELO · 277 PALABRAS · UNOS DOS MINUTOS A 145 PALABRAS POR MINUTO

1 The short answer, I think, is no — but not because technology is somehow bad. It's because the word 'progress' hides an assumption: that being able to do more automatically means living better. And those two things don't always go together. A new technology gives us options; whether our lives improve depends on what we do with them.

2 Health is the strongest case for progress, and I wouldn't want to argue with it. Vaccines, anaesthetics, antibiotics — it's hard to imagine anyone seriously wishing them away. But even here there are dilemmas we didn't have before. We can now keep people alive far longer than we can keep them well, and that raises questions that medicine on its own can't answer.

3 Work is a more mixed picture. Technology has taken a great deal of drudgery out of people's jobs, which is clearly a gain. At the same time, the tools that make us more efficient also make us easier to monitor and harder to switch off, so the time we save tends to be reclaimed in other ways. As for relationships, we're in contact with more people than ever, yet I'm not convinced the contact is any deeper. If anything, it may have become easier to keep people at a comfortable distance.

4 Admittedly, the alternative isn't very attractive either. Refusing new technology has its own victims, and they're usually the people who would have benefited most from it — the sick, the isolated, the very poor.

5 So, all things considered, I'd say progress is a good thing when we decide what it's for. The problem isn't the technology itself; it's the assumption that it will make those decisions for us.

Tramo	Tiempo	Qué hace y con qué recursos
1	0:00–0:24	Responde en la primera frase y desmonta el supuesto que esconde la pregunta. Escindida It's because … (§4.6).
2	0:24–0:49	Primera línea: concede el caso más fuerte y aun así encuentra un dilema (detalle, §4.1). I wouldn't want to argue with it, far longer than we can keep them well.
3	0:49–1:27	Segunda línea, con dos ideas de la tarjeta de signo mixto. At the same time, As for (§4.2), If anything (§4.3).
4	1:27–1:41	Contrapunto contra la propia postura: rechazar el progreso también tiene costes. Admittedly (§4.3).
5	1:41–1:55	Cierre que traslada el problema de la tecnología a quien decide. Escindida final The problem isn't …; it's … (§4.6).

Pregunta de seguimiento: Do you think we rely too much on technology to solve our problems? Enlaza con el cierre del long turn: confiamos en que la tecnología decida por nosotros; algunos problemas son políticos o sociales y no técnicos. (§3.7)

Part 3 · Tarjeta B

Who benefits most from progress? (the wealthy · the young · future generations)

Decisión	Plan de diez segundos (§3.2)
Operación	Who: comparar ganadores (y perdedores) a distintos plazos (§3.1, §3.5).
Postura	Depende del plazo: a corto, los que ya van por delante; a largo, casi todos, y sobre todo quienes aún no han nacido.
Línea 1	Los ricos y los formados: acceden antes y convierten la ventaja en más ventaja (the wealthy).
Línea 2	Los jóvenes: no tienen nada que desaprender; los mayores pierden el valor de su experiencia (the young).
Contrapunto	A largo plazo, los lujos se vuelven necesidades, pero también se heredan los costes (future generations).
Cierre	Por eso cuesta defender el progreso: los que más ganan no votan (idea propia).

LONG TURN MODELO · 296 PALABRAS · UNOS DOS MINUTOS A 145 PALABRAS POR MINUTO

1 I think the answer depends almost entirely on the time scale you choose. In the short term, progress tends to benefit the people who are already ahead; in the long term, it benefits almost everyone — and, oddly enough, the biggest winners are people who haven't been born yet.

2 In the short term, it's hard to argue with the idea that the wealthy gain most. New technologies are expensive at first, so the people who can afford them get them early, and they can often turn that head start into further advantage. The same is true of education: the better educated you are, the faster you can make use of something new. By the time a new technology reaches everyone, the people who had it first have often moved on to the next one.

3 The young are in a similar position, though for different reasons. They don't need to unlearn anything. For an older worker, a new technology can mean that thirty years of experience suddenly count for very little, whereas a twenty-year-old simply picks it up. It isn't that older people can't adapt; it's that adapting costs them more.

4 But if you take the longer view, the picture changes. Mobile phones started out as a status symbol for a few executives; now they're used by farmers and fishermen all over the world. Things that begin as luxuries tend to end up as necessities, and the people who inherit them get them almost for free — along with the costs, of course, such as the damage to the environment.

5 So, all things considered, I'd say progress benefits the future most and the present unevenly. And perhaps that's exactly why it's so hard to argue for: the people who stand to gain most aren't around to vote for it.

Tramo	Tiempo	Qué hace y con qué recursos
1	0:00–0:20	Responde con la variable que lo decide todo (el plazo) y anticipa la sorpresa final (§3.2, §3.5).
2	0:20–0:55	Primera línea, a corto plazo, con un mecanismo claro. it's hard to argue with the idea that, correlativa the better educated …, the faster … (§4.6).
3	0:55–1:18	Segunda línea, paralela pero con otra razón; los perdedores aparecen en el contraste. though for different reasons, whereas.
4	1:18–1:46	Giro a largo plazo con un caso que todos reconocen; el contrapunto va dentro (along with the costs, of course). But if you take the longer view (§4.2).
5	1:46–2:02	Cierre con una idea propia que explica una paradoja política. stand to gain (§4.6).

Pregunta de seguimiento: Is it fair that some people get the benefits of new technology long before others? Parece injusto, pero el precio alto de los primeros usuarios financia que luego baje para todos; la cuestión es cuánto dura el desfase en salud o educación. (§3.7)

Part 3 · Discusión: progress

Respuestas de 30–45 segundos: postura, razón y caso, sin convertirlas en otro long turn (§6.7).

Pregunta	Ideas	Cómo puede sonar
In what ways is life better today than it was fifty years ago?	Salud, esperanza de vida, acceso a información y a viajar; matiza con lo que se ha perdido (estabilidad laboral, vivienda asequible en muchos sitios). §3.5	In most measurable ways, it clearly is — though some of the things that are harder to measure may have got worse.
Do you think people today are happier than previous generations?	Más comodidad no implica más felicidad: las expectativas suben con las posibilidades; la comparación constante resta. §4.6	I suspect we're more comfortable rather than happier, partly because our expectations rise with everything we gain.
Is it possible to stop progress once it has started?	Detenerlo, rara vez; orientarlo y ralentizarlo, sí (regulación, moratorias, prohibiciones internacionales). §4.3	Stop it, probably not. Steer it, yes — and if anything, that's the more useful question.
Some people say that every solution creates a new problem. How much truth is there in this?	Bastante: los antibióticos y las resistencias, el coche y la contaminación; pero los nuevos problemas suelen ser menores que los que se resolvieron. §6.7 · §6.3	There's a good deal of truth in it, but the new problems are usually smaller than the ones they replaced.
Who should decide which scientific research is allowed?	Ni solo los científicos (interés propio) ni solo los políticos (falta de conocimiento): organismos mixtos, con la sociedad informada. §3.5	I wouldn't want to leave it entirely to scientists, or entirely to politicians, for that matter.
What do you think future generations will see as the biggest mistake of our time?	Es especulativa: gana tiempo con contenido y elige un candidato (el clima, la atención, la desigualdad) con una razón. §4.4	That's a difficult one to call, but my guess would be the way we treated the environment as someone else's problem.
