LST-P2 · PRÁCTICA 04

Sentence completion

Hoja 04 · Rectificaciones, causa frente a forma, realidad frente a mapa · dificultad 4 de 4

9 preguntas (7–15) · 1 punto por pregunta · audio: LST-P2_Practica_04.mp3 · el monólogo suena dos veces, con las pausas del examen · sin consultar la teoría

You will hear a map historian called Ruth Galbraith giving a talk about mistakes on maps. For questions 7–15, complete the sentences with a word or short phrase.

Mistakes on maps

The speaker sees a map less as a depiction of a place than as an ___7___ about it.

Brasil first appeared on charts because a mapmaker borrowed it from a ___8___.

The island was finally removed from charts after a ___9___ failed to find it.

Invented details that let mapmakers prove their work has been copied are known as ___10___.

Some time later, a ___11___ built where the invented hamlet was supposed to be took its name.

Land that Europeans had not surveyed was frequently shown on maps as ___12___.

More and more of this information is now provided by ___13___ editing maps without payment.

Brasil's recent reappearance on a digital map turned out to be the result of a ___14___.

The speaker confesses that, despite the explanation, she found the episode ___15___.

Hoja de respuestas

Escribe las palabras que oyes, sin cambiarlas, y comprueba que encajan en la frase y que están bien escritas. 1 punto por respuesta correcta. En el examen en papel: mayúsculas, una letra por casilla.

Nº	Respuesta	Puntos
7		/ 1
8		/ 1
9		/ 1
10		/ 1
11		/ 1
12		/ 1
13		/ 1
14		/ 1
15		/ 1
	Total	**/ 9**

SOLUCIONES

1 punto por respuesta correcta y bien escrita. La clave sigue la convención de Cambridge: las palabras entre paréntesis son opcionales y la barra separa alternativas. Debajo de cada respuesta van las que no valen: candidatos que se oyen pero no cumplen la condición de la frase (§6.3), formas que no encajan o palabras que no se oyen (§6.4) y errores de ortografía (§6.5). Los números de sección remiten a LST_Teoria_v1.

Transcripción

Voz · Molly, inglés neozelandés

When I tell people I study mistakes on maps, they usually assume I mean the famous howlers – California drawn as an island, which it was for more than a century, or mountain ranges that turned out not to exist. Those are fun, and I'll come back to one of them. But what interests me more is why errors survive. A map isn't just a picture of a place; **it's an argument about it** [7], and once an error has been printed, it acquires a kind of authority that's remarkably hard to dislodge.

Take the so-called phantom islands. For several hundred years, charts of the North Atlantic showed an island called Brasil off the west coast of Ireland. Some versions even marked a harbour on it. Nobody had ever landed there. It appeared because an early mapmaker **took it from a sailors' legend** [8], and every mapmaker after him copied it from the map before. It wasn't finally removed until the eighteen-sixties – not because anyone proved it didn't exist, but because **a survey ship simply failed to find it** [9].

Then there are errors that are put there on purpose. Mapmakers have long inserted tiny fictions into their work – a street that doesn't exist, or a village with an invented name – so that if a rival copies the map, the copying can be proved. **They're known as trap streets** [10], and they still turn up today, even on some digital maps. My favourite is a hamlet in New York State that was invented for exactly this reason in the nineteen-thirties. Years later, a petrol station – no, I tell a lie, **a general store** [11] – was built at the spot, the owners named it after the hamlet on the map, and so, for a while, the fiction became real.

Not every error is so harmless. In the colonial period, maps often marked areas that Europeans hadn't **surveyed as empty** [12], when of course they weren't empty at all; they were simply unknown to the people drawing the map. The maps weren't lying, exactly. They were recording ignorance as if it were fact. And those supposedly empty spaces were then used to justify claims to land that people were already living on.

Today, of course, most of us use maps on our phones, and you might think satellites had solved the problem. They haven't, quite. Satellite images are excellent at showing what's there, but hopeless at showing what things are called, who they belong to, or which of two roads is passable in winter. If you've ever followed your phone down a farm track that turned out to be a riverbed, you'll know what I mean. That kind of information still has to come from somewhere, and **increasingly it comes from volunteers** [13] who edit online maps in their spare time. They do remarkable work, but they make mistakes, they copy each other's mistakes, and occasionally, like the mapmakers before them, they make mistakes on purpose.

Which brings me back to Brasil. A few years ago, a researcher noticed it on a digital map of the Atlantic – a single pixel, sitting exactly where the old charts had put it. **It turned out to be a glitch in the data** [14], nothing more mysterious than that, and it was corrected within a week. All the same, I must admit **I found it rather moving** [15]. Five hundred years after sailors first told stories about it, the island had found its way back on to the map. Mapmakers, it seems, aren't the only ones who find mistakes hard to let go of.

Explicaciones

7 • argument

Frase: The speaker sees a map less as a depiction of a place than as an **argument** about it.

Se oye: it's an argument about it

Se acepta: argument

A map isn't just a picture of a place; it's an argument about it. En el papel, less as … than as reformula isn't just … it's.

No vale authority (candidato §6.3). Es lo que adquiere un error una vez impreso, no lo que es un mapa; además no encaja con about it.

No vale opinion (sinónimo §6.4). No es lo que se oye.

Teoría: §6.3 Varios candidatos para un mismo hueco · §6.2 Los 45 segundos: predecir cada hueco

8 • (sailors') legend / (sailor's) legend / (sailors) legend

Frase: Brasil first appeared on charts because a mapmaker borrowed it from a **sailors' legend**.

Se oye: took it from a sailors' legend

Se acepta: sailors' legend · legend · sailor's legend · sailors legend

El primer cartógrafo lo sacó de una leyenda: an early mapmaker took it from a sailors' legend. El apóstrofo no se oye, así que valen las tres grafías, y también legend solo.

No vale map (candidato §6.3). Es de donde lo copiaron los cartógrafos posteriores (copied it from the map before); la frase pregunta por su primera aparición (first appeared).

Teoría: §6.3 Varios candidatos para un mismo hueco · §6.4 Qué se escribe

9 • (survey) ship

Frase: The island was finally removed from charts after a **survey ship** failed to find it.

Se oye: a survey ship simply failed to find it

Se acepta: survey ship · ship

No lo retiró una prueba, sino un fracaso: not because anyone proved it didn't exist, but because a survey ship simply failed to find it.

No vale boat (sinónimo §6.4). No es lo que se oye.

No vale mapmaker (candidato §6.3). Los cartógrafos lo copiaron; no fueron ellos quienes lo buscaron.

Teoría: §6.4 Qué se escribe · §2.3 Señales del discurso oral

10 • trap streets

Frase: Invented details that let mapmakers prove their work has been copied are known as **trap streets**.

Se oye: They're known as trap streets

Se acepta: trap streets

Describe qué son (tiny fictions) y después les da nombre: They're known as trap streets. La frase pide el nombre.

No vale fictions (candidato §6.3). Es la descripción, no el nombre.

No vale trap street (forma §6.4). El sujeto es plural (Invented details).

No vale traps (incompleta §6.4). No es lo que se oye.

Teoría: §6.4 Qué se escribe · §6.3 Varios candidatos para un mismo hueco

11 • (general) store

Frase: Some time later, a **general store** built where the invented hamlet was supposed to be took its name.

Se oye: a general store

Se acepta: general store · store

La hablante se corrige a sí misma: a petrol station – no, I tell a lie, a general store. Vale la segunda versión (§2.3).

No vale petrol station (candidato §6.3). Lo dice primero y lo retira con no, I tell a lie.

No vale shop (sinónimo §6.4). No es lo que se oye.

Teoría: §2.3 Señales del discurso oral · §6.3 Varios candidatos para un mismo hueco

12 • empty

Frase: Land that Europeans had not surveyed was frequently shown on maps as **empty**.

Se oye: surveyed as empty

Se acepta: empty

Lo que no se había explorado aparecía vacío: maps often marked areas that Europeans hadn't surveyed as empty. La frase pregunta cómo aparecían en el mapa, no cómo eran en realidad.

No vale unknown (candidato §6.3). Es lo que eran para quien dibujaba (they were simply unknown to the people drawing the map), no cómo figuraban en el mapa.

Teoría: §6.3 Varios candidatos para un mismo hueco · §3.1 Lo que se dice y lo que se da a entender

13 • volunteers

Frase: More and more of this information is now provided by **volunteers** editing maps without payment.

Se oye: increasingly it comes from volunteers

Se acepta: volunteers

La información viene cada vez más de voluntarios: increasingly it comes from volunteers who edit online maps in their spare time. En el papel, More and more reformula increasingly.

No vale satellites (candidato §6.3). No dan esa información: hopeless at showing what things are called.

No vale mapmakers (candidato §6.3). Se mencionan como comparación (like the mapmakers before them).

Teoría: §6.3 Varios candidatos para un mismo hueco

14 • glitch (in the data)

Frase: Brasil's recent reappearance on a digital map turned out to be the result of a **glitch in the data**.

Se oye: It turned out to be a glitch in the data

Se acepta: glitch in the data · glitch

La isla apareció como un píxel, pero la causa fue otra: It turned out to be a glitch in the data. Se acepta con o sin in the data.

No vale pixel (candidato §6.3). Es la forma en que apareció (a single pixel), no la causa.

No vale error (sinónimo §6.4). No es lo que se oye en ese punto, y además no encaja tras a.

Teoría: §6.3 Varios candidatos para un mismo hueco · §6.2 Los 45 segundos: predecir cada hueco

15 • (rather) moving

Frase: The speaker confesses that, despite the explanation, she found the episode **rather moving**.

Se oye: I found it rather moving

Se acepta: rather moving · moving

Primero niega el misterio (nothing more mysterious than that) y luego concede: All the same, I must admit I found it rather moving.

No vale mysterious (candidato §6.3). Lo niega: nothing more mysterious than that.

No vale moved (forma §6.4). No encaja tras found the episode.

Teoría: §6.3 Varios candidatos para un mismo hueco · §2.3 Señales del discurso oral
