LST-P3 · PRÁCTICA 02

Interview or conversation

Hoja 02 · Debate con dos invitados, acuerdo parcial y pregunta global · dificultad 2 de 4

5 preguntas (16–20) · 1 punto por pregunta · audio: LST-P3_Practica_02.mp3 · la grabación suena dos veces, con las pausas del examen · sin consultar la teoría

You will hear part of a radio discussion in which Tom Ashby, who runs beekeeping courses, and Priya Nair, an ecologist, talk about keeping bees in cities. For questions 16–20, choose the answer (**A**, **B**, **C** or **D**) which fits best according to what you hear.

16 What does Tom say about many of the people who take up beekeeping?

A They are motivated by concern about where their food comes from.
B They underestimate how much work it involves.
C They tend to keep more hives than they can manage.
D They are usually put off by the risk of being stung.

17 According to Priya, the main problem with urban beekeeping is that

A honeybees can pass diseases on to wild bees.
B hives are often kept in unsuitable places such as rooftops.
C most beekeepers know very little about wild bees.
D wild bees may not find enough food.

18 How does Tom react to Priya's argument about wild bees?

A He dismisses it as an exaggeration.
B He questions the research it is based on.
C He accepts it, admitting a mistake of his own.
D He agrees with both her argument and her proposed solution.

19 Tom and Priya agree that

A planting flowers would help bees more than keeping hives.
B new hives should require official permission.
C companies keep hives mainly to improve their image.
D councils should be responsible for creating wildflower meadows.

20 Which of the following best sums up the view of urban beekeeping that emerges from the discussion?

A It should be discouraged in densely populated areas.
B Its environmental benefits have been overstated.
C It is a passing fashion that will soon decline.
D Its future depends on stricter regulation.

Hoja de respuestas

Marca una sola letra por pregunta. Al corregir, 1 punto por acierto; los errores no restan. En el examen en papel se responde en el cuadernillo y al final hay 5 minutos para pasar las respuestas a la hoja.

Nº	A	B	C	D	Puntos
16	A	B	C	D	/ 1
17	A	B	C	D	/ 1
18	A	B	C	D	/ 1
19	A	B	C	D	/ 1
20	A	B	C	D	/ 1
				Total	**/ 5**

SOLUCIONES

1 punto por acierto. Primero la clave rápida; después, la transcripción completa con la frase que da cada respuesta en negrita y el número de la pregunta; por último, por qué la clave es correcta y por qué falla cada distractor, con su tipo (§4) y la cita que lo descarta. Los números de sección remiten a LST_Teoria_v1.

Transcripción

You will hear part of a radio discussion in which Tom Ashby, who runs beekeeping courses, and Priya Nair, an ecologist, talk about keeping bees in cities.

Voces · Presenter: Libby, inglés británico · Tom: Connor, inglés irlandés · Priya: Natasha, inglés australiano

Presenter Urban beekeeping has never been more popular. There are hives on office roofs, in school grounds, even on top of department stores. With me are Tom Ashby, who runs beekeeping courses, and the ecologist Priya Nair. Tom, is the boom good news?

Tom Mostly, yes. It's got people thinking about where their food comes from, which can't be bad. But I'll be honest – it isn't quite the success story it looks like from the outside. A lot of people sign up for a course because they've seen a hive on television and it looks rather charming. **Then they discover that bees need checking every week**[16] right through the summer, that they swarm, that they get ill. Half the people I train have given up within a couple of years. **They think it's like keeping a goldfish.**[16]

Presenter Priya, you've been rather more critical of the trend.

Priya I have, although I should say I've nothing against beekeepers – Tom's courses sound excellent. People often assume my worry is disease, and honeybees can pass infections on to wild bees, that's true. But it's not what keeps me up at night. **The real issue is food.**[17] A city only has so many flowers, and a single hive can hold fifty thousand bees, all foraging for pollen and nectar. Honeybees will visit almost anything, whereas many wild species depend on just a handful of plants. Our wild bees – and there are over two hundred species in this country – are competing for the same flowers, and **in the busiest parts of some cities they're simply losing**[17].

Presenter Tom, how do you respond to that?

Tom I'd love to tell you she's wrong. I've read the studies, though, and I can't, not entirely. When I started, I had six hives in a garden the size of a tennis court, and I was rather proud of it. Looking back, that was far too many for the area – **I simply didn't think about what else was living there**[18]. **So yes, I accept the basic point.**[18] Where I part company with Priya is on what we do about it.

Priya I've suggested that new hives should need a licence, so that councils can keep track of how many there are in any given area.

Tom	And I think that would be a bureaucratic nightmare. Who'd do the checking? Half the councils I know can't even empty the bins on time.
Priya	Well, we may have to differ on that one. But I think we'd both say that **the most useful thing anyone can do for bees isn't adding hives at all** [19].
Tom	**Absolutely. If a company really wants to help, it should plant flowers** [19] – lots of them, and a mixture that blooms from spring right through to autumn. A hive on the roof makes a nice photograph for the annual report. A wildflower meadow round the back actually feeds something. And it needn't be anything grand – even a few window boxes on a balcony make a difference.
Presenter	So, is urban beekeeping something to be encouraged or not?
Priya	It's not that it's a bad hobby. It's more that **people have been told it's saving the bees, and the picture is a good deal more complicated than that** [20].
Tom	I'd go along with that. I still love my bees. But I tell everyone on my courses now: **you're doing this for yourself, not for the planet** [20].

Explicaciones

16 · B · Detalle

Pregunta: What does Tom say about many of the people who take up beekeeping?

A They are motivated by concern about where their food comes from.
Falla (lógica alterada §4.6). Pensar en el origen de los alimentos es un efecto del auge (It's got people thinking about where their food comes from), no lo que mueve a los alumnos: a ellos los atrae una colmena que looks rather charming.

B They underestimate how much work it involves.
Correcta. Se apuntan porque la colmena parece bonita en televisión y luego descubren el trabajo: Then they discover that bees need checking every week. La comparación lo resume: They think it's like keeping a goldfish.

C They tend to keep more hives than they can manage.
Falla (no responde §4.3). El exceso de colmenas es un error del propio Tom (I had six hives), y además no era un problema de manejo sino de espacio. No habla de sus alumnos.

D They are usually put off by the risk of being stung.
Falla (ausente §4.8). Muchos abandonan, pero por el trabajo y las enfermedades. Nadie menciona las picaduras.

Teoría: §7.1 Part 3: la tarea · §3.1 Lo que se dice y lo que se da a entender

17 · D · Actitud y opinión

Pregunta: According to Priya, the main problem with urban beekeeping is that

A honeybees can pass diseases on to wild bees.
Falla (mencionado y descartado §4.2). Lo admite (that's true) y lo deja de lado: But it's not what keeps me up at night.

B hives are often kept in unsuitable places such as rooftops.
Falla (eco léxico §4.1, ausente §4.8). Las azoteas las menciona el presentador al describir el auge (hives on office roofs). Nadie dice que sean un mal sitio.

C most beekeepers know very little about wild bees.
Falla (ausente §4.8). Priya no critica a los apicultores (I've nothing against beekeepers) ni habla de lo que saben.

D wild bees may not find enough food.
Correcta. Primero descarta la enfermedad y después lo dice con la señal The real issue is food. Las abejas silvestres compiten por las mismas flores y in the busiest parts of some cities they're simply losing.

Teoría: §3.3 La segunda idea manda · §2.3 Señales del discurso oral · §4.2 Mencionado y descartado

18 · C · Actitud y opinión

Pregunta: How does Tom react to Priya's argument about wild bees?

A He dismisses it as an exaggeration.
Falla (mencionado y descartado §4.2). Dice que le gustaría hacerlo, y a continuación explica que no puede: I'd love to tell you she's wrong. … and I can't, not entirely.

B He questions the research it is based on.
Falla (eco léxico §4.1). Recoge I've read the studies, pero los estudios son precisamente lo que le impide negarlo.

C He accepts it, admitting a mistake of his own.
Correcta. Le gustaría llevarle la contraria y no puede: reconoce su propio error (that was far too many for the area – I simply didn't think about what else was living there) y concluye So yes, I accept the basic point.

D He agrees with both her argument and her proposed solution.
Falla (grado y alcance §4.5). Acepta el argumento, no la solución: Where I part company with Priya is on what we do about it.

Teoría: §2.4 Matización · §3.6 Acuerdo y desacuerdo entre hablantes · §7.3 Seguir a dos voces

19 · A · Acuerdo

Pregunta: Tom and Priya agree that

A planting flowers would help bees more than keeping hives.
Correcta. Priya: the most useful thing anyone can do for bees isn't adding hives at all. Tom lo suscribe sin reservas y lo concreta: Absolutely. If a company really wants to help, it should plant flowers (§3.6, acuerdo pleno).

B new hives should require official permission.
Falla (voz equivocada §4.4). Es la propuesta de Priya, y Tom la rechaza: a bureaucratic nightmare. Ella misma reconoce el desacuerdo: we may have to differ on that one.

C companies keep hives mainly to improve their image.
Falla (voz equivocada §4.4). Lo insinúa solo Tom, con ironía: A hive on the roof makes a nice photograph for the annual report. Priya no dice nada parecido.

D councils should be responsible for creating wildflower meadows.
Falla (eco léxico §4.1, ausente §4.8). Junta dos palabras que se oyen: councils, a propósito de las licencias, y A wildflower meadow, que Tom propone a las empresas. Nadie asigna esa tarea a los ayuntamientos.

Teoría: §3.6 Acuerdo y desacuerdo entre hablantes · §7.3 Seguir a dos voces

20 · B · Global

Pregunta: Which of the following best sums up the view of urban beekeeping that emerges from the discussion?

A It should be discouraged in densely populated areas.
Falla (grado y alcance §4.5). Va más lejos que Priya, que lo niega expresamente: It's not that it's a bad hobby.

B Its environmental benefits have been overstated.
Correcta. Es la idea que recorre todo el debate (el auge no es the success story it looks like, las abejas silvestres pierden la competencia) y la que cierran los dos: Priya, people have been told it's saving the bees, and the picture is a good deal more complicated than that; Tom, you're doing this for yourself, not for the planet.

C It is a passing fashion that will soon decline.
Falla (grado y alcance §4.5, ausente §4.8). Tom dice que la mitad de sus alumnos abandona, no que la afición vaya a desaparecer; el programa empieza diciendo que has never been more popular.

D Its future depends on stricter regulation.
Falla (voz equivocada §4.4). La licencia es solo la propuesta de Priya, que Tom rechaza; no es una conclusión compartida ni el centro del debate.

Teoría: §7.1 Part 3: la tarea · §7.2 Part 3: método · §3.3 La segunda idea manda
