SPK · PRÁCTICA 06

Speaking test completo

Hoja 06 · Part 2: el azar y la elección · Part 3: el azar · dificultad 6 de 6

Unos 19 minutos con el MP3 SPK_Practica_06.mp3 · sin consultar la teoría

Cómo hacer el test

1. Ten delante solo el material del candidato (págs. 2 y 3). Las preguntas de la Part 1, las instrucciones de la Part 2 y las de la discusión solo se oyen.
2. Pon a grabar el móvil y reproduce el MP3 de principio a fin, sin pausar. Los silencios están cronometrados; el Thank you del interlocutor marca el final de cada respuesta.
3. Part 2: empiezas tú cada fase. El compañero interviene en momentos fijos y no te escucha (§1.4): habla unos 20 segundos por turno y reacciona a lo que dice cuando termine.
4. Part 3: respondes las dos tarjetas y las dos preguntas de seguimiento, y luego las seis de la discusión.
5. Al día siguiente, corrige con la hoja de autocorrección y solo después mira las soluciones (§8.1).

Part 3 · Tarjetas

TARJETA A

How far are people's lives shaped by chance rather than choice?

- birth
- luck
- decisions

TARJETA B

Why do people find uncertainty so difficult to live with?

- control
- fear
- planning

En el examen cada candidato recibe solo su tarjeta. Aquí haces las dos, una detrás de otra.

Hoja de autocorrección

Escucha la grabación al día siguiente y marca la rúbrica antes de mirar las soluciones (preguntas completas en SPK_Teoria_v1 §8.2). Nota por criterio: 5 las cinco sí · 4 sí a las cuatro primeras · 3 falla una de las cuatro primeras · 2 fallan dos · 1 fallan tres o cuatro. GA: la fila de §8.2 que mejor describa un minuto cualquiera de la Part 3. (*) IC3 solo se valora del todo con un compañero real.

Dato	Tu resultado
Long turn A: palabras transcritas y duración	_____ palabras · ____:____ (objetivo: 250+ · 2:00)
Long turn B: palabras transcritas y duración	_____ palabras · ____:____ (objetivo: 250+ · 2:00)
Part 2: ¿llegaste a una decisión negociada?	Sí · No
Part 2: reacciones al compañero que recogían lo que había dicho	____ / 5
Notas (§8.2–8.3)	GR __ · LR __ · DM __ · PR __ · IC __ · GA __ · **total __ / 30**

Código	Pregunta	
Grammatical Resource		
GR1	Variedad de estructuras complejas, no solo frases simples	Sí · No
GR2	Errores solo como despistes, no sistemáticos	Sí · No
GR3	Ningún error dificulta la comprensión	Sí · No
GR4	Estructuras complejas en todo el test, también en la interacción	Sí · No
GR5	Gramática flexible: enfatizar, matizar, deshacer ambigüedades	Sí · No
Lexical Resource		
LR1	Palabras precisas ante lo abstracto, sin vaguedades	Sí · No
LR2	Colocaciones adecuadas, sin calcos ni falsos amigos	Sí · No
LR3	Paráfrasis sin cortar cuando falta una palabra	Sí · No
LR4	Variedad: sin repetir los mismos términos	Sí · No
LR5	Léxico menos común preciso y natural	Sí · No
Discourse Management		
DM1	Long turns de unos dos minutos y 250 palabras o más	Sí · No
DM2	Muy pocas vacilaciones	Sí · No
DM3	Relevante y coherente: postura, sin repetir ideas	Sí · No
DM4	Cohesivos y marcadores variados	Sí · No
DM5	Ideas desarrolladas con detalle; cambios de plano con soltura	Sí · No
Pronunciation		
PR1	Se entiende todo sin esfuerzo	Sí · No
PR2	Acento de palabra correcto, también en cognados	Sí · No
PR3	Sonidos claros: vocales, finales, -ed, s inicial	Sí · No
PR4	Entonación adecuada y ritmo con formas débiles	Sí · No
PR5	Acento contrastivo y entonación que realzan el significado	Sí · No
Interactive Communication		
IC1	Inicio y respondo	Sí · No
IC2	Engarzo con lo que dice el otro antes de añadir	Sí · No
IC3	Invito, pregunto y apoyo, sin acaparar (*)	Sí · No
IC4	Negocio hacia un resultado en la Part 2	Sí · No
IC5	Amplío el alcance más allá de las fotos y las preguntas	Sí · No

SOLUCIONES

No hay una única respuesta correcta: estas soluciones dan ideas, lenguaje y modelos que apuntan a la banda 5. Los números de sección remiten a SPK_Teoria_v1.

Guion del MP3

Transcripción completa. Los silencios llevan entre corchetes lo que te tocaba hacer en ellos; las intervenciones del compañero van numeradas como en la tabla de la Part 2.

Minuto	Quién	Texto
0:08	Interlocutor	Good morning. My name is Sarah Hall, and this is my colleague, David Price. And your name is?
0:16		*[silencio · 4 s · tu nombre]*
0:20	Interlocutor	Thank you. First of all, we'd like to know something about you. Where do you live?
0:27		*[silencio · 15 s · tu respuesta]*
0:42	Interlocutor	And are you working or studying at the moment?
0:45		*[silencio · 15 s · tu respuesta]*
1:00	Interlocutor	Do you consider yourself a lucky person?
1:03		*[silencio · 30 s · tu respuesta]*
1:33	Interlocutor	How do you usually make important decisions?
1:37		*[silencio · 30 s · tu respuesta]*
2:07	Interlocutor	What would you do with a completely free year?
2:10		*[silencio · 30 s · tu respuesta]*
2:40	Interlocutor	Thank you.
2:41	Interlocutor	Now, in this part of the test, you're going to do something together. Here are some pictures of situations involving chance and choice.
2:51	Interlocutor	First, I'd like you to look at pictures A and E and talk together about why people might choose to leave things to chance in these situations. You have about a minute for this, so don't worry if I interrupt you.
3:06		*[silencio · 25 s · empiezas tú]*
3:31	**Compañero 1**	The coin toss is interesting, isn't it? Nobody's gambling anything there. They use chance precisely because it's fair. The casino's the opposite. Those men think they can beat the odds, which is exactly why they'll lose.
3:45		*[silencio · 21 s · tu turno]*
4:06	Interlocutor	Thank you. Now look at all the pictures. I'd like you to imagine that a publisher is bringing out a book about the part that chance plays in our lives. These pictures are being considered for the cover.
4:22	Interlocutor	Talk together about what each picture suggests about the relationship between chance and choice. Then decide which picture would make the most thought-provoking cover. You have about three minutes to talk about this.
4:38		*[silencio · 25 s · empiezas tú]*
5:02	**Compañero 2**	For the cover, I'd go for the scientist. So many great discoveries happened by accident, and that's really the most fascinating side of chance.
5:12		*[silencio · 30 s · tu turno]*

Minuto	Quién	Texto
5:41	**Compañero 3**	Actually, forget the others. The lightning says it all. Life is completely random, and nothing we decide makes the slightest difference.
5:50		*[silencio · 30 s · tu turno]*
6:19	**Compañero 4**	I suppose you're one of those people who believes everyone makes their own luck? That hard work is all it takes?
6:27		*[silencio · 30 s · tu turno]*
6:57	**Compañero 5**	We're running out of time. I'd still choose the fork in the road. It's the only picture where a choice is actually being made. What do you say?
7:08		*[silencio · 30 s · tu turno: cerrad la decisión]*
7:37	Interlocutor	Thank you. Can I have the booklet, please?
7:41	Interlocutor	Now, in this part of the test, you're each going to talk on your own for about two minutes. You need to listen while your partner is speaking, because you'll be asked to comment afterwards.
7:55	Interlocutor	So, I'm going to give you a card with a question written on it, and I'd like you to tell us what you think. There are also some ideas on the card for you to use if you like. All right? Here is your card. It's card A. Remember, you have about two minutes to talk before we join in.
8:16		*[silencio · 10 s · preparas]*
8:26	Interlocutor	Would you like to begin now?
8:28		*[silencio · 120 s · long turn A]*
10:28	Interlocutor	Thank you.
10:29	Interlocutor	Is it fair that some people are born with far more advantages than others?
10:34		*[silencio · 45 s · pregunta de seguimiento]*
11:19	Interlocutor	Thank you.
11:20	Interlocutor	Now, it's your turn to be given a question. Here is your card. It's card B. Remember, you have about two minutes to tell us what you think, and there are some ideas on the card for you to use if you like. All right?
11:37		*[silencio · 10 s · preparas]*
11:47	Interlocutor	Would you like to begin now?
11:48		*[silencio · 120 s · long turn B]*
13:48	Interlocutor	Thank you.
13:49	Interlocutor	Do you think it's possible to plan too much?
13:52		*[silencio · 45 s · pregunta de seguimiento]*
14:37	Interlocutor	Thank you.
14:38	Interlocutor	Now, to finish the test, we're going to talk about chance in general.
14:43	Interlocutor	Should important decisions ever be left to chance?
14:47		*[silencio · 40 s · tu respuesta]*
15:27	Interlocutor	Some people say that we make our own luck. How much truth is there in this?
15:33		*[silencio · 40 s · tu respuesta]*
16:13	Interlocutor	Why do you think people believe in fate?
16:16		*[silencio · 40 s · tu respuesta]*
16:56	Interlocutor	How important have accidents been in the history of science?

Minuto	Quién	Texto
17:00		*[silencio · 40 s · tu respuesta]*
17:40	Interlocutor	Can we ever really predict the future?
17:43		*[silencio · 40 s · tu respuesta]*
18:23	Interlocutor	If you could know exactly how your life would turn out, would you want to?
18:28		*[silencio · 40 s · tu respuesta]*
19:08	Interlocutor	Thank you. That is the end of the test.

Part 1 · Respuestas posibles

Respuesta, razón o caso y matiz, en 20–30 segundos (§2).

Pregunta	Una respuesta posible
Do you consider yourself a lucky person?	In the things that matter most, yes — I was born somewhere peaceful, into a family that valued education, and I chose neither of those. In the small things, though, I'm spectacularly unlucky: if one train is cancelled all week, it's mine.
How do you usually make important decisions?	Slowly, I'm afraid. I tend to make a list of pros and cons and then, rather annoyingly, ignore it and go with my instinct. I've come to think the list is useful mainly because it tells me what my instinct actually is.
What would you do with a completely free year?	I'd probably spend the first month sleeping and the next eleven feeling guilty about it. Seriously, though, I'd like to learn a language from scratch somewhere I couldn't get by in English, partly to see how much of my personality survives in another language.

Part 2 · Fase 1

Pregunta: Why people might choose to leave things to chance in these situations (fotos A y E). Hay que especular, no describir (§5.2).

Foto	Qué se ve	Qué se puede especular
A	Un árbitro lanza una moneda ante dos capitanas antes de un partido de fútbol femenino de los años cuarenta.	Que recurren al azar porque es justo: nadie puede quejarse del resultado; que es un rito previo al partido; que ninguna de las dos controla nada.
E	Una sala de juego antigua: hombres alrededor de una ruleta.	Que creen que pueden ganar a la suerte; que el casino es el único que controla las probabilidades; que hay algo de rito y de autoengaño.

Cómo puede sonar: In picture A, I imagine they toss a coin precisely because nobody can argue with it — it's chance used as a kind of fairness. · The men round the roulette wheel, on the other hand, presumably think they can beat the odds, which is a very different relationship with chance.

Part 2 · Fase 2

Contexto: I'd like you to imagine that a publisher is bringing out a book about the part that chance plays in our lives. These pictures are being considered for the cover. Tarea: Talk together about what each picture suggests about the relationship between chance and choice. Then decide which picture would make the most thought-provoking cover. Empieza fijando el criterio (§5.3).

Foto	Qué ofrece o qué dice	Para la decisión
A	El azar como mecanismo de justicia: se usa precisamente porque nadie lo controla.	A favor: idea clara y poco obvia. En contra: foto antigua y discreta para una portada.
B	La casualidad en el descubrimiento (la penicilina): el azar que solo aprovecha quien está preparado.	A favor: la idea más rica. En contra: sin explicación, el lector ve ciencia, no azar.
C	El azar puro, el que nadie decide: la naturaleza como lotería.	A favor: espectacular. En contra: más dramática que reflexiva; sugiere que todo es azar.
D	La elección: decidir sin saber adónde lleva cada camino.	A favor: equilibra azar y elección. En contra: metáfora muy gastada.
E	El azar como espectáculo y como negocio: la ilusión de control.	A favor: mucha historia. En contra: reduce el azar al juego.

Una decisión posible: B si se busca una portada que haga pensar (azar y preparación); D si el libro equilibra azar y elección; A como opción original. C es la tentación: espectacular, pero da a entender que todo es azar.

Lenguaje para esta tarea: It depends whether the book argues that chance can be tamed or not. · It's striking, but it rather gives the game away. · It works on two levels: … · Thought-provoking, yes — but would anyone pick it up?

Las intervenciones del compañero

Cada intervención está pensada para provocar una reacción de §6. La reacción propuesta es una entre varias posibles: lo que cuenta es recoger lo que ha dicho antes de añadir lo tuyo (§6.2).

Nº	El compañero dice	Qué provoca	Una reacción posible
1	The coin toss is interesting, isn't it? Nobody's gambling anything there. They use chance precisely because it's fair. The casino's the opposite. Those men think they can beat the odds, which is exactly why they'll lose.	Un contraste muy útil (azar justo frente a azar engañoso): recógelo y amplía el alcance. §6.2 · §6.5	That's a neat distinction — chance as a referee and chance as a temptation. And you could say the same about lotteries for school places: we accept them because nobody controls them.
2	For the cover, I'd go for the scientist. So many great discoveries happened by accident, and that's really the most fascinating side of chance.	Una buena propuesta con un punto débil: concede y señala el problema. §6.3	I'll give you that — it's the richest idea of the five. But would a reader see chance in it without an explanation? To most people, it just looks like science.
3	Actually, forget the others. The lightning says it all. Life is completely random, and nothing we decide makes the slightest difference.	Una postura extrema y fatalista: modérala y discrepa con argumentos. §6.4 · §6.3	Let's not get carried away — if nothing we decided made any difference, there'd be no point in writing the book, let alone choosing a cover for it.
4	I suppose you're one of those people who believes everyone makes their own luck? That hard work is all it takes?	Una etiqueta que te atribuye una postura: matiza lo que tenga de cierto o recházala. §6.3	I won't deny there's some truth in it — preparation matters. But nothing of the sort if you mean that people born into poverty simply didn't try hard enough.

Nº	El compañero dice	Qué provoca	Una reacción posible
5	We're running out of time. I'd still choose the fork in the road. It's the only picture where a choice is actually being made. What do you say?	Una propuesta razonada al cierre: acéptala, negóciala o cierra el desacuerdo. §6.6 · §6.3	I'll drink to that, as long as the book really is about choice as well as chance. If it's mainly about chance, we may have to differ, and I'd go for the scientist.

Part 3 · Tarjeta A

How far are people's lives shaped by chance rather than choice? (birth · luck · decisions)

Decisión	Plan de diez segundos (§3.2)
Operación	How far … rather than …: una medida comparativa (§3.1).
Postura	Mucho más de lo que creemos, sobre todo cuando nos va bien; ayuda separar el punto de partida del camino.
Línea 1	El punto de partida es casi todo azar: país, época, familia, salud (birth).
Línea 2	El camino es una mezcla, y la suerte se acumula: una pequeña ventaja abre otras (luck).
Contrapunto	Las decisiones cuentan: con el mismo punto de partida, la gente acaba en lugares distintos (decisions).
Cierre	Nos atribuimos los éxitos y culpamos al azar de los fracasos; debería ser al revés (idea propia).

LONG TURN MODELO · 292 PALABRAS · UNOS DOS MINUTOS A 145 PALABRAS POR MINUTO

1 I think the honest answer is far more than most of us like to believe, particularly when things are going well. It helps, though, to separate where we start from the route we take, because chance plays a rather different role in each.

2 Where we start is almost entirely a matter of chance. Nobody chooses the country they're born in, the century, their parents or their health, and yet those four things probably decide more about a life than any decision we make later on. In that sense, birth is the biggest lottery of all, and the prizes are distributed very unevenly. And none of them is earned.

3 The route is more of a mixture. Chance keeps intervening — a conversation with a stranger, a teacher who happens to notice you, graduating just as the economy collapses. And what makes these accidents so powerful is that they compound. A small piece of luck at eighteen can open a door that leads to another, and another, until it looks, from the outside, like a carefully planned career. Very few people who succeed would describe it that way, of course.

4 Admittedly, choices clearly matter. Two people with almost identical starting points can end up in very different places, and that isn't all down to luck. How we respond to an opportunity, or to a setback, is at least partly up to us. Some people make the most of a small piece of luck; others waste a large one.

5 So, all things considered, I'd say chance deals the cards and choice decides how we play them. The danger is that we tend to credit our choices when things go well and blame chance when they don't. If anything, it should probably be the other way round.

Tramo	Tiempo	Qué hace y con qué recursos
1	0:00–0:18	Responde la medida en la primera frase y anuncia la distinción que organiza todo el long turn (where we start / the route we take) (§3.2, §4.2).

Tramo	Tiempo	Qué hace y con qué recursos
2	0:18–0:45	Primera línea: una enumeración que convence por acumulación y una metáfora (the biggest lottery of all). In that sense (§4.3).
3	0:45–1:17	Segunda línea con tres casos rápidos y un mecanismo (they compound) que da detalle (§3.4, §4.1).
4	1:17–1:41	Contrapunto que devuelve su peso a la elección. Admittedly (§4.3), isn't all down to luck.
5	1:41–2:01	Cierre con una imagen propia y una inversión final. If anything (§4.3).

Pregunta de seguimiento: Is it fair that some people are born with far more advantages than others? No es justo ni injusto en sí (nadie lo ha decidido); la cuestión de justicia es qué hace la sociedad con esas diferencias. Distingue para no repetir el long turn. (§3.7)

Part 3 · Tarjeta B

Why do people find uncertainty so difficult to live with? (control · fear · planning)

Decisión	Plan de diez segundos (§3.2)
Operación	Why: causas, jerarquizadas (§3.1).
Postura	Porque una mala certeza se lleva mejor que una pregunta abierta.
Línea 1	Cómo estamos hechos: la incertidumbre nos mantiene en alerta (fear).
Línea 2	La cultura del control: si todo se puede planificar, lo imprevisible parece un fracaso (control, planning). Más importante.
Contrapunto	Hay quien vive bien en la incertidumbre; y en ella está también la esperanza.
Cierre	No se puede eliminar; lo útil es aprender a tolerarla (idea propia).

LONG TURN MODELO · 291 PALABRAS · UNOS DOS MINUTOS A 145 PALABRAS POR MINUTO

1 I suspect it's because, for most of us, a bad certainty is easier to deal with than an open question. If you know something unpleasant is going to happen, you can at least prepare for it; if you don't know, you're stuck in a kind of permanent alert.

2 Part of that, I think, is simply how we're built. For most of human history, an unknown noise in the dark was worth treating as a threat, and our minds still seem to work on that principle. It's often said that people waiting for medical results feel worse than people who've already had bad news, and whether or not that's strictly true, it certainly matches most people's experience.

3 But there's a cultural side to it as well, and it may be the more important one. We're constantly told that almost everything can be planned, measured or insured against. So when something genuinely can't be predicted, it doesn't just feel uncomfortable; it feels like a failure, as if we ought to have been able to control it. Planning, which is meant to reassure us, can even make this worse, because every plan creates a new way of failing.

4 Mind you, not everyone experiences it in the same way. Some people seem to thrive on uncertainty: they start businesses, move abroad on a whim, and find a completely predictable life far more frightening. And uncertainty is also, after all, where hope comes from. If the future were fixed, there'd be nothing to look forward to.

5 So, to come back to the question, I'd say we find it hard because we're wired for vigilance and taught to expect control. Since we can't get rid of uncertainty, perhaps the more useful skill is learning to tolerate it.

Tramo	Tiempo	Qué hace y con qué recursos
1	0:00–0:20	Responde con una paradoja (a bad certainty is easier … than an open question) y la explica en la frase siguiente (§3.2, §4.6).
2	0:20–0:48	Primera línea: un mecanismo (evolución) y un ejemplo presentado con cautela: It's often said that …, and whether or not that's strictly true, … (§4.6, atenuación).
3	0:48–1:21	Segunda línea, jerarquizada (it may be the more important one), con un contraste it doesn't just feel …; it feels … (§4.6).
4	1:21–1:44	Contrapunto doble: hay quien prospera en la incertidumbre y además es fuente de esperanza. Mind you (§4.3), condicional If the future were fixed.
5	1:44–2:00	Cierre que resume las dos causas en una frase simétrica (wired for … and taught to …) y propone una idea propia (§4.1).

Pregunta de seguimiento: Do you think it's possible to plan too much? Sí: cuando el plan sustituye a la atención y deja de adaptarse; un buen plan incluye margen para lo imprevisto. Enlaza con la idea de tolerar la incertidumbre. (§3.7)

Part 3 · Discusión: chance

Respuestas de 30–45 segundos: postura, razón y caso, sin convertirlas en otro long turn (§6.7).

Pregunta	Ideas	Cómo puede sonar
Should important decisions ever be left to chance?	A veces sí, precisamente por justicia: sorteos de plazas escolares, jurados, desempates. El azar es aceptable cuando no hay un criterio mejor. §3.5	Sometimes, yes — when there's no fairer way to choose, a lottery at least has the virtue of being impartial.
Some people say that we make our own luck. How much truth is there in this?	Parte de verdad (la preparación aprovecha las oportunidades), pero la frase olvida el punto de partida y puede culpar a quien no tuvo suerte. §6.7 · §6.3	Some — preparation certainly helps you spot opportunities. But it's a saying that tends to be used by people who started with a head start.
Why do you think people believe in fate?	Da sentido y consuelo: si algo estaba escrito, no es culpa nuestra ni fue en vano; además el cerebro busca patrones. §3.4	I suppose it's comforting: if something was meant to happen, then it wasn't pointless — or our fault.
How important have accidents been in the history of science?	Mucho, pero el accidente solo sirve a quien sabe verlo; ejemplos si se conocen (penicilina, rayos X) y, si no, razonar en general. §4.4	Very, I think — although an accident only becomes a discovery if someone is prepared enough to notice it.
Can we ever really predict the future?	Tendencias, sí (demografía, clima); sucesos concretos, no. Las predicciones más seguras son las aburridas. §4.3	Trends, to some extent. Events, hardly ever — and if anything, the most confident predictions tend to be the least reliable.
If you could know exactly how your life would turn out, would you want to?	Hipotética: gana tiempo con contenido y razona; la mayoría diría que no, porque quitaría la esperanza y el sentido de decidir. §4.4	That's a fascinating question. I think I'd say no: knowing the ending would take away the point of most of the decisions along the way.
