LST-P1 · PRÁCTICA 04

Three extracts

Hoja 04 · Acuerdo parcial, understatement y rectificación · dificultad 4 de 4

6 preguntas (1–6) · 1 punto por pregunta · audio: LST-P1_Practica_04.mp3 · cada extracto suena dos veces, con las pausas del examen · sin consultar la teoría

---

You will hear three different extracts. For questions 1–6, choose the answer (**A, B** or **C**) which fits best according to what you hear. There are two questions for each extract.

Extract One

You hear two scientists discussing a new rule about sharing research data.

1 What do the two scientists agree about?

- **A** The new rule should come with additional funding.
- **B** Making raw data public is a worthwhile aim.
- **C** Published papers frequently contain misleading results.

2 How does the woman respond to the man's concerns about smaller research groups?

- **A** She thinks he is exaggerating the difficulties.
- **B** She expects the groups to be given extra time.
- **C** She accepts that he has identified a genuine problem.

Extract Two

You hear a mountaineer talking about a decision to turn back before reaching a summit.

3 What made the mountaineer decide to turn back?

- **A** He was unwilling to break a limit the team had agreed on.
- **B** He was too tired to continue safely.
- **C** He feared the slope might avalanche.

4 How does he feel about the decision now?

- **A** It has strengthened his respect for agreed limits.
- **B** He is convinced it saved the team's lives.
- **C** He still regrets how much money the whole attempt cost him.

Extract Three

You hear two friends discussing a book about productivity.

5 What do the friends agree about the book?

- **A** Its repetition makes the ideas easier to remember.
- **B** It has changed the way they both work.
- **C** It keeps returning to the same few ideas.

6 What does the woman imply in her final comment?

- **A** The author has seriously misjudged what his readers want.
- **B** The book is far longer than its content justifies.
- **C** Its one good idea is not an original one.

Hoja de respuestas

Marca una sola letra por pregunta. Al corregir, 1 punto por acierto; los errores no restan. En el examen en papel se responde en el cuadernillo y al final hay 5 minutos para pasar las respuestas a la hoja.

Nº	A	B	C	Puntos
1	A	B	C	/ 1
2	A	B	C	/ 1
3	A	B	C	/ 1
4	A	B	C	/ 1
5	A	B	C	/ 1
6	A	B	C	/ 1
			Total	**/ 6**

SOLUCIONES

1 punto por acierto. Para cada extracto: la transcripción, con la frase que da cada respuesta en negrita y el número de la pregunta; después, por qué la clave es correcta y por qué falla cada distractor, con su tipo (§4) y la cita que lo descarta. Los números de sección remiten a LST_Teoria_v1.

Clave rápida

Nº	Clave	Tipo de pregunta	Distractores	Teoría
1	**B**	Acuerdo	A §4.4 · C §4.5	§3.6 · §2.4
2	**C**	Acuerdo	A §4.2 · B §4.8	§3.6 · §3.3
3	**A**	Detalle	B §4.4 · C §4.6	§5.3 · §3.2
4	**A**	Sentimiento	B §4.5 · C §4.1	§3.3 · §2.4
5	**C**	Acuerdo	A §4.4 · B §4.4	§3.6 · §2.3
6	**B**	Actitud y opinión	A §4.8 · C §4.1	§3.1 · §2.4

Extract One

You hear two scientists discussing a new rule about sharing research data.

Voces · Woman: Molly, inglés neozelandés · Man: Connor, inglés irlandés

Woman So the journal's finally insisting that everyone publishes their raw data. **I can't say I'm sorry**[1].

Man **In principle, neither am I**[1]. Anyone who's tried to reproduce someone else's results knows how much gets lost between the lab and the published paper – a step nobody thought worth writing down, a setting on a machine that's since been replaced.

Woman Exactly. Half the time you're working from a summary of a summary.

Man The bit I'm less comfortable with is the timetable. Six months to clean up and document ten years of data, with no extra funding – that isn't openness, it's an unpaid second job.

Woman I'm not sure I'd put it quite that strongly. Most of the big labs have been preparing for this for a while.

Man The big labs, yes. It's the small groups I'm thinking of – two people and a borrowed freezer. They're precisely the ones this rule is supposed to help, and they're the ones least able to comply with it.

Woman **Well, that's a fair point. I hadn't thought of it from their side**[2].

1 · B · Acuerdo

Pregunta: What do the two scientists agree about?

A The new rule should come with additional funding.
Falla (voz equivocada §4.4). Solo lo da a entender él (with no extra funding); ella no habla de dinero.

B Making raw data public is a worthwhile aim.
Correcta. Ella: I can't say I'm sorry, una litotes que significa que le parece bien (§2.4). Él: In principle, neither am I. Coinciden en el objetivo; discrepan en los plazos.

C Published papers frequently contain misleading results.
Falla (grado y alcance §4.5). Dicen que se pierde información (how much gets lost between the lab and the published paper), no que los resultados sean engañosos.

Teoría: §3.6 Acuerdo y desacuerdo entre hablantes · §2.4 Matización

2 · C · Acuerdo

Pregunta: How does the woman respond to the man's concerns about smaller research groups?

A She thinks he is exaggerating the difficulties.
Falla (mencionado y descartado §4.2). Es su primera reacción, al calendario en general (I'm not sure I'd put it quite that strongly). Cuando él se centra en los grupos pequeños, cambia de postura (§3.3).

B She expects the groups to be given extra time.
Falla (ausente §4.8). Nadie habla de ampliar el plazo.

C She accepts that he has identified a genuine problem.
Correcta. Well, that's a fair point. I hadn't thought of it from their side: reconoce el problema que él plantea sobre los grupos pequeños.

Teoría: §3.6 Acuerdo y desacuerdo entre hablantes · §3.3 La segunda idea manda

Extract Two

You hear a mountaineer talking about a decision to turn back before reaching a summit.

Voces · Mountaineer: William, inglés australiano

> People assume the hardest part of turning back is physical – that you're too exhausted to go on. It almost never is. On the day I'm thinking of, I felt fine. The weather was holding, we were three hundred metres from the top, and I'd spent two years and rather more money than I'd like to admit getting there. What I didn't like was the time. **We'd agreed a turnaround point of two o'clock, and it was ten past** [3]. Ten minutes doesn't sound like much, and believe me, I made that argument to myself more than once. But every story I'd ever read about people who didn't come down began with someone deciding that a rule was more of a guideline. So we turned round. I won't pretend the walk down was a cheerful one; there was a fair amount of swearing, most of it mine. Two days later, the same slope avalanched in the afternoon. I'm not claiming we'd have been on it. **I just haven't questioned a turnaround time since** [4].

3 · A · Detalle

Pregunta: What made the mountaineer decide to turn back?

A He was unwilling to break a limit the team had agreed on.
Correcta. We'd agreed a turnaround point of two o'clock, and it was ten past. Saltarse la hora habría sido tratar la norma como more of a guideline, y por eso dieron la vuelta.

B He was too tired to continue safely.
Falla (voz equivocada §4.4). Es lo que supone la gente (People assume the hardest part of turning back is physical); él dice I felt fine.

C He feared the slope might avalanche.
Falla (lógica alterada §4.6). Altera el orden: la avalancha llegó Two days later. Al dar la vuelta no podía saberlo.

Teoría: §5.3 Part 1: tipos de pregunta · §3.2 Voz propia y voces ajenas

4 · A · Sentimiento

Pregunta: How does he feel about the decision now?

A It has strengthened his respect for agreed limits.
Correcta. I just haven't questioned a turnaround time since: desde entonces respeta sin discutir los límites acordados.

B He is convinced it saved the team's lives.
Falla (grado y alcance §4.5). Evita afirmarlo de forma expresa: I'm not claiming we'd have been on it.

C He still regrets how much money the whole attempt cost him.
Falla (eco léxico §4.1). El dinero aparece como parte de lo que le costaba renunciar (rather more money than I'd like to admit), no como algo que lamente ahora.

Teoría: §3.3 La segunda idea manda · §2.4 Matización

Extract Three

You hear two friends discussing a book about productivity.

Voces · Man: Brian, inglés norteamericano · Woman: Sonia, inglés británico

Man	I finally finished that productivity book you lent me.
Woman	And? Are you a changed man?
Man	I'm a man who now feels guilty about checking his email, which I suppose is a start. Some of it was genuinely useful – the idea of doing the task you're dreading first thing, before your willpower runs out. I've actually stuck to that.
Woman	That's the one bit everybody quotes. **The rest I found awfully repetitive** [5].
Man	**It is repetitive, I'll give you that** [5]. Every chapter is the same three ideas with a different anecdote attached, usually involving a chief executive and a very early alarm. But I'm not sure that's a flaw, exactly. If he'd only said it once, I'd have forgotten it by Tuesday.
Woman	Maybe. Although if you need four hundred pages to remember one idea, I'd say the book's doing the remembering for you.
Man	That's a bit harsh. I'd say it does what it sets out to do.
Woman	**Which is to sell four hundred pages on the strength of one good idea** [6].

5 · C · Acuerdo

Pregunta: What do the friends agree about the book?

A Its repetition makes the ideas easier to remember.
Falla (voz equivocada §4.4). Es la defensa de él (If he'd only said it once, I'd have forgotten it by Tuesday); ella la rechaza.

B It has changed the way they both work.
Falla (voz equivocada §4.4). Solo él ha cambiado un hábito (I've actually stuck to that); de ella no se sabe.

C It keeps returning to the same few ideas.
Correcta. Ella: The rest I found awfully repetitive. Él: It is repetitive, I'll give you that. Coinciden en el hecho y discrepan en si es un defecto.

Teoría: §3.6 Acuerdo y desacuerdo entre hablantes · §2.3 Señales del discurso oral

6 · B · Actitud y opinión

Pregunta: What does the woman imply in her final comment?

A The author has seriously misjudged what his readers want.
Falla (ausente §4.8). No habla de los lectores ni de lo que esperan.

B The book is far longer than its content justifies.
Correcta. Which is to sell four hundred pages on the strength of one good idea: cuatrocientas páginas para una sola idea buena. El libro está inflado.

C Its one good idea is not an original one.
Falla (eco léxico §4.1). Recoge one good idea, pero no cuestiona que sea original; al contrario, la llama buena.

Teoría: §3.1 Lo que se dice y lo que se da a entender · §2.4 Matización
