Listening

Simulacro 01 · paper 3 de 4

Parts 1–4 · 30 preguntas · unos 41 minutos · audio: SIM-01_LST.mp3

INSTRUCTIONS TO CANDIDATES

Time: approximately **40 minutes**, including five minutes to copy your answers.

There are **four** parts to the test. You will hear each part **twice**.

Write your answers on the question paper as you listen. At the end of the test you will have five minutes to copy them onto the answer sheet.

Each question carries one mark.

Partes y tiempos

Part	Tarea	Preguntas	Puntos	En el MP3
1	Three extracts	1–6	6	0:36
2	Sentence completion	7–15	9	8:51
3	Interview	16–20	5	17:59
4	Multiple matching	21–30	10	26:59
	Copiar las respuestas en la hoja			35:14
	Total	**30**	**30**	**40:34**

Cómo hacer el simulacro

1. Ten delante solo los enunciados (las páginas siguientes). Reproduce el MP3 de principio a fin, sin pausar: las pausas para leer las preguntas y para revisar ya están en el audio, con el guion del examen.
2. Responde en los enunciados mientras escuchas y, en los cinco minutos finales, pasa las respuestas a la hoja de respuestas (después de la Part 4). En la Part 2, escribe las palabras que oyes, sin cambiarlas.
3. Corrige con las soluciones: incluyen la transcripción completa, con la frase que da cada respuesta resaltada.
4. Si fallas una pregunta, vuelve a escuchar ese tramo con la transcripción delante; el mapa del MP3 está en esta página.

Voces sintéticas con acentos británico, irlandés, australiano, neozelandés y norteamericano; el narrador es siempre el mismo. Ninguna respuesta depende solo de la entonación.

Material no oficial, sin afiliación con Cambridge University Press & Assessment. Audio con voces sintéticas.

Part 1 Three extracts

You will hear three different extracts. For questions 1–6, choose the answer (**A, B** or **C**) which fits best according to what you hear. There are two questions for each extract.

Extract One

You hear two friends discussing a weekend course in wild swimming.

1 What does the man say about the instructor?

A She concentrated on safety rather than on building endurance.
B She expected beginners to cope with the cold water from the very start.
C She spent too long on theory for his liking.

2 How did the man feel by the end of the course?

A relieved that the hardest part of the weekend was behind him
B more at ease in the water than he had expected to be
C uneasy about the risks he had learnt about

Extract Two

You hear a tree surgeon talking about his work.

3 What does the tree surgeon say about many of the requests he receives?

A They tend to come from people who dislike the noise trees make in the wind.
B They usually involve trees that are too large to prune safely.
C They are often based on an exaggerated sense of danger.

4 What does the tree surgeon find most rewarding about his work?

A the physical challenge of climbing
B knowing that he has helped to preserve trees
C the chance to work on trees that are centuries old

Extract Three

You hear two archaeologists discussing the excavation of a Victorian rubbish dump.

5 What concern does the man express?

A Visitors were more interested in the dump than in the other parts of the site.
B The bottles found at the site are worth less than people assume.
C Talk of what the bottles are worth could lead to amateurs plundering sites.

6 What do the two archaeologists agree about?

A The rubbish reveals people's fears more clearly than written records do.
B Collectors are willing to pay too much for unusual bottles.
C The open day attracted visitors for the wrong reasons.

Part 2 Sentence completion

You will hear a perfumer called Helen Marsh giving a talk about how a new perfume is created. For questions 7–15, complete the sentences with a word or short phrase.

Creating a new perfume

Helen says that the most helpful detail in a brief is usually the ___7___.

Much of the clean smell many people link with freshly washed clothes comes from synthetic ingredients called ___8___.

Unlike beginners, Helen begins by working on a perfume's ___9___.

Each early version of a perfume is tried out on strips of paper known as ___10___.

The longest Helen has ever spent developing a single perfume is ___11___.

Most failed perfumes are rejected for being too ___12___ to products already on sale.

To rest their noses, most perfumers Helen knows smell their own ___13___.

Perfumers borrow more descriptive words from the vocabulary of ___14___ than from any other.

Helen tries not to describe perfumes using words connected with ___15___.

Part 3 Interview

You will hear part of an interview with Hannah Price, who designs board games. For questions 16–20, choose the answer (**A, B, C** or **D**) which fits best according to what you hear.

16 What does Hannah believe is the main reason why board games have become popular with adults?

A They give people a welcome break from their screens.
B They appeal to adults who enjoy competing with their friends.
C They provide a structure that makes socialising less demanding.
D They have become cheaper than most other forms of entertainment.

17 According to Hannah, the starting point for a new game is usually

A a difficult choice that players will have to make.
B a story that she would like players to experience.
C an idea for how the finished game should look.
D a theme that she expects to appeal to buyers.

18 What does Hannah say about the people who test her games?

A Their suggestions frequently lead her to change the rules.
B They tend to find her games harder than she intended.
C They are reluctant to say what they really think.
D Their behaviour while playing tells her more than their comments.

19 What is Hannah's view of the role of luck in games?

A It should be kept to a minimum in games for serious players.
B It helps to keep weaker players involved until the end.
C It makes games more entertaining for people watching them.
D It should be allowed to decide the result of short games only.

20 How does Hannah feel now when she discovers that players have changed her rules?

A frustrated that her careful work has gone to waste
B curious to find out whether their changes improve the game
C flattered that they now treat the game as their own
D worried that some of the changes are unfair to children

Part 4 Multiple matching

You will hear five short extracts in which people are talking about completing a long-distance walk. While you listen, you must complete both tasks.

TASK ONE

For questions 21–25, choose from the list (**A–H**) what finally prompted each speaker to do the walk.

A a long-held ambition
B advice from a medical professional
C a promise made to someone close to them
D the chance to raise money for a cause
E something they had read
F the loss of their job
G the wish to spend time with a relative
H the approach of a significant birthday

Speaker 1	21
Speaker 2	22
Speaker 3	23
Speaker 4	24
Speaker 5	25

TASK TWO

For questions 26–30, choose from the list (**A–H**) what each speaker found most difficult about the experience.

A physical discomfort
B the monotony of walking day after day
C adjusting to ordinary life afterwards
D being alone with their thoughts
E finding their way
F keeping up with a companion
G accepting kindness from strangers
H the persistent bad weather

Speaker 1	26
Speaker 2	27
Speaker 3	28
Speaker 4	29
Speaker 5	30

Hoja de respuestas

Part 1 · Three extracts

Marca una sola letra por pregunta. Al corregir, 1 punto por acierto; los errores no restan. En el examen en papel se responde en el cuadernillo y al final hay 5 minutos para pasar las respuestas a la hoja.

Nº	A	B	C	Puntos
1	A	B	C	/ 1
2	A	B	C	/ 1
3	A	B	C	/ 1
4	A	B	C	/ 1
5	A	B	C	/ 1
6	A	B	C	/ 1
			Total	**/ 6**

Part 2 · Sentence completion

Escribe las palabras que oyes, sin cambiarlas, y comprueba que encajan en la frase y que están bien escritas. 1 punto por respuesta correcta. En el examen en papel: mayúsculas, una letra por casilla.

Nº	Respuesta	Puntos
7	_____	/ 1
8	_____	/ 1
9	_____	/ 1
10	_____	/ 1
11	_____	/ 1
12	_____	/ 1
13	_____	/ 1
14	_____	/ 1
15	_____	/ 1
	Total	**/ 9**

Part 3 · Interview

Marca una sola letra por pregunta. Al corregir, 1 punto por acierto; los errores no restan. En el examen en papel se responde en el cuadernillo y al final hay 5 minutos para pasar las respuestas a la hoja.

Nº	A	B	C	D	Puntos
16	A	B	C	D	/ 1
17	A	B	C	D	/ 1
18	A	B	C	D	/ 1
19	A	B	C	D	/ 1
20	A	B	C	D	/ 1
				Total	**/ 5**

Part 4 · Multiple matching

Una letra por casilla; en cada tarea, cada letra se usa una sola vez y sobran tres. 1 punto por acierto; los errores no restan. En el examen en papel se responde en el cuadernillo y al final hay 5 minutos para pasar las respuestas a la hoja.

Hablante	Nº	Task One	Nº	Task Two	Puntos
Speaker 1	21		26		/ 2
Speaker 2	22		27		/ 2
Speaker 3	23		28		/ 2
Speaker 4	24		29		/ 2
Speaker 5	25		30		/ 2
				Total	**/ 10**

Puntuación total

Part	Tarea	Puntos
1	Three extracts	_____ / 6
2	Sentence completion	_____ / 9
3	Interview	_____ / 5
4	Multiple matching	_____ / 10
	Total	**_____ / 30**

Referencia orientativa, no oficial: el aprobado con nota C2 suele quedar en torno al 60 % de la puntuación bruta, unos 18 de 30 puntos; la conversión exacta cambia de un examen a otro.

SOLUCIONES

Part 1 · Three extracts

1 punto por acierto. Para cada extracto: la transcripción, con la frase que da cada respuesta en negrita y el número de la pregunta; después, por qué la clave es correcta y por qué falla cada distractor, con su tipo (§4) y la cita que lo descarta. Los números de sección remiten a LST_Teoria_v1.

Clave rápida

Nº	Clave	Tipo de pregunta	Distractores	Teoría

6	**A**	Acuerdo	B §4.1/4.4 · C §4.4	§3.6 · §5.3

Extract One

You hear two friends discussing a weekend course in wild swimming.

Voces · Woman: Libby, inglés británico · Man: Connor, inglés irlandés

Woman So, how was the swimming weekend? I was half expecting you to come back with frostbite.

Man Far from it. I won't pretend the first morning was pleasant. The lake was eleven degrees, and for the first few minutes I could barely breathe. But the instructor was excellent. **She wasn't remotely interested in toughening us up**[1]. **Most of the time went on getting out safely**[1]: how to spot a current, how to tell when your hands are going numb, when to stop.

Woman Not quite the heroic struggle against the elements I'd pictured, then.

Man No, and that's what put a couple of the others off. They'd come for the thrill and got a talk on hypothermia.

Woman Well, I'd say she had her priorities right.

Man So would I. And the odd thing is, **knowing exactly what could go wrong made me far less anxious, not more**[2]. **By the Sunday I was the last one out of the water**[2].

1 · A · Detalle

Pregunta: What does the man say about the instructor?

A She concentrated on safety rather than on building endurance.
Correcta. Primero descarta la resistencia (She wasn't remotely interested in toughening us up) y luego dice a qué dedicó el tiempo: Most of the time went on getting out safely. La opción lo resume en abstracto: safety frente a building endurance.

B She expected beginners to cope with the cold water from the very start.
Falla (eco léxico §4.1, ausente §4.8). El frío aparece (The lake was eleven degrees), pero como experiencia suya; no dice nada de lo que la instructora esperaba de los principiantes.

C She spent too long on theory for his liking.
Falla (voz equivocada §4.4). A quien no le gustó tanta teoría fue a otros: that's what put a couple of the others off. Él la elogia: the instructor was excellent.

Teoría: §5.3 Part 1: tipos de pregunta · §3.1 Lo que se dice y lo que se da a entender

2 · B · Sentimiento

Pregunta: How did the man feel by the end of the course?

A relieved that the hardest part of the weekend was behind him
Falla (ausente §4.8, expectativa §4.7). Lo duro fue la primera mañana (I won't pretend the first morning was pleasant), pero al final no habla de alivio: al contrario, era the last one out of the water.

B more at ease in the water than he had expected to be
Correcta. Lo dice al final: knowing exactly what could go wrong made me far less anxious, not more, y lo confirma un hecho, By the Sunday I was the last one out of the water. the odd thing is indica que no lo esperaba: de ahí than he had expected to be.

C uneasy about the risks he had learnt about
Falla (lógica alterada §4.6). Invierte la relación: conocer los riesgos lo tranquilizó, far less anxious, not more.

Teoría: §3.3 La segunda idea manda · §5.3 Part 1: tipos de pregunta

Extract Two

You hear a tree surgeon talking about his work.

Voces · Tree surgeon: Mitchell, inglés neozelandés

> People tend to assume my job is mostly about cutting trees down, and I suppose that's understandable when the first thing they see is a man with a chainsaw hanging from the top of an oak. In fact, a good deal of what I do is aimed at keeping trees standing. Many of the calls I get come from homeowners who've decided a tree is dangerous because it creaks in the wind or drops the odd branch, and **more often than not there's nothing wrong with it**[3] that some careful pruning won't put right. Talking someone out of felling a perfectly healthy beech isn't the most profitable part of the job, I'll grant you. But I'd rather lose the fee than take down something that's been growing for two hundred years. The work itself is physically punishing, and I'm not getting any younger. What keeps me at it, though, isn't the climbing, much as I enjoy it. It's walking past a tree years later and **knowing it's still there because of a decision I helped someone make**[4].

3 · C · Detalle

Pregunta: What does the tree surgeon say about many of the requests he receives?

A They tend to come from people who dislike the noise trees make in the wind.
Falla (eco léxico §4.1). Recoge creaks in the wind, pero el crujido no les molesta por el ruido: lo toman como señal de peligro.

B They usually involve trees that are too large to prune safely.
Falla (ausente §4.8). No habla del tamaño de los árboles; dice lo contrario, que la mayoría se arregla podando: nothing wrong with it that some careful pruning won't put right.

C They are often based on an exaggerated sense of danger.
Correcta. Los clientes creen que el árbol es peligroso (homeowners who've decided a tree is dangerous) por señales sin importancia, y casi siempre se equivocan: more often than not there's nothing wrong with it. Often traduce more often than not; exaggerated sense of danger, el contraste entre lo que creen y lo que hay.

Teoría: §5.3 Part 1: tipos de pregunta · §2.4 Matización

4 · B · Actitud y opinión

Pregunta: What does the tree surgeon find most rewarding about his work?

A the physical challenge of climbing
Falla (mencionado y descartado §4.2). Mencionado y descartado: What keeps me at it, though, isn't the climbing, much as I enjoy it.

B knowing that he has helped to preserve trees
Correcta. Descarta primero la escalada y luego da la razón: It's walking past a tree years later and knowing it's still there because of a decision I helped someone make. La segunda idea es la que manda (§3.3).

C the chance to work on trees that are centuries old
Falla (eco léxico §4.1). Recoge growing for two hundred years, que sirve para justificar que prefiera perder un encargo, no para decir qué le satisface.

Teoría: §3.3 La segunda idea manda · §5.3 Part 1: tipos de pregunta

Extract Three

You hear two archaeologists discussing the excavation of a Victorian rubbish dump.

Voces · Woman: Natasha, inglés australiano · Man: Brian, inglés norteamericano

Woman	I must say, I didn't expect a rubbish dump to draw a bigger crowd on the open day than the Roman villa.
Man	Neither did I. Though I suspect half of them were hoping we'd turn up something valuable. A couple of people asked me what the bottles would fetch at auction.
Woman	Well, some of them would fetch a fair bit. Collectors pay a fortune for the oddly shaped ones.
Man	**Which is exactly what worries me** [5]. Once word gets round, **people start digging these sites up with a spade on a Sunday afternoon, and nobody records a thing** [5].
Woman	True. Although I'd argue the real value isn't in the glass at all. It's what was in the bottles. Half of them held patent medicines, and every one of them promised to cure something.
Man	Yes, that struck me too. **You get a far clearer picture of what people were afraid of from what they threw away than from anything they chose to write down** [6].
Woman	**I couldn't have put it better myself** [6].

5 · C · Actitud y opinión

Pregunta: What concern does the man express?

A Visitors were more interested in the dump than in the other parts of the site.
Falla (no responde §4.3, voz equivocada §4.4). Es cierto que el vertedero atrajo más público (draw a bigger crowd on the open day than the Roman villa), pero lo dice ella, como sorpresa, y no como preocupación.

B The bottles found at the site are worth less than people assume.
Falla (ausente §4.8). Él nunca dice que valgan menos; es ella quien habla del precio, y para decir que algunas valen bastante: some of them would fetch a fair bit.

C Talk of what the bottles are worth could lead to amateurs plundering sites.
Correcta. Which is exactly what worries me remite a lo que pagan los coleccionistas, y la consecuencia que teme es la excavación sin control: people start digging these sites up with a spade on a Sunday afternoon, and nobody records a thing. Amateurs plundering sites lo parafrasea.

Teoría: §5.3 Part 1: tipos de pregunta · §3.2 Voz propia y voces ajenas

6 · A · Acuerdo

Pregunta: What do the two archaeologists agree about?

A The rubbish reveals people's fears more clearly than written records do.
Correcta. Ella introduce la idea con los medicamentos (every one of them promised to cure something), él la formula (You get a far clearer picture of what people were afraid of from what they threw away than from anything they chose to write down) y ella la suscribe sin reservas: I couldn't have put it better myself (§3.6).

B Collectors are willing to pay too much for unusual bottles.
Falla (eco léxico §4.1, voz equivocada §4.4). Ella dice que los coleccionistas pay a fortune, pero sin criticarlo, y él no opina sobre el precio: le preocupa lo que provoca.

C The open day attracted visitors for the wrong reasons.
Falla (voz equivocada §4.4). Solo él lo sospecha (I suspect half of them were hoping we'd turn up something valuable); ella no lo confirma ni lo comenta.

Teoría: §3.6 Acuerdo y desacuerdo entre hablantes · §5.3 Part 1: tipos de pregunta

Part 2 · Sentence completion

1 punto por respuesta correcta y bien escrita. La clave sigue la convención de Cambridge: las palabras entre paréntesis son opcionales y la barra separa alternativas. Debajo de cada respuesta van las que no valen: candidatos que se oyen pero no cumplen la condición de la frase (§6.3), formas que no encajan o palabras que no se oyen (§6.4) y errores de ortografía (§6.5). Los números de sección remiten a LST_Teoria_v1.

Transcripción

Voz · Sonia, inglés británico

Good afternoon, everyone. People tend to imagine that a perfumer spends her days in a field of lavender, waiting for inspiration. The reality is rather more like being an architect. A new fragrance almost always starts with a document called a brief, which comes from the company that will eventually sell it. It might ask for something fresh, or something that suggests a particular place, or simply ‘a scent for a confident woman in her thirties’, which is about as helpful as it sounds. Interestingly, the most useful part of a brief is rarely the description of the smell. **It’s the price** [7], because that decides which raw materials I can afford to use.

And those materials vary enormously in cost. Some of the most expensive come from flowers. Jasmine, for instance, has to be picked by hand early in the morning, before the heat of the day weakens its scent, and a huge quantity of petals produces only a tiny amount of oil. People often assume that natural ingredients are always superior, but most of a typical modern perfume is synthetic, and I don’t see that as a compromise. Synthetic molecules give us smells that nature simply doesn’t offer in a usable form. Many people think the smell of clean laundry comes from cotton, or from soap. In fact, much of it comes from **a group of synthetics called musks** [8], which are used in place of an ingredient that once came from animals.

Once I know what I can spend, I start to think about structure. A perfume is built in three layers, which we call notes, and each one evaporates at a different speed. The top notes, usually citrus, things like lemon or bergamot, are what you smell in the first few minutes, and they’re gone within half an hour. Then come the heart notes, often floral, which last for several hours. And underneath everything are the base notes, woods and resins and vanilla, which can still be detected on the skin the following day. The mistake beginners make is to spend all their effort on the opening. **It’s the base that people actually live with** [9], so that’s where I begin.

> Then comes testing, which is where most of the time goes. Every version is tried first on **thin strips of paper called blotters** [10], and then, more importantly, on skin, because skin changes everything. The same formula can smell quite different on two people, depending on their diet, their skin type, even the temperature of the room. A fragrance can go through several hundred versions before it's finished, and the whole process usually takes between one and three years. **The longest I've ever worked on a single perfume is five years** [11], and I'm still not sure it was worth it.
>
> Even then, a great many perfumes fail, and not always for the reasons you'd expect. It's rarely because they smell unpleasant. Far more often, a perfume fails simply because **it's too similar to something already on the shelves** [12]. Our noses also tire remarkably quickly: after a few minutes of sniffing, we stop noticing a smell altogether. You'll often see little bowls of coffee beans in perfume shops, supposedly to clear the nose, but there's very little evidence that they help. Most perfumers I know **simply smell their own skin** [13], which gives the nose something neutral to come back to.
>
> Finally, people often ask me how we describe smells, because English, like most languages, has remarkably few words that belong to smell alone. So we borrow. From music we take notes and harmony; from touch, words like soft, sharp or velvety; **and above all from colour** [14]. When I talk to a client, I'll say a perfume needs to be greener, or warmer, and they know exactly what I mean. **The one vocabulary I try to avoid is taste** [15]. Call a perfume sweet or fruity and everyone imagines a dessert, which is very rarely what I'm after.

Explicaciones

7 • price

Frase: Helen says that the most helpful detail in a brief is usually the **price**.

Se oye: It's the price

Se acepta: price

La negación descarta el candidato antes de dar la respuesta: the most useful part of a brief is rarely the description of the smell. It's the price. En el papel, most helpful detail reformula most useful part.

No vale description (candidato §6.3). Descartado: rarely the description of the smell.

No vale cost (sinónimo §6.4). Se oye más adelante (vary enormously in cost) y habla de las materias primas; en el encargo, la palabra es price.

Teoría: §6.3 Varios candidatos para un mismo hueco · §2.3 Señales del discurso oral

8 • musks / musk

Frase: Much of the clean smell many people link with freshly washed clothes comes from synthetic ingredients called **musks**.

Se oye: a group of synthetics called musks

Se acepta: musks · musk

Corrige una creencia y da la respuesta: Many people think the smell of clean laundry comes from cotton, or from soap. In fact, much of it comes from a group of synthetics called musks. La frase del papel admite el plural que se oye y también el singular incontable.

No vale soap (candidato §6.3). Es lo que la gente cree: Many people think … or from soap.

No vale cotton (candidato §6.3). También forma parte de la creencia que corrige In fact.

No vale molecules (candidato §6.3). Se oye (Synthetic molecules), pero es una categoría general, no el nombre de esos ingredientes.

Teoría: §6.3 Varios candidatos para un mismo hueco · §3.3 La segunda idea manda

9 • base (notes) / base note

Frase: Unlike beginners, Helen begins by working on a perfume's **base notes**.

Se oye: It's the base that people actually live with

Se acepta: base notes · base · base note

Contrapone el error de los principiantes y lo que hace ella: The mistake beginners make is to spend all their effort on the opening. It's the base that people actually live with, so that's where I begin. Se acepta base o base notes, que se oye antes, y también el singular base note, que encaja en la frase aunque no se oiga tal cual.

No vale opening (candidato §6.3). Es donde se equivocan los principiantes (spend all their effort on the opening).

No vale top notes (candidato §6.3). Son las notas de salida, las que se huelen al principio: equivalen a the opening.

No vale heart notes (candidato §6.3). Se mencionan, pero no son por donde empieza.

Teoría: §6.3 Varios candidatos para un mismo hueco · §3.3 La segunda idea manda

10 • blotters

Frase: Each early version of a perfume is tried out on strips of paper known as **blotters**.

Se oye: thin strips of paper called blotters

Se acepta: blotters

Every version is tried first on thin strips of paper called blotters. La frase del papel ya da la definición (strips of paper): solo falta el nombre, en plural.

No vale skin (candidato §6.3). Es la segunda prueba, no el papel: and then, more importantly, on skin.

No vale blotter (forma §6.4). Se oye en plural y la frase (strips … known as) lo pide.

No vale blotting paper (sinónimo §6.4). No es lo que se oye.

Teoría: §6.3 Varios candidatos para un mismo hueco · §6.4 Qué se escribe

11 • five years / 5 years

Frase: The longest Helen has ever spent developing a single perfume is **five years**.

Se oye: The longest I've ever worked on a single perfume is five years

Se acepta: five years · 5 years

Primero da lo habitual y después su caso extremo: usually takes between one and three years … The longest I've ever worked on a single perfume is five years. La cifra puede escribirse en número.

No vale three years (candidato §6.3). Es el límite de lo habitual (between one and three years), no su récord.

No vale five (incompleta §6.4). Sin years la duración queda incompleta.

Teoría: §6.3 Varios candidatos para un mismo hueco · §6.4 Qué se escribe

12 • similar

Frase: Most failed perfumes are rejected for being too **similar** to products already on sale.

Se oye: it's too similar to something already on the shelves

Se acepta: similar

Descarta la causa que parecería obvia y da la habitual: It's rarely because they smell unpleasant. Far more often, a perfume fails simply because it's too similar to something already on the shelves.

No vale unpleasant (candidato §6.3). Descartado: It's rarely because they smell unpleasant; además, no encaja con too … to.

No vale close (sinónimo §6.4). Encaja en la frase, pero no es lo que se oye.

Teoría: §6.3 Varios candidatos para un mismo hueco · §2.3 Señales del discurso oral

13 • skin

Frase: To rest their noses, most perfumers Helen knows smell their own **skin**.

Se oye: simply smell their own skin

Se acepta: skin

Contrapone la costumbre de las tiendas y la de los perfumistas: You'll often see little bowls of coffee beans in perfume shops … Most perfumers I know simply smell their own skin.

No vale coffee beans (candidato §6.3). Es lo que ofrecen las tiendas, y la hablante duda de que sirva: there's very little evidence that they help.

No vale skins (forma §6.4). Incontable: their own skin.

Teoría: §6.3 Varios candidatos para un mismo hueco · §3.2 Voz propia y voces ajenas

14 • colour / color

Frase: Perfumers borrow more descriptive words from the vocabulary of **colour** than from any other.

Se oye: and above all from colour

Se acepta: colour · color

Enumera tres préstamos y destaca el último: From music we take notes and harmony; from touch, words like soft, sharp or velvety; and above all from colour. Se acepta la grafía americana.

No vale music (candidato §6.3). Es una de las fuentes, pero no la principal: above all va con colour.

No vale touch (candidato §6.3). Lo mismo: una fuente más, no la principal.

No vale colours (forma §6.4). Se oye en singular: from colour.

Teoría: §6.3 Varios candidatos para un mismo hueco · §6.5 Ortografía

15 • taste

Frase: Helen tries not to describe perfumes using words connected with **taste**.

Se oye: The one vocabulary I try to avoid is taste

Se acepta: taste

The one vocabulary I try to avoid is taste, y lo explica: Call a perfume sweet or fruity and everyone imagines a dessert.

No vale dessert (candidato §6.3). Es lo que imagina la gente al oír sweet o fruity, no el vocabulario que evita.

No vale colour (candidato §6.3). Es justo el vocabulario que más usa (above all from colour).

Teoría: §6.3 Varios candidatos para un mismo hueco · §3.3 La segunda idea manda

Transcripción

You will hear part of an interview with Hannah Price, who designs board games.

Voces · Interviewer: Ryan, inglés británico · Hannah: Emily, inglés irlandés

Interviewer My guest today is Hannah Price, whose board games are now played in more than twenty countries. Hannah, sales of board games to adults have been rising steadily for years. Why do you think that is?

Hannah The usual answer is that people are tired of screens, and I'm sure that's part of it, but I don't think it's the heart of the matter. Plenty of people who play board games spend all day on their phones and are perfectly happy to do so. What a game offers is something rather harder to find: **a reason to sit round a table with other people for a couple of hours without anyone having to carry the conversation** [16]. The rules give everyone something to do with their hands and something to talk about. For a lot of adults, especially those who find socialising a bit of an effort, **that structure comes as a real relief** [16].

Interviewer So where does a new game begin? With a theme? A story?

Hannah People are always a little disappointed when I tell them, but almost never. The theme, whether it's pirates or gardens or whatever, usually arrives quite late, once I know what the game is actually about. **What I start with is a single decision that I find interesting** [17]: a moment where you have to choose between two things you want, knowing you can't have both. If that one choice is genuinely hard, I can build a whole game around it. If it isn't, no amount of beautiful artwork will rescue it.

Interviewer And then the game goes out to people who test it for you. How much notice do you take of what they say?

Hannah Of what they say? Surprisingly little. Testers are wonderfully generous with their suggestions, and most of them are wrong, not because the testers are foolish, but because they're trying to solve the problem they can see rather than the one underneath it. **What I've learnt to pay attention to is what they do** [18]. When someone picks up the rules for the third time, or goes quiet for ten minutes, or starts checking their phone while everyone else takes their turn, **that tells me far more than any questionnaire** [18]. Games rarely fail because they're too difficult. They fail when players stop feeling that their choices make any difference.

Interviewer Let's talk about luck. Serious players often complain that dice spoil a good strategy game. Would you agree?

Hannah	I understand the complaint, but I've come to think that a certain amount of luck is essential. In a game of pure strategy, the strongest player wins nearly every time, and before long the others simply stop wanting to play with them. **Luck keeps everyone in the game until the very end**[19]. It also gives the loser a way of saving face: they can always blame the dice, even if, privately, they know they made a mess of it. The trick is to let luck decide the odd battle, but never the war.
Interviewer	After all these years, is there anything about the way people play your games that still surprises you?
Hannah	All the time. I'll spend months getting the rules exactly right, and then I'll visit a family who've been playing one of my games for a year and discover they've quietly changed half of them. They've added a rule so that the youngest player can never be knocked out, or they let you swap cards with whoever's sitting opposite. When I was starting out, I found that rather hurtful, as if all my careful balancing had been for nothing. **These days I take it as the highest compliment a player can pay**[20]. It means the game has stopped being mine and has become theirs.

Explicaciones

16 · C · Actitud y opinión

Pregunta: What does Hannah believe is the main reason why board games have become popular with adults?

A They give people a welcome break from their screens.
Falla (mencionado y descartado §4.2, grado y alcance §4.5). Es The usual answer, y Hannah solo le concede una parte (I'm sure that's part of it) antes de negar que sea lo principal: I don't think it's the heart of the matter. La pregunta pide the main reason.

B They appeal to adults who enjoy competing with their friends.
Falla (ausente §4.8). Nadie habla de competir con los amigos en esta respuesta; lo que destaca Hannah es estar juntos sin esfuerzo, no ganar.

C They provide a structure that makes socialising less demanding.
Correcta. Hannah descarta la explicación habitual y da la suya con una señal clara (What a game offers is something rather harder to find): una excusa para reunirse without anyone having to carry the conversation. Lo remata con quién lo agradece más: especially those who find socialising a bit of an effort, that structure comes as a real relief. Less demanding parafrasea a bit of an effort y relief.

D They have become cheaper than most other forms of entertainment.
Falla (ausente §4.8). El precio no aparece en la entrevista. El entrevistador habla de sales of board games to adults, pero no de lo que cuestan.

Teoría: §7.1 Part 3: la tarea · §3.3 La segunda idea manda

17 · A · Detalle

Pregunta: According to Hannah, the starting point for a new game is usually

A a difficult choice that players will have to make.
Correcta. Lo dice con una señal inequívoca: What I start with is a single decision that I find interesting, y la describe: you have to choose between two things you want, knowing you can't have both. A difficult choice recoge decision y genuinely hard.

B a story that she would like players to experience.
Falla (mencionado y descartado §4.2, voz equivocada §4.4). La historia la propone el entrevistador (With a theme? A story?) y Hannah la descarta: almost never.

C an idea for how the finished game should look.
Falla (eco léxico §4.1). Eco de no amount of beautiful artwork will rescue it: el aspecto del juego aparece solo para decir que no salva una mala decisión, no como punto de partida.

D a theme that she expects to appeal to buyers.
Falla (mencionado y descartado §4.2, expectativa §4.7). El tema llega al final, no al principio: usually arrives quite late, once I know what the game is actually about. Además, nada se dice de lo que gusta a los compradores.

Teoría: §7.2 Part 3: método · §2.3 Señales del discurso oral

18 · D · Detalle

Pregunta: What does Hannah say about the people who test her games?

A Their suggestions frequently lead her to change the rules.
Falla (lógica alterada §4.6). Las sugerencias existen (wonderfully generous with their suggestions), pero Hannah dice lo contrario de que la hagan cambiar: most of them are wrong.

B They tend to find her games harder than she intended.
Falla (eco léxico §4.1, mencionado y descartado §4.2). Eco de too difficult, que Hannah usa para negarlo como causa de fracaso: Games rarely fail because they're too difficult. No dice que a sus probadores les parezcan difíciles.

C They are reluctant to say what they really think.
Falla (lógica alterada §4.6). Contradice lo que cuenta: los probadores son wonderfully generous with their suggestions. El problema no es que callen, sino que proponen soluciones al problema equivocado.

D Their behaviour while playing tells her more than their comments.
Correcta. Contrapone lo que dicen y lo que hacen: de lo que dicen hace Surprisingly little caso, y en cambio What I've learnt to pay attention to is what they do. Los ejemplos (volver a las reglas, quedarse callado, mirar el móvil) dicen más que cualquier cuestionario: that tells me far more than any questionnaire.

Teoría: §3.1 Lo que se dice y lo que se da a entender · §7.2 Part 3: método

19 · B · Actitud y opinión

Pregunta: What is Hannah's view of the role of luck in games?

A It should be kept to a minimum in games for serious players.
Falla (voz equivocada §4.4). Es la queja de otros (Serious players often complain that dice spoil a good strategy game), que Hannah entiende pero no comparte: I've come to think that a certain amount of luck is essential.

B It helps to keep weaker players involved until the end.
Correcta. Lo justifica con lo que pasa sin azar: the strongest player wins nearly every time y los demás stop wanting to play with them. Su conclusión: Luck keeps everyone in the game until the very end. Weaker players son los que perderían siempre; involved parafrasea in the game.

C It makes games more entertaining for people watching them.
Falla (ausente §4.8). No habla de espectadores en ningún momento: todo lo que dice se refiere a quienes juegan.

D It should be allowed to decide the result of short games only.
Falla (eco léxico §4.1, lógica alterada §4.6). Eco de let luck decide the odd battle, but never the war: el azar decide momentos concretos de cualquier partida, nunca el resultado final; la duración no se menciona.

Teoría: §3.3 La segunda idea manda · §3.4 Léxico de actitud en las opciones

20 · C · Sentimiento

Pregunta: How does Hannah feel now when she discovers that players have changed her rules?

A frustrated that her careful work has gone to waste
Falla (expectativa §4.7). Es lo que sentía al principio (When I was starting out, I found that rather hurtful, as if all my careful balancing had been for nothing), no lo que siente ahora, que es lo que pregunta el enunciado (now).

B curious to find out whether their changes improve the game
Falla (ausente §4.8). No dice que quiera comprobar si las reglas nuevas funcionan mejor; ni siquiera las valora.

C flattered that they now treat the game as their own
Correcta. La señal temporal separa lo que sentía de lo que siente: These days I take it as the highest compliment a player can pay, porque el juego has become theirs. Flattered es la reacción a un cumplido, y treat the game as their own parafrasea has become theirs.

D worried that some of the changes are unfair to children
Falla (eco léxico §4.1, lógica alterada §4.6). Eco de the youngest player: la regla que cita protege a los niños (can never be knocked out), no los perjudica, y Hannah no la critica.

Teoría: §3.3 La segunda idea manda · §3.4 Léxico de actitud en las opciones

Part 4 · Multiple matching

1 punto por acierto. Después de la clave rápida va la transcripción, con la frase que da cada respuesta en negrita y el número de la pregunta. Para cada hablante se explica la clave de cada tarea y por qué no valen las opciones que roza, con su tipo (§4) y la cita que las descarta. Al final, por qué sobran las tres opciones restantes de cada lista. Los números de sección remiten a LST_Teoria_v1.

Transcripción

Voces · 1: William, inglés australiano · 2: Molly, inglés neozelandés · 3: Andrew, inglés norteamericano · 4: Emma, inglés norteamericano · 5: Ava, inglés norteamericano

Speaker 1 I'd been saying I'd walk the whole coast path for the best part of twenty years, the way you do, without ever really meaning it. **What finally got me out of the door was a routine check-up**[21]. My doctor took my blood pressure, looked at me over her glasses and said that unless I started moving, she'd be seeing a great deal more of me. The blisters, when they came, were nothing, honestly. **What I found genuinely hard was people's kindness**[26]. I've always prided myself on managing on my own, so when a farmer insisted on drying my boots by his fire and feeding me supper, I didn't know where to look.

Speaker 2 My sister and I had always planned to do the walk together once the kids were older. Then she fell ill, and **near the end she made me promise I'd go anyway, with or without her**[22]. So I did, the following spring. People warned me about the hills, but they weren't the problem, and the rain, which barely stopped for a fortnight, I just accepted. You get wet, you stay wet. **What caught me out was the silence**[27]. With nobody to talk to, everything I'd been too busy to think about since she died came crowding in, mile after mile.

Speaker 3 Oddly, the walk itself was the easy bit. **What floored me was coming home**[28]. Back at a desk in a new job, I'd catch myself staring out of the window, longing for the one simple task of putting one foot in front of the other. People had warned me I'd be bored stiff by the second week on the trail, and I never was. As for why I went, everyone assumed I was raising money for something. The truth's less noble: after twenty-two years, **my company closed our office, and I found myself with a decent redundancy payment and nothing whatsoever to get up for**[23].

Speaker 4 My friend Kate came with me, and she walks as if she's permanently late for a train. I spent three weeks half a step behind her, **too proud to ask her to slow down, and that was far more exhausting than the distance itself**[29]. Getting lost was never a worry, at least; the route's beautifully signposted. As for why I went, people assumed it was turning forty, but birthdays have never bothered me. **It was an article I came across about a woman in her late seventies who'd done the whole route alone**[24]. I remember thinking: if she can manage it, what exactly is my excuse?

Speaker 5 **With my fiftieth looming, I wanted to prove to myself that I could still do something properly difficult**[25], before it was too late. My son came along for the first few days, which was lovely, but that was never the point of it. I'd trained for months, so I assumed my body would cope. It didn't. **By the fourth day my knees had swollen so badly that every descent was agony**[30], and I seriously thought about giving up. Oddly enough, once he'd gone home, I found I loved my own company, which surprised everyone, including me.

Explicaciones

Speaker 1 · 21 B · 26 G

Task One · B advice from a medical professional
Correcta. La señal What finally got me out of the door introduce el desencadenante: una revisión en la que su médica le advirtió que unless I started moving, she'd be seeing a great deal more of me.

No es A a long-held ambition **(no responde §4.3).** Es el antecedente, no lo que le hizo empezar: llevaba años diciéndolo (for the best part of twenty years), without ever really meaning it (§8.3).

Task Two · G accepting kindness from strangers
Correcta. Lo dice con todas las letras: What I found genuinely hard was people's kindness. Lo explica su orgullo (I've always prided myself on managing on my own), y la escena del granjero lo confirma: I didn't know where to look = no sabía dónde meterse.

No es A physical discomfort **(mencionado y descartado §4.2).** Las ampollas aparecen para descartarlas: The blisters, when they came, were nothing, honestly.

Teoría: §8.1 Part 4: la tarea · §8.3 Trampas propias · §2.3 Señales del discurso oral · §4.2 Mencionado y descartado

Speaker 2 · 22 C · 27 D

Task One · C a promise made to someone close to them
Correcta. Lo que la puso en marcha fue la promesa a su hermana enferma: near the end she made me promise I'd go anyway, with or without her. So I did lo confirma.

No es G the wish to spend time with a relative **(no responde §4.3).** El plan de caminar juntas es el antecedente (had always planned to do the walk together once the kids were older) y nunca llegó a cumplirse: fue sola (§8.3).

Task Two · D being alone with their thoughts
Correcta. What caught me out = lo que la pilló desprevenida. El silencio la dejó a solas con lo que había evitado pensar: everything I'd been too busy to think about since she died came crowding in.

No es A physical discomfort **(expectativa §4.7).** Le habían advertido de las cuestas, pero they weren't the problem: lo esperado no fue lo difícil.

No es H the persistent bad weather **(mencionado y descartado §4.2).** La lluvia no le costó: I just accepted, You get wet, you stay wet.

Teoría: §8.1 Part 4: la tarea · §8.3 Trampas propias · §2.3 Señales del discurso oral · §4.7 Expectativa frente a realidad

Speaker 3 · 23 F · 28 C

Task One · F the loss of their job
Correcta. Tras As for why I went llega el motivo: cerraron su oficina y se quedó con una indemnización por despido (a decent redundancy payment) y sin nada que hacer.

No es D the chance to raise money for a cause **(mencionado y descartado §4.2).** Es lo que suponía todo el mundo, y él lo corrige: everyone assumed I was raising money for something, The truth's less noble.

Task Two · C adjusting to ordinary life afterwards
Correcta. La respuesta de la Task Two llega antes que la de la Task One (§8.1): What floored me was coming home. De vuelta en un trabajo de oficina, echa de menos caminar: longing for the one simple task of putting one foot in front of the other.

No es B the monotony of walking day after day **(expectativa §4.7).** Le avisaron de que se aburriría, pero no ocurrió: I'd be bored stiff by the second week on the trail, and I never was.

Teoría: §8.1 Part 4: la tarea · §4.2 Mencionado y descartado · §2.3 Señales del discurso oral · §4.7 Expectativa frente a realidad

Speaker 4 · 24 E · 29 F

Task One · E something they had read
Correcta. It was an article I came across: leyó la historia de una mujer de casi ochenta años que había hecho la ruta sola, y se preguntó what exactly is my excuse?

No es H the approach of a significant birthday **(mencionado y descartado §4.2).** Es lo que suponía la gente, y ella lo descarta: people assumed it was turning forty, but birthdays have never bothered me.

Task Two · F keeping up with a companion
Correcta. Su amiga camina muy deprisa (as if she's permanently late for a train) y ella pasó tres semanas half a step behind her: eso le costó far more exhausting than the distance itself. La respuesta llega antes que la de la Task One.

No es A physical discomfort **(grado y alcance §4.5).** El esfuerzo físico de la distancia aparece como término de comparación, para decir que fue menos duro: far more exhausting than the distance itself.

No es E finding their way **(mencionado y descartado §4.2).** Orientarse no fue problema: Getting lost was never a worry, at least.

Teoría: §8.1 Part 4: la tarea · §4.2 Mencionado y descartado · §4.5 Grado y alcance

Speaker 5 · 25 H · 30 A

Task One · H the approach of a significant birthday
Correcta. With my fiftieth looming: se acercaba su cincuenta cumpleaños y quería demostrarse que aún podía hacer algo difícil.

No es G the wish to spend time with a relative **(mencionado y descartado §4.2).** Su hijo la acompañó unos días, pero that was never the point of it.

Task Two · A physical discomfort
Correcta. Esperaba que el cuerpo aguantara (I assumed my body would cope. It didn't.) y no fue así: By the fourth day my knees had swollen so badly that every descent was agony.

No es D being alone with their thoughts **(mencionado y descartado §4.2).** La soledad le gustó: once he'd gone home, I found I loved my own company.

Teoría: §8.1 Part 4: la tarea · §4.2 Mencionado y descartado · §4.7 Expectativa frente a realidad

Opciones que sobran

Task One

A a long-held ambition
Speaker 1 lo menciona como antecedente (I'd been saying I'd walk the whole coast path for the best part of twenty years) y él mismo lo rebaja: without ever really meaning it. Tampoco el plan de Speaker 2 con su hermana (had always planned to do the walk together) es lo que la puso en marcha.

D the chance to raise money for a cause
Speaker 3 lo descarta: everyone assumed I was raising money for something, y a continuación da el motivo real.

G the wish to spend time with a relative
Speaker 2 pensaba hacer la caminata con su hermana, pero al final fue sola; Speaker 5 caminó unos días con su hijo, pero that was never the point of it.

Task Two

B the monotony of walking day after day
Speaker 3 esperaba aburrirse y no fue así: People had warned me I'd be bored stiff by the second week on the trail, and I never was.

E finding their way
Speaker 4 lo descarta: Getting lost was never a worry, at least.

H the persistent bad weather
Speaker 2 acepta la lluvia sin darle importancia: the rain, which barely stopped for a fortnight, I just accepted.
