Parts 1–7 · 53 preguntas · 1 hora 30 minutos · sin diccionario

INSTRUCTIONS TO CANDIDATES

Time: **1 hour 30 minutes**.

There are **seven** parts to the test. Answer **all** the questions.

Write your answers on the answer sheet. Use capital letters for Parts 2, 3 and 4.

Parts 1, 2, 3 and 7 carry one mark per question; Part 4 carries up to two marks per question; Parts 5 and 6 carry two marks per question.

Partes y tiempos

Part	Tarea	Preguntas	Puntos	Tiempo orientativo
1	Multiple-choice cloze	1–8	8	8 min
2	Open cloze	9–16	8	9 min
3	Word formation	17–24	8	8 min
4	Key word transformations	25–30	12	12 min
5	Multiple choice	31–36	12	18 min
6	Gapped text	37–43	14	17 min
7	Multiple matching	44–53	10	15 min
	Total	**53**	**72**	**90 min** (con 3 de repaso)

Cómo hacer el simulacro

1. Imprime el PDF o ten a mano papel para las respuestas. Pon un cronómetro de 90 minutos y no lo pares.
2. Haz las siete partes en orden o en el que prefieras, pero apunta la hora al terminar cada una: los tiempos de la tabla son una referencia para repartir los 90 minutos.
3. Escribe las respuestas en la hoja de respuestas (después de la Part 7). En las Parts 2, 3 y 4, en mayúsculas; la ortografía cuenta.
4. Corrige con las soluciones y anota la puntuación de cada parte en la tabla final de la hoja de respuestas. Lee también las explicaciones de los aciertos dudosos.

Material no oficial, sin afiliación con Cambridge University Press & Assessment. Audio con voces sintéticas.

Part 1 Multiple-choice cloze

For questions 1–8, read the text below and decide which answer (A, B, C or D) best fits each gap. There is an example at the beginning (0). Mark your answers on the answer sheet.

Example:

0	**A** pointed	**B** showed	**C** hinted	**D** led

The answer is **A** (pointed).

Listening to the heart

In 1816 the physician René Laennec, then working at a Paris hospital, was asked to examine a young woman whose symptoms **(0)** _____ to heart disease. Until then, a doctor who wished to listen to a patient's heart had had to make **(1)** _____ with the naked ear, pressed directly against the chest. The conventions of the day, however, **(2)** _____ out that method, and her plumpness meant that tapping on her chest would **(3)** _____ little useful information.

Laennec then recalled having seen children in the street send signals to one another along a **(4)** _____ of timber, one scratching at one end while another listened at the other. He rolled a few sheets of paper into a tight cylinder, placed one end on the woman's chest and was astonished to hear her heartbeat more clearly than ever before.

His later instruments **(5)** _____ of little more than a hollow wooden tube, and the name he coined for them, 'stethoscope', is **(6)** _____ from the Greek words for 'chest' and 'to examine'. Within a generation the device had become **(7)** _____ and parcel of medical practice. Laennec himself, however, did not live long enough to **(8)** _____ the full rewards of his invention: in 1826, aged only forty-five, he died of tuberculosis, a disease he had done more than anyone to help doctors identify.

1	**A** good	**B** do	**C** way	**D** use
2	**A** ruled	**B** counted	**C** struck	**D** shut
3	**A** earn	**B** breed	**C** gain	**D** yield
4	**A** stretch	**B** span	**C** length	**D** reach
5	**A** consisted	**B** comprised	**C** composed	**D** contained
6	**A** stemmed	**B** originated	**C** derived	**D** arisen
7	**A** piece	**B** part	**C** bit	**D** share
8	**A** harvest	**B** gather	**C** glean	**D** reap

Part 2 Open cloze

For questions 9–16, read the text below and think of the word which best fits each gap. Use only one word in each gap. There is an example at the beginning (0). Write your answers IN CAPITAL LETTERS on the answer sheet.

Example: (0) EVEN

The puzzle of the yawn

We begin yawning before we are (0) _____ born – foetuses have been observed doing it in the womb – and yet it remains (9) _____ of the least understood things the human body does. We carry (10) _____ yawning several times a day for the rest of our lives, but scientists still cannot agree on (11) _____ it is actually for.

For many years the most popular explanation was that a yawn draws extra oxygen into the blood. Plausible (12) _____ it sounds, the theory has not survived testing: volunteers given air rich in oxygen to breathe yawned no less often than those who were not. A more recent suggestion is that yawning helps to cool the brain, (13) _____ would explain why people seem to yawn less on very hot days.

Stranger still is the fact that yawning is contagious. Seeing, hearing or even reading about someone else yawning is often enough to make us do the (14) _____. Some researchers have linked this to empathy, pointing out that we are more susceptible to the yawns of family and friends than to (15) _____ of strangers. Others remain unconvinced. (16) _____ the explanation turns out to be, you have probably yawned at least once while reading this.

Part 3 Word formation

For questions 17–24, read the text below. Use the word given in **capitals** at the end of some of the lines to form a word that fits in the gap in the same line. There is an example at the beginning (0). Write your answers **IN CAPITAL LETTERS** on the answer sheet.

Example: (0) **REVOLUTION**

Thinking inside the box

In April 1956 a converted oil tanker, the Ideal X, sailed from Newark to Houston with fifty-eight metal boxes lashed to its deck. Few people paid much attention, yet the voyage marked the beginning of a (0) _____ in the way goods are moved around the world. **REVOLVE**

Until then, cargo had been (17) _____ loaded by hand, item by item, in a process that could keep a ship in port for a week or more. Theft was common, and the sheer (18) _____ of the system added enormously to the price of goods. Malcolm McLean, the American haulage magnate behind the Ideal X, had spent years watching his lorries queue at the docks, and his solution was (19) _____ simple: instead of unloading the goods, why not lift the whole box from lorry to ship? **LABOUR** **EFFICIENT** **DECEPTIVE**

The savings were enormous. By McLean's own reckoning, loading the Ideal X cost less than a thirtieth of what it would have cost by conventional means. Once container sizes had been standardised in the late 1960s, the same box could travel by road, rail and sea without being opened, and a period of (20) _____ growth in world trade followed, bringing with it a new (21) _____ between distant economies. **PRECEDENT** **DEPEND**

Not everyone gained. As cranes did in hours what gangs of dockers had once done in days, thousands of men lost their livelihoods. Ports had to (22) _____ or decline, and old waterfronts in cities such as London and New York fell into (23) _____. The humble container seldom attracts the (24) _____ lavished on the jet engine or the microchip, yet it has done as much as either to shape the modern world. **MODERN** **USE** **ADMIRE**

Part 4 Key word transformations

For questions 25–30, complete the second sentence so that it has a similar meaning to the first sentence, using the word given. **Do not change the word given.** You must use between **three** and **eight** words, including the word given. Here is an example (0).

Example:

0 The concert was cancelled because the singer was ill.

CALLED

The concert was called off because the singer was ill.

The gap can be filled by the words 'was called off', so you write:

0 WAS CALLED OFF

Write only the missing words IN CAPITAL LETTERS.

---

25 People say that old Mr Hollis grew the largest pumpkin ever seen in the county.

REPUTED

Old Mr Hollis _____ the largest pumpkin ever seen in the county.

26 Nobody realised that the portrait was a fake until an expert examined it.

LIGHT

Only when an expert examined the portrait _____ that it was a fake.

27 If she hadn't injured her ankle, Anna would probably have won the race.

STOOD

Anna would _____ of winning the race if she hadn't injured her ankle.

28 The ferry left late because of the fog, not because of the strike.

BLAME

It was the fog, not the strike, _____ the ferry's late departure.

29 The restaurant's food was nothing like the sophisticated cooking its website had promised.

CRY

The restaurant's food was _____ the sophisticated cooking its website had promised.

30 It took the former champion months to accept that she had lost to an amateur.

TERMS

It was months before the former champion _____ losing to an amateur.

Part 5 Multiple choice

You are going to read a newspaper column about lawns. For questions 31–36, choose the answer (**A, B, C** or **D**) which you think fits best according to the text. Mark your answers on the answer sheet.

Letting it grow

After forty years of mowing, our columnist has all but put the mower away. He is still not entirely sure how he feels about it.

My father mowed the lawn every Saturday morning from April to October, and he did it in stripes. The stripes mattered. They ran parallel to the back of the house, each exactly the width of the mower, and any wavering from the line was treated as a minor moral failing, somewhere between forgetting a birthday and leaving the cap off the toothpaste. I inherited both the mower and the routine, and for most of my adult life I assumed, without ever quite putting it into words, that a well-kept lawn was simply something a responsible person owed the rest of the street.

It is worth remembering how recent, and how odd, that assumption is. For most of history, an expanse of closely cropped grass that produced neither food nor fodder was a luxury only the very rich could contemplate. The lawns of eighteenth-century country houses were kept short by teams of men with scythes, sometimes helped by sheep, and landscape gardeners such as Capability Brown made fortunes sweeping away formal flowerbeds so that the grass could run uninterrupted to the door. The real function of all that grass was to announce that the owner had land to spare and labour to waste. A lawn, in other words, was not so much a garden as a boast.

What turned that boast into a suburban duty was a piece of engineering. In 1830 Edwin Budding, an engineer from Gloucestershire, having watched a machine in a cloth mill trim the surface of fabric with a rotating blade, patented a device that did the same job for grass. He is said to have tested it at night, to spare himself the ridicule of his neighbours. Within a few decades, the lawnmower had put the aristocrat's indulgence within reach of the bank clerk, and what had once been a mark of privilege became, with remarkable speed, a mark of respectability. It is from that moment, I suspect, that my father's stripes ultimately descend.

My own conversion owes less to history than to arithmetic. A few years ago a conservation charity asked thousands of householders to leave their lawns unmown for a month and then count the flowers that came up. Lawns cut only every four weeks or so, it turned out, produced far more flowers, and far more nectar, than those mown every week, while patches left to grow longer supported a wider range of plants still. I read the report twice, partly out of interest and partly in the hope of finding a flaw in it. I did not find one. I had always regarded the lawn as a small contribution to the order of things. It had never occurred to me that, from the point of view of a bee, it might have more in common with a car park.

So, two springs ago, I stopped. I would like to report that the result was a meadow. It was not, at least not at first. It was a shaggy, faintly shameful rectangle that drew pointed remarks from the postman and a note from next door asking, with elaborate politeness, whether I had been unwell. The first summer brought dandelions in quantities I would once have found alarming, and a good deal of something that the internet assured me was harmless and my mother assured me was not. Nor, I confess, am I wholly at ease with some of my new allies in what has become known as the 'no mow' movement. There is a strand of it that seems less interested in insects than in being seen to care about them, and a lawn left long chiefly so that its owner can mention it at dinner parties is, it seems to me, just my father's stripes in a different costume.

And yet something has shifted. By the second summer the grass was threaded with clover and self-heal and a small blue flower I had to look up, and on warm afternoons the whole thing hummed. I have kept a mown path through the middle, partly for access and partly, I admit, to reassure the street that the neglect is deliberate. It

seems to have worked. The neighbours have stopped enquiring after my health, and last month one of them asked instead which part of her own lawn I thought she might leave alone.

I still own the mower, and I still use it, though far less often and never in stripes. My father would have been appalled, I suspect, and then curious, and then, had the bees been out, quietly persuaded. That, at any rate, is what I tell myself on Saturday mornings, when the old habit stirs and I make a cup of tea instead.

31 How does the writer present his father's approach to mowing the lawn?

A as a way of passing on a sense of duty to his son
B as a source of anxiety about what the neighbours might think
C as a ritual he valued more for the routine than for the result
D as investing a trivial task with a certain moral seriousness

32 What point does the writer make about the lawns of eighteenth-century country houses?

A They demanded more skill to maintain than modern lawns do.
B They were laid out to show off the architecture of the house.
C Their very uselessness was the point.
D They were admired chiefly by those who could not afford them.

33 According to the third paragraph, the invention of the lawnmower led to

A a symbol of wealth becoming something expected of ordinary households.
B a sharp decline in the number of labourers employed to look after large estates.
C lawns being valued for their appearance rather than for what they cost to keep.
D a fashion for mechanical devices among the newly prosperous middle classes.

34 How did the writer react to the findings of the charity's survey?

A He welcomed them as a scientific excuse for doing less work in the garden.
B He was made to see his lawn from another creature's perspective.
C He doubted that householders could have counted the flowers accurately.
D He was surprised by how many people had been willing to take part.

35 What criticism does the writer make of some members of the 'no mow' movement?

A They are too quick to condemn people who prefer a tidy garden.
B They overstate the benefits of long grass for wildlife.
C Their concern for insects is partly a form of display.
D They have made unmown lawns fashionable among the wealthy.

36 Which of the following best describes the writer's attitude to his decision to stop mowing?

A He is pleased with its effects but reluctant to make grand claims for it.
B He sees it as a long-overdue rejection of his father's values.
C He regrets the friction that it caused with the people who live next door.
D He expects that most other gardeners will soon be following his example.

Part 6 Gapped text

You are going to read an extract from a magazine article about sheepdog trials. Seven paragraphs have been removed from the extract. Choose from the paragraphs **A–H** the one which fits each gap (37–43). There is one extra paragraph which you do not need to use. Mark your answers on the answer sheet.

A language of whistles

Our writer spends a day at a sheepdog trial in the Welsh hills and discovers that the most important member of each team never says a word.

From the bottom of the field, the course looked like nowhere in particular: a steep slope of rough grass, a few hurdles, a small pen made of gates and a row of muddy pick-up trucks parked along a dry-stone wall. Somewhere near the top, so far away that I had to be told where to look, five sheep were grazing with every appearance of unconcern. Within a few minutes, I was promised, they would be the most closely watched animals in the valley.

37 _____

What matters, rather, is control. Each handler has fifteen minutes to send a dog up the hill, bring the sheep down through a series of gates, separate two of them from the group and finally shut all five in the pen. For most of the run the handler must stay beside a post at the bottom of the field, so every instruction has to travel several hundred metres up the hillside as a whistle. The judge starts with a hundred points and takes them away: for every sheep that strays off line, every hesitation, every sign of panic.

38 _____

For a long moment nothing happened. Her handler, an elderly man in a flat cap, whistled once and then again, more sharply. The dog did not move. ‘She can’t hear him,’ Pritchard murmured. ‘Wind’s taking it.’ Where we were standing I could feel no wind at all, but up on the ridge, apparently, it was strong enough to carry a whistle away entirely. Eventually the dog seemed to make up her own mind and the sheep began to drift downhill, but by then, as Pritchard put it, the run was ‘in bits’.

39 _____

Pritchard learnt his from his father, whose own whistle, made of horn, he still uses: a small, worn crescent, no bigger than a thumbnail, which he took out of his pocket to show me. Younger handlers, he said, mostly buy plastic or steel ones online, ‘and there’s nothing wrong with that’. It was clear, all the same, that he would sooner have parted with his dog.

40 _____

That, I gradually came to understand, is the strangest thing about the partnership. The dog is reading the handler at least as closely as the handler is reading the sheep, and nerves travel. Several runs that morning came apart not on the hill but at the shed, the moment when the dog has to slip into the group and cut two sheep away from the rest. Done well, it takes a second. Done badly, it can use up all the remaining minutes and still not happen.

41 _____

By the time Nell’s turn came, a little after three, the wind had dropped. Pritchard walked to the post without a word to anyone, sent her off with a single long note and then stood perfectly still, hands in his pockets, for what felt like several minutes. Her outrun was wide and calm, and she brought the sheep down the hill in a line so straight it might have been ruled. By the second gate I had more or less stopped breathing.

42 _____

Her score, when it was read out, put her second. The winner, to nobody's great surprise, was the young handler I had watched before lunch, and Pritchard was the first to go over and shake her hand. If he was disappointed, he hid it well. 'The old ewe beat us,' he said, scratching Nell behind the ear. 'She'll have learnt something from that. I know I have.'

43 _____

Perhaps that is the point. A trial is less a contest of speed than of patience and trust between two creatures who cannot share a word of language but have learnt, over years, to share a great deal else. Pritchard, I suspect, would find that rather fanciful. 'It's just work,' he would say, 'done properly.' But work done properly is a rarer sight than it ought to be, and I could happily have watched it all week.

A I saw it done well only once that morning. A young handler, barely out of school, waited with her dog crouched at her feet while the sheep milled about, until a gap no wider than a hand opened in the group. A single word, and the dog was through it. The judge, Pritchard told me, would hardly have needed to pick up his pencil.

B The first dog of the morning, a lean black-and-white bitch, set off on what Pritchard called the outrun, sweeping wide in a great pear-shaped arc so as to come up behind the sheep without alarming them. It was beautifully done. Then, just short of the top, she stopped, dropped flat in the grass and stayed there.

C As I drove back down the valley that evening, it struck me that I had spent seven hours watching what was, on the face of it, a very slow way of moving five sheep a few hundred metres. I could not remember when I had last paid such close attention to anything for so long.

D His dog, a four-year-old called Nell, was not due to run until mid-afternoon, and he spent most of the morning on the bank above the course, saying very little. I asked whether he was nervous. He gave the question some thought. ‘Not for me,’ he said eventually. ‘For her. She knows when I’m wound up, and it goes straight down the whistle.’

E The man doing the promising was Alun Pritchard, a hill farmer who has been competing at trials for the best part of thirty years and judging them for ten. He had agreed to explain what I was about to see on one condition: that I stopped calling it a race. ‘Speed’s got nothing to do with it,’ he said. ‘Any fool can make sheep run.’

F Even the shed, which I had been dreading on her behalf, worked at the first attempt. It was the pen that nearly undid them. One ewe, older and warier than the rest, turned and stamped at the dog, and for almost a minute the two stood nose to nose while the clock ran on. When the ewe at last gave way, the gate closed with eleven seconds to spare.

G Whistles, it turns out, are something of a private language. Every handler develops a set of his or her own, and two dogs working the same field may respond to quite different calls. There are signals for left and right, for stop, walk on and steady, and a good handler can vary each one, a little softer or a little sharper, to say how urgently it is meant.

H Sheepdog trials have a longer history than most people imagine. The first recorded one was held at Bala, in north Wales, in 1873, and drew a crowd of around three hundred. A century later, television brought the sport to millions, when ‘One Man and His Dog’ began a run on the BBC that would last for more than twenty years.

Part 7 Multiple matching

You are going to read an article in which four people talk about judging competitions. For questions 44–53, choose from the judges (**A–D**). The judges may be chosen more than once. Mark your answers on the answer sheet.

Which judge

44 is troubled by the hostility of spectators?

45 takes steps to avoid any suspicion of bias?

46 was unaware of an inconsistency in their own judgements until it became public?

47 believes that group decisions tend to favour inoffensive candidates?

48 says that identifying errors is the least demanding part of the role?

49 makes a point of explaining decisions to those affected by them?

50 feels uneasy about how readily they can suppress their natural feelings?

51 regrets having underestimated someone's potential early in their judging career?

52 values the disagreements they have with fellow judges?

53 explains how a practical arrangement prevents tiredness from distorting results?

In the judge's chair

Four people who judge very different kinds of competition explain what the job involves.

A Fiona Grant, figure-skating judge

People imagine that the hardest part of judging is spotting the mistakes. It isn't: after twenty years of practice, and with a replay screen in front of you, the mistakes more or less announce themselves. The hard part is everything that goes on in your own head. When a seventeen-year-old falls on her opening jump and spends the rest of the programme fighting back tears, every human instinct tells you to reward her courage. You can't. You mark what she did on the ice, not what it cost her, and you go home feeling slightly ashamed of how easily you managed it. The sport has had to work hard at its reputation. After a vote-trading scandal at the 2002 Winter Olympics, the old system of marks out of six was scrapped in favour of one in which every element is scored separately, and I think we are a good deal more honest for it. What I still find difficult is the abuse. Within minutes of a result, a skater's fans will have posted the judges' names online, and some of what they write is vile.

B Derek Holt, vegetable judge at agricultural shows

I've judged vegetables at shows for twenty-six years, and I still get butterflies when I walk into the marquee. Outsiders laugh, but the standards are exacting. A prize-winning plate of onions has to match for size, shape and colour, with the necks neatly tied and not a blemish between them, and the difference between first and third can come down to a millimetre. Some exhibitors spend an entire summer nursing a single leek, so the least you owe them is a proper look. I won't judge in my own county any more: I know too many of the growers, and the ones who lose always assume that's why. Even so, I get accused of having favourites about once a season, usually by someone who has driven a long way with a car boot full of leeks. My answer is to stay behind once the cards are out and tell anyone who asks exactly why they didn't win. Most of them take it well. A few have come back the following year and beaten everyone, which pleases me more than anything I grow myself.

C **Ruth Okafor, pianist**

I sit on the juries of three or four international piano competitions a year, and I have come to distrust the whole business a little. Ten jurors from ten countries, each with a different idea of how Chopin should sound, are not going to agree on who is the most interesting young pianist in the room. What they can agree on is who made the fewest mistakes, and so, again and again, the prizes go to the safe, polished player whom nobody loves and nobody can object to. Early in my career as a juror I helped to vote out, in the second round, a young man whose playing struck me as wilful and undisciplined. He is now one of the finest pianists of his generation, and I wince whenever I see his name on a poster. These days I try to listen for the player I will still want to hear in ten years' time. I don't always persuade my colleagues, but I no longer keep quiet when I disagree with them.

D **Patrick Doyle, wine judge**

At a big competition I might taste a hundred and twenty wines in a day, and the only thing I know about each is what's in the glass. The bottles are hidden, the labels are gone and the order is shuffled, partly so that no wine is always tasted at the end of a long morning, when everyone's palate is tired and every red starts to taste the same. It's humbling. A few years ago I gave a perfectly ordinary score to a wine I had praised extravagantly in my newspaper column only weeks before, and I only found out when the results were published. My editor was delighted; I was less so. People assume the job is all pleasure, but by mid-afternoon it's closer to hard labour: rinse, sniff, sip, spit, write, a hundred times over. What makes up for it is the hour at the end of the day, when the panel sits down together and fights over the medals. I've learnt more from those arguments than from any course.

Hoja de respuestas

Part 1 · Multiple-choice cloze

Escribe la letra elegida (A, B, C o D). Al corregir, marca 1 punto por acierto; una respuesta doble vale 0.

Nº	Respuesta (A–D)	Punto
1		/ 1
2		/ 1
3		/ 1

6	Gapped text	_____ / 14
7	Multiple matching	_____ / 10
	Total	**_____ / 72**

Referencia orientativa, no oficial: en los tests publicados, el aprobado con nota C2 (200 en la Cambridge English Scale) suele quedar en torno al 60 % de la puntuación bruta, unos 43 de 72 puntos; la conversión exacta cambia de un examen a otro.

SOLUCIONES

Part 1 · Multiple-choice cloze

1 punto por acierto. Cada solución indica el tipo de distinción, explica por qué es correcta la clave y por qué falla cada distractor, y remite al apartado de UOE-P1_Teoria_v1 que lo trabaja.

Clave rápida

Nº	Clave	Tipo de distinción	Teoría
1	B · do	Expresión fija	§4.2 Idioms con una palabra evaluada
2	A · ruled	Phrasal verb	§7.1 Misma partícula, distinto verbo
3	D · yield	Collocation	§3.1 Verbo + sustantivo · §5.1 Significado preciso y alcance
4	C · length	Collocation	§3.4 Sustantivo + of · §5.1 Significado preciso y alcance
5	A · consisted	Complementación	§6.1 Preposición dependiente · §6.3 Transitividad: el verbo frente a su pareja
6	C · derived	Complementación	§6.3 Transitividad: el verbo frente a su pareja
7	B · part	Expresión fija	§4.1 Binomials y pares fijos
8	D · reap	Collocation	§3.1 Verbo + sustantivo

1 · B do

Por qué: make do with sth: arreglárselas con algo insuficiente a falta de algo mejor. Antes del estetoscopio, el médico solo tenía su oído.

A good: make good es cumplir una promesa (make good on) o reparar un daño; *make good with the naked ear no significa nada.

C way: make way es dejar paso (make way for sth); con with no forma expresión.

D use: make use va con of (make use of the naked ear), no con with.

Teoría: §4.2 Idioms con una palabra evaluada

2 · A ruled

Por qué: rule sth out: descartar algo, hacerlo imposible. Las convenciones de la época impedían que un médico apoyara la cabeza en el pecho de una mujer joven.

B counted: count sb out es no contar con alguien (count me out); se dice de personas que quedan fuera de un plan, no de un método que se descarta.

C struck: strike sth out es tachar algo escrito; struck out no significa «hacer imposible».

D shut: shut sth out es impedir que entre algo (la luz, el ruido) o dejar fuera a alguien; no se dice de un procedimiento.

Teoría: §7.1 Misma partícula, distinto verbo

3 • D yield

Por qué: yield: producir un resultado, datos o información (the search yielded little). El sujeto es el procedimiento (tapping on her chest), que no iba a dar información útil.

A earn: earn es ganar algo con esfuerzo o mérito (dinero, respeto); no se «gana» información así.

B breed: breed es engendrar, casi siempre algo negativo (breed resentment); no va con information.

C gain: Con gain el sujeto es quien obtiene algo (doctors gain information); un procedimiento no «gana» información.

Teoría: §3.1 Verbo + sustantivo · §5.1 Significado preciso y alcance

4 • C length

Por qué: a length of timber / rope / pipe: un trozo largo de un material. Los niños se transmitían señales a lo largo de un madero.

A stretch: a stretch of va con extensiones de terreno, agua o tiempo (a stretch of coast), no con un objeto.

B span: span es la luz de un puente o un lapso (a span of time); a span of timber no se dice.

D reach: reach es el alcance o un tramo de río (the upper reaches); no un trozo de material.

Teoría: §3.4 Sustantivo + of · §5.1 Significado preciso y alcance

5 • A consisted

Por qué: consist of: constar de. Es el único de los cuatro que se construye en activa con of: his instruments consisted of a tube.

B comprised: comprise es transitivo, sin preposición (comprised a tube); comprised of solo aparece en pasiva (were comprised of), y aquí falta el auxiliar.

C composed: composed of exige pasiva (were composed of); *his instruments composed of no es gramatical.

D contained: contain es transitivo (contained a tube); *contained of no existe.

Teoría: §6.1 Preposición dependiente · §6.3 Transitividad: el verbo frente a su pareja

6 • C derived

Por qué: Delante del hueco hay is: hace falta un participio que admita pasiva. be derived from: proceder de, tratándose de palabras (the name is derived from Greek).

A stemmed: stem from es intransitivo: the name stems from, nunca *is stemmed from.

B originated: originate también es intransitivo: it originated in / from, no *is originated from.

D arisen: arise es intransitivo y su participio no va con is (*is arisen); además se dice de problemas o situaciones, no de nombres.

Teoría: §6.3 Transitividad: el verbo frente a su pareja

7 • B part

Por qué: part and parcel of sth: parte esencial e inseparable de algo. Es un binomio fijo: ninguna de sus dos palabras se cambia.

A piece: *piece and parcel no existe; piece forma otros pares (all of a piece).

C bit: *bit and parcel tampoco existe (bit).

D share: share no forma pareja con parcel (*share and parcel).

Teoría: §4.1 Binomials y pares fijos

8 • D reap

Por qué: reap the rewards / benefits: recoger el fruto de algo. Laennec murió joven, antes de que su invento se impusiera del todo.

A harvest: harvest es cosechar en sentido literal (o reunir datos); no forma collocation con rewards.

B gather: gather es reunir o juntar (gather information); *gather the rewards no se dice.

C glean: glean es ir sacando información poco a poco (glean details); no va con rewards.

Teoría: §3.1 Verbo + sustantivo

Part 2 · Open cloze

1 punto por acierto. En esta hoja hay huecos que admiten varias respuestas: vale cualquiera de las que recoge la clave, pero solo una por hueco (con dos respuestas, el hueco vale 0). Cada solución explica por qué valen todas las de la clave y por qué no valen otras que parecen posibles, y remite al apartado de UOE-P2_Teoria_v1.

Clave rápida

Nº	Clave	Tipo de hueco	Teoría
9	ONE	one of + superlativo	3 Determinantes y cuantificadores · 4 Referencia y sustitución
10	ON	Partícula de phrasal verb	6.2 Partícula de phrasal verb
11	WHAT	Relativo nominal	8 Relativos y nominales
12	AS / THOUGH	Concesiva con adjetivo antepuesto	9.2 Otras formas concesivas enfáticas
13	WHICH	Relativo de oración	8 Relativos y nominales
14	SAME	Sustitución: do the same	4 Referencia y sustitución · 6.3 Palabras gramaticales dentro de expresiones fijas
15	THOSE	Sustitución de un sustantivo plural	4 Referencia y sustitución
16	WHATEVER	Relativo concesivo	8 Relativos y nominales · 9.2 Otras formas concesivas enfáticas

Explicación por ítem

9 • ONE • one of + superlativo

Por qué: Detrás del hueco va of the least understood things: one of the …, «una de las cosas menos comprendidas». El sujeto es singular (it remains), así que solo cabe one.

No vale: some o **any** (no concuerdan con el sujeto singular it); **among** (*remains among of).

Teoría: 3 Determinantes y cuantificadores · 4 Referencia y sustitución

10 • ON • Partícula de phrasal verb

Por qué: carry on doing sth: seguir haciendo algo. El gerundio yawning detrás confirma la partícula.

No vale: out (carry out es llevar a cabo y va con un sustantivo: carry out a test); **over** (carry over es trasladar algo a otro periodo).

Teoría: 6.2 Partícula de phrasal verb

11 • WHAT • Relativo nominal

Por qué: agree on necesita un objeto, y el hueco es a la vez ese objeto y el complemento de for al final: what it is for, «para qué sirve».

No vale: why o **how** (dejarían for sin complemento: *why it is actually for); **which** (necesita antecedente).

Teoría: 8 Relativos y nominales

12 • AS / THOUGH • **Concesiva con adjetivo antepuesto**

Por qué valen: Adjetivo + as / though + sujeto + verbo: Plausible as it sounds = «por muy plausible que parezca». Las dos conjunciones valen en esta estructura.

No vale: although (no admite el adjetivo delante: *Plausible although it sounds); **so** o **if** (no forman la concesiva).

Teoría: 9.2 Otras formas concesivas enfáticas

13 • WHICH • **Relativo de oración**

Por qué: Tras la coma, el relativo remite a toda la oración anterior (que el bostezo enfríe el cerebro) y es sujeto de would explain: solo which.

No vale: that (no va tras coma en una explicativa); **this** o **it** (convertirían la frase en dos oraciones unidas solo por una coma); **what** (no tiene valor de relativo de oración).

Teoría: 8 Relativos y nominales

14 • SAME • **Sustitución:** do the same

Por qué: do the same: hacer lo mismo, es decir, bostezar también. El artículo the delante solo deja same.

No vale: opposite (dice lo contrario de contagious); **likewise** (es adverbio y no va tras the); **thing** (*do the thing no significa «hacer lo mismo»).

Teoría: 4 Referencia y sustitución · 6.3 Palabras gramaticales dentro de expresiones fijas

15 • THOSE • **Sustitución de un sustantivo plural**

Por qué: El hueco sustituye a the yawns, en plural, delante de of: those of strangers = los bostezos de los desconocidos.

No vale: that (singular: no concuerda con yawns); **ones** (*to ones of strangers exige the ones, dos palabras); **them** (no admite of detrás).

Teoría: 4 Referencia y sustitución

16 • WHATEVER • **Relativo concesivo**

Por qué: turns out to be necesita un complemento, y el hueco lo aporta: Whatever the explanation turns out to be = «sea cual sea la explicación». La oración principal va tras la coma.

No vale: however (be se quedaría sin complemento); **whichever** (exige un sustantivo detrás: whichever explanation); **whether** (pide or not y otra estructura).

Teoría: 8 Relativos y nominales · 9.2 Otras formas concesivas enfáticas

Part 3 · Word formation

1 punto por acierto. La clave recoge todas las formas aceptables de cada hueco; basta con una. Cada solución explica qué decide la forma, cuenta los cambios sobre la palabra base, señala las respuestas tentadoras que no valen y remite al apartado de UOE-P3_Teoria_v1 que lo trabaja.

Clave rápida

Nº	Clave	Tipo de hueco	Teoría
17	LABORIOUSLY	Adverbio · -ious + -ly	§4.5 · §8.5
18	INEFFICIENCY	Sustantivo · prefijo in- y -cy	§6.1 · §4.1
19	DECEPTIVELY	Adverbio de grado · -ly	§4.5
20	UNPRECEDENTED	Adjetivo · un- y -ed	§6.1 · §4.2
21	INTERDEPENDENCE / INTERDEPENDENCY	Sustantivo · prefijo inter- y -ence	§6.4 · §4.1 · §8.4
22	MODERNISE / MODERNIZE	Verbo · -ise	§4.3
23	DISUSE	Sustantivo · prefijo dis-	§6.2 · §6.4
24	ADMIRATION	Sustantivo · -ation	§4.1 · §8.2

Explicación por ítem

17 • LABORIOUSLY • **Adverbio · -ious + -ly**

Por qué: had been + hueco + loaded: un adverbio que modifica al participio. La carga se subía a mano, pieza a pieza, con mucho esfuerzo.

Cambios: labour → laborious (-ious; la u de la raíz se pierde) → laboriously (-ly). Dos cambios.

No vale: *__LABOURIOUSLY__ (conserva la u que se pierde); __LABORIOUS__ (adjetivo: no puede modificar a loaded).

Teoría: §4.5 Adverbios · §8.5 Letras que se pierden o cambian dentro de la raíz

18 • INEFFICIENCY • **Sustantivo · prefijo in- y -cy**

Por qué: the sheer + hueco + of the system: sustantivo. Lo que encarecía las mercancías era la ineficacia del sistema, no su eficacia.

Cambios: efficient → efficiency (-cy) → inefficiency (in-). Dos cambios.

No vale: __EFFICIENCY__ (dice lo contrario: la eficacia no encarece nada); __INEFFICIENT__ (adjetivo); __INEFFICIENCIES__ (el plural no casa con sheer, que intensifica sustantivos incontables o abstractos: the sheer size, the sheer inefficiency); *__UNEFFICIENCY__ (el prefijo es in-).

Teoría: §6.1 Elegir el prefijo negativo · §4.1 Sufijos nominales

19 • DECEPTIVELY • **Adverbio de grado · -ly**

Por qué: was + hueco + simple: un adverbio que modifica al adjetivo. deceptively simple: sencillo en apariencia, aunque esconda más de lo que parece. Es una collocation muy frecuente.

Cambios: deceptive → deceptively (-ly). Un cambio.

No vale: __DECEPTIVE__ (adjetivo: *deceptive simple); *__DECEPTIONALLY__ (no existe).

Teoría: §4.5 Adverbios

20 • UNPRECEDENTED • **Adjetivo • un- y -ed**

Por qué: a period of + hueco + growth: adjetivo. Un crecimiento sin precedentes del comercio mundial.

Cambios: precedent → precedented (-ed) → unprecedented (un-). Dos cambios.

No vale: PRECEDENTED (casi no se usa sin el prefijo y dice lo contrario); ***INPRECEDENTED** (el prefijo es un-); **PRECEDING** («anterior», de precede, no de precedent).

Teoría: §6.1 Elegir el prefijo negativo · §4.2 Sufijos adjetivales

21 • INTERDEPENDENCE / INTERDEPENDENCY • **Sustantivo • prefijo inter- y -ence**

Por qué: a new + hueco + between distant economies: sustantivo singular. between indica que la dependencia es mutua: hace falta el prefijo inter-. Interdependency es una variante registrada, menos frecuente.

Cambios: depend → dependence (-ence) → interdependence (inter-). Dos cambios.

No vale: DEPENDENCE o **DEPENDENCY** (van con on, en una sola dirección; between pide reciprocidad); **INDEPENDENCE** (dice lo contrario); ***INTERDEPENDANCE** (la terminación es -ence).

Teoría: §6.4 Prefijos de grado, posición y relación · §4.1 Sufijos nominales · §8.4 -able o -ible; -ance o -ence; -ant o -ent

22 • MODERNISE / MODERNIZE • **Verbo • -ise**

Por qué: had to + hueco + or decline: un verbo en infinitivo, coordinado con decline. Los puertos tenían que modernizarse o hundirse. La grafía con -ize también es correcta.

Cambios: modern → modernise (-ise). Un cambio.

No vale: MODERNISED o **MODERNISING** (tras had to va el infinitivo); **MODERNITY** (sustantivo).

Teoría: §4.3 Formación de verbos

23 • DISUSE • **Sustantivo • prefijo dis-**

Por qué: fall into disuse: dejar de usarse, quedar abandonado. Expresión fija con el sustantivo precedido de dis-.

Cambios: use → disuse (dis-). Un cambio.

No vale: MISUSE (uso indebido: no forma la expresión); **USELESSNESS** (*fall into uselessness); **UNUSE** (no existe).

Teoría: §6.2 Pares con significado distinto · §6.4 Prefijos de grado, posición y relación

24 • ADMIRATION • **Sustantivo • -ation**

Por qué: attracts the + hueco + lavished on: sustantivo. La admiración que se dedica al motor a reacción o al microchip.

Cambios: admire → admiration (-ation; la e final se pierde). Un cambio.

No vale: ADMIRERS (personas: no se «prodigan» sobre un invento); ***ADMIREATION** (conserva la e que se pierde).

Teoría: §4.1 Sufijos nominales · §8.2 La e final

Part 4 · Key word transformations

Corrige cada ítem por mitades: 1 punto por cada mitad correcta y bien escrita. Se acepta cualquiera de las variantes indicadas; las respuestas fuera de 3–8 palabras o con la palabra clave cambiada valen 0.

25 IS REPUTED TO HAVE GROWN (5 palabras)

También vale: IS REPUTED TO BE THE (MAN / ONE / PERSON) WHO GREW (8)

Mitades: is reputed | to have grown

Por qué: People say that … → pasiva impersonal con el sujeto personal: he is reputed to …. Lo que se dice está en presente (is); lo que hizo, en pasado, así que va el infinitivo perfecto: to have grown. También conserva el sentido is reputed to be the man who grew (ocho palabras).

No puntúa: *IS REPUTED TO GROW (el infinitivo simple hablaría de algo habitual, no de un hecho pasado); *WAS REPUTED TO HAVE GROWN (People say está en presente: lo dicen ahora); *IS REPUTED FOR HAVING GROWN (reputed va con infinitivo; be renowned for sí lleva for, pero no es la palabra clave).

Teoría: §3.3 Pasiva impersonal y causativa

26 DID IT COME TO LIGHT (5 palabras)

También vale: DID IT [FINALLY] COME TO LIGHT (5–6) · **WAS IT [FINALLY] BROUGHT TO LIGHT** (5–6)

Mitades: did it | come to light

Por qué: come to light: salir a la luz, descubrirse. Tras Only when … la oración principal lleva inversión: did it come to light that …. La pasiva de bring to light también conserva el sentido (was it brought to light), aunque es menos natural. Finally solo explicita lo que ya dice until y se acepta.

No puntúa: *IT CAME TO LIGHT (falta la inversión que exige Only when al principio); *DID IT BRING TO LIGHT (bring to light es transitivo: con el it impersonal hace falta come to light o la pasiva); *DID IT COME INTO LIGHT (la expresión fija es come to light).

Teoría: §3.1 Inversión tras adverbiales negativos y restrictivos · §5.2 Idioms frecuentes por palabra clave

27 HAVE STOOD A GOOD CHANCE (5 palabras)

También vale: HAVE STOOD (A GOOD / A VERY GOOD / A REAL / A STRONG / A DECENT / A FAIR / AN EXCELLENT / EVERY) CHANCE (4–6)

Mitades: have stood | a good chance

Por qué: would probably have won → would have stood a good chance of winning: stand a chance (of doing sth), tener posibilidades. Tras would va el infinitivo perfecto (have stood). Valen los adjetivos que expresan una probabilidad clara: good, very good, real, strong, decent, fair, excellent, y también every chance («todas las posibilidades»).

No puntúa: *HAVE HAD A GOOD CHANCE (no usa la palabra clave tal cual: el ítem vale 0; no usa la palabra clave); *HAVE STOOD GOOD CHANCES (stand a chance va en singular y con a); *HAVE STOOD A CHANCE (sin adjetivo, stand a chance es «tener alguna posibilidad»: se pierde el probably de la frase 1); *STOOD A GOOD CHANCE (tras would hace falta have + participio).

Teoría: §5.1 Verbos comodín + sustantivo · §3.2 Condicionales sin if

28 THAT WAS TO BLAME FOR (5 palabras)

También vale: (THAT / WHICH) WAS [REALLY] TO BLAME FOR (5–6) · **(THAT / WHICH) WAS THE ONE TO BLAME FOR** (7) · **(THAT / WHICH) DESERVED THE BLAME FOR** (5)

Mitades: that was | to blame for

Por qué: Cleft sentence: It was X that … destaca la causa. be to blame for sth: ser el culpable, la causa de algo malo; la preposición es for. Con un sujeto no humano también vale which, y conservan el sentido was the one to blame for y deserved the blame for.

No puntúa: *THAT WAS BLAMED FOR (no usa la palabra clave tal cual: el ítem vale 0; pasiva: diría que alguien culpó a la niebla, no que fuera la causa); *THAT WAS TO BLAME OF (la preposición es for); *WAS TO BLAME FOR (la cleft necesita that o which delante del verbo).

Teoría: §3.4 Cleft sentences y énfasis · §5.2 Idioms frecuentes por palabra clave

29 A FAR CRY FROM (4 palabras)

También vale: A [VERY] FAR CRY FROM (4–5)

Mitades: a far cry | from

Por qué: be a far cry from sth: no parecerse en nada a algo, quedar muy lejos de ello. Equivale a nothing like. Expresión fija: artículo, adjetivo y preposición no cambian; se admite el intensificador (a very far cry from).

No puntúa: *FAR CRY FROM (falta el artículo a); *A FAR CRY TO (la preposición es from); *A LONG CRY FROM (la expresión es a far cry; a long way from sería otra).

Teoría: §5.2 Idioms frecuentes por palabra clave

30 CAME TO TERMS WITH (4 palabras)

También vale: [FINALLY / FULLY] CAME TO TERMS WITH (4–5) · **HAD [FINALLY / FULLY] COME TO TERMS WITH** (5–6) · **(COULD / WAS ABLE TO / MANAGED TO) COME TO TERMS WITH** (5–7)

Mitades: came to terms | with

Por qué: come to terms with sth: asumir algo doloroso, aceptarlo. Tras It was months before va el pasado (came), y también caben had come, could / was able to / managed to come y los adverbios finally o fully, que no cambian el sentido. El gerundio losing es el complemento de with.

No puntúa: *CAME TO TERMS OF (la preposición es with); *CAME IN TERMS WITH (la expresión es come to terms); *ACCEPTED THE TERMS OF (cambia el sentido: aceptar las condiciones de algo).

Teoría: §5.2 Idioms frecuentes por palabra clave · §5.3 Phrasal verbs y prepositional verbs

Part 5 · Multiple choice

2 puntos por acierto. Cada solución indica el pasaje, una respuesta propia como la que pide el método (§2.2), por qué la clave es correcta y por qué falla cada distractor, con su tipo (§7) y la cita del texto que lo descarta. Los números de sección remiten a RDG-P5_Teoria_v1.

Clave rápida

Nº	Clave	Tipo de pregunta	Distractores	Teoría
31	**D**	Opinión y actitud	A §7.7 · B §7.4/7.1 · C §7.7	§4.3 · §6.1
32	**C**	Detalle	A §7.1/7.7 · B §7.2 · D §7.7	§6.2 · §3.2
33	**A**	Detalle	B §7.7 · C §7.5 · D §7.1	§6.1 · §6.2
34	**B**	Opinión y actitud	A §7.7 · C §7.5 · D §7.1	§4.2 · §6.2
35	**C**	Opinión y actitud	A §7.7 · B §7.7/7.5 · D §7.1/7.3	§4.2 · §4.3
36	**A**	Global	B §7.5 · C §7.6 · D §7.3	§5.4 · §4.3

Explicación por pregunta

31 · D · Opinión y actitud

Pregunta: How does the writer present his father's approach to mowing the lawn?

Pasaje: párrafo 1. **Respuesta propia:** Con ironía: el padre convertía el césped en una cuestión casi moral; torcer una raya era una pequeña falta, como olvidar un cumpleaños.

A as a way of passing on a sense of duty to his son
Falla (ausente §7.7). El autor heredó la costumbre (I inherited both the mower and the routine), pero no dice que el padre quisiera enseñarle nada: lo que heredó lo asumió él solo.

B as a source of anxiety about what the neighbours might think
Falla (voz §7.4, eco léxico §7.1). Toma the rest of the street, pero esa idea es del autor adulto (I assumed, without ever quite putting it into words), no una inquietud del padre.

C as a ritual he valued more for the routine than for the result
Falla (ausente §7.7). Que le gustara más la rutina que el resultado no aparece en el texto; al contrario, el resultado importaba: The stripes mattered.

D as investing a trivial task with a certain moral seriousness
Correcta. Lo dice la comparación del primer párrafo: any wavering from the line was treated as a minor moral failing, somewhere between forgetting a birthday and leaving the cap off the toothpaste. Minor moral failing junta lo pequeño y lo moral; los ejemplos domésticos dejan ver la ironía del autor (§4.3). Trivial task y moral seriousness parafrasean las dos mitades.

Teoría: §4.3 Ironía, understatement y concesión · §6.1 Grados de paráfrasis

32 · C · Detalle

Pregunta: What point does the writer make about the lawns of eighteenth-century country houses?

Pasaje: párrafo 2. **Respuesta propia:** Que servían para presumir: un terreno que no daba nada demostraba que el dueño podía permitirse desperdiciar tierra y trabajo.

A They demanded more skill to maintain than modern lawns do.
Falla (eco léxico §7.1, ausente §7.7). Se apoya en teams of men with scythes, pero el texto no compara la destreza que exigían con la de hoy: los segadores aparecen como prueba del trabajo derrochado.

B They were laid out to show off the architecture of the house.
Falla (no responde §7.2). Es cierto que el césped llegaba hasta la casa (so that the grass could run uninterrupted to the door), pero el autor no dice que fuera para lucir el edificio: su función era otra, The real function of all that grass.

C Their very uselessness was the point.
Correcta. El césped era un lujo precisamente porque no producía nada: closely cropped grass that produced neither food nor fodder was a luxury only the very rich could contemplate. Su función, dice el autor, era to announce that the owner had land to spare and labour to waste. Uselessness resume neither food nor fodder, y was the point, The real function (§6.2).

D They were admired chiefly by those who could not afford them.
Falla (ausente §7.7). El texto dice quién podía permitírselos (only the very rich), no quién los admiraba.

Teoría: §6.2 Lo concreto del texto, lo abstracto de la opción · §3.2 De dónde sale una inferencia

33 · A · Detalle

Pregunta: According to the third paragraph, the invention of the lawnmower led to

Pasaje: párrafo 3. **Respuesta propia:** A que lo que era un lujo de aristócratas pasara a ser una obligación de cualquier familia respetable de las afueras.

A a symbol of wealth becoming something expected of ordinary households.
Correcta. El párrafo describe el paso del lujo al deber: What turned that boast into a suburban duty was a piece of engineering, y what had once been a mark of privilege became, with remarkable speed, a mark of respectability. Symbol of wealth recoge mark of privilege; something expected of ordinary households, suburban duty y respectability.

B a sharp decline in the number of labourers employed to look after large estates.
Falla (ausente §7.7). Suena lógico (la máquina sustituye a los teams of men with scythes del párrafo anterior), pero el texto no habla de los jornaleros de las fincas después de 1830.

C lawns being valued for their appearance rather than for what they cost to keep.
Falla (lógica §7.5). El cambio que cuenta el texto es de quién tiene césped y qué significa (put the aristocrat's indulgence within reach of the bank clerk), no un paso del coste a la belleza.

D a fashion for mechanical devices among the newly prosperous middle classes.
Falla (eco léxico §7.1). Recoge a piece of engineering y patented a device, pero no hay ninguna moda de aparatos: lo que se extiende es el césped.

Teoría: §6.1 Grados de paráfrasis · §6.2 Lo concreto del texto, lo abstracto de la opción

34 · B · Opinión y actitud

Pregunta: How did the writer react to the findings of the charity's survey?

Pasaje: párrafo 4. **Respuesta propia:** Le hicieron ver su césped desde otro punto de vista: para él era orden; para una abeja, casi un aparcamiento.

A He welcomed them as a scientific excuse for doing less work in the garden.
Falla (ausente §7.7). El autor no habla de ahorrarse trabajo; lo que le hace cambiar es el dato: produced far more flowers, and far more nectar.

B He was made to see his lawn from another creature's perspective.
Correcta. La reacción está en las dos últimas frases: I had always regarded the lawn as a small contribution to the order of things, pero It had never occurred to me that, from the point of view of a bee, it might have more in common with a car park. Another creature's perspective parafrasea from the point of view of a bee; lo que ve desde ahí contrasta con su idea del orden.

C He doubted that householders could have counted the flowers accurately.
Falla (lógica §7.5). Buscó un fallo, pero no lo encontró: partly in the hope of finding a flaw in it. I did not find one. La opción convierte esa búsqueda en desconfianza.

D He was surprised by how many people had been willing to take part.
Falla (eco léxico §7.1). Recoge thousands of householders, pero el autor no comenta la participación: le interesa el resultado.

Teoría: §4.2 Marcadores de postura · §6.2 Lo concreto del texto, lo abstracto de la opción

35 · C · Opinión y actitud

Pregunta: What criticism does the writer make of some members of the 'no mow' movement?

Pasaje: párrafo 5. **Respuesta propia:** Que algunos lo hacen para que se vea: les importan menos los insectos que quedar bien.

A They are too quick to condemn people who prefer a tidy garden.
Falla (ausente §7.7). El texto no dice que critiquen a quienes cortan el césped; quien recibe comentarios es el propio autor (drew pointed remarks from the postman).

B They overstate the benefits of long grass for wildlife.
Falla (ausente §7.7, lógica §7.5). El autor no discute los beneficios para los insectos; los acepta en el párrafo anterior (I did not find one). Lo que critica son los motivos de algunos, no sus datos.

C Their concern for insects is partly a form of display.
Correcta. La crítica es explícita: There is a strand of it that seems less interested in insects than in being seen to care about them. La comparación con el padre lo remata: un césped largo para presumir en las cenas es just my father's stripes in a different costume, es decir, otra forma de exhibición (§4.2).

D They have made unmown lawns fashionable among the wealthy.
Falla (eco léxico §7.1, alcance §7.3). Se apoya en mention it at dinner parties, pero no habla de una moda entre los ricos: las cenas son el escaparate, no una clase social.

Teoría: §4.2 Marcadores de postura · §4.3 Ironía, understatement y concesión

36 · A · Global

Pregunta: Which of the following best describes the writer's attitude to his decision to stop mowing?

Pasaje: el texto completo. **Respuesta propia:** Contento, pero sin triunfalismo: el jardín ha mejorado y los vecinos se interesan, aunque sigue usando la cortadora y desconfía de quienes presumen de ello.

A He is pleased with its effects but reluctant to make grand claims for it.
Correcta. Los efectos le gustan (And yet something has shifted, on warm afternoons the whole thing hummed), pero rebaja cada logro: I would like to report that the result was a meadow. It was not, I still own the mower, and I still use it, y cierra con una duda irónica: That, at any rate, is what I tell myself. Su reparo ante quienes presumen (Nor, I confess, am I wholly at ease) confirma que no quiere hacer de ello una causa.

B He sees it as a long-overdue rejection of his father's values.
Falla (lógica §7.5). El final lo contradice: el padre, cree el autor, habría acabado convencido (and then, had the bees been out, quietly persuaded). No es un rechazo de sus valores.

C He regrets the friction that it caused with the people who live next door.
Falla (medio cierto §7.6). Hubo roces (a note from next door asking, with elaborate politeness, whether I had been unwell), pero el autor no se arrepiente y el conflicto se resuelve: The neighbours have stopped enquiring after my health.

D He expects that most other gardeners will soon be following his example.
Falla (alcance §7.3). Solo una vecina pide consejo (which part of her own lawn I thought she might leave alone); generalizarlo a la mayoría de los jardineros va mucho más allá del texto.

Teoría: §5.4 Preguntas globales · §4.3 Ironía, understatement y concesión

Part 6 · Gapped text

2 puntos por acierto. Cada solución explica qué une el párrafo con lo de antes (←) y con lo de después (→), con citas de los dos lados; cuando hay un párrafo tentador, por qué falla; y, al final, por qué el sobrante no entra en ningún hueco. Los números de sección remiten a RDG-P6_Teoria_v1.

Explicación por hueco

37 · E · *The man doing the promising was Alun Pritchard, a…*

← Con lo anterior. El párrafo anterior termina con una promesa anónima: Within a few minutes, I was promised. E identifica a quien la hizo con un sustantivo que la recoge: The man doing the promising was Alun Pritchard (§4.4).

→ Con lo siguiente. E termina negando que sea una carrera (‘Speed’s got nothing to do with it,’), y el párrafo siguiente da la alternativa con rather: What matters, rather, is control. Además, E presenta a Pritchard con nombre completo y el texto lo nombra después solo por el apellido: as Pritchard put it.

Teoría: §4.1 Pistas hacia atrás · §4.4 Cadenas léxicas

38 · B · *The first dog of the morning, a lean black-and-white…*

← Con lo anterior. El párrafo anterior explica las reglas en general (Each handler has fifteen minutes to send a dog up the hill); B pasa de la explicación al relato con el primer perro del día: The first dog of the morning.

→ Con lo siguiente. B deja a la perra inmóvil (she stopped, dropped flat in the grass and stayed there), y el párrafo siguiente continúa la escena: For a long moment nothing happened. Her handler. Her remite a la perra de B.

Tentador: D. His dog, a four-year-old called Nell también presenta una perra, pero su turno es not due to run until mid-afternoon y el texto que sigue describe al dueño de la perra como an elderly man in a flat cap, que no es Pritchard. Además, His no tiene antecedente tras la explicación de las reglas.

Teoría: §3.1 Hilo narrativo · §4.1 Pistas hacia atrás

39 · G · *Whistles, it turns out, are something of a private…*

← Con lo anterior. El párrafo anterior acaba con el silbido que se lleva el viento (strong enough to carry a whistle away entirely); G retoma la palabra para generalizar: Whistles, it turns out, are something of a private language (§4.4, cadena léxica).

→ Con lo siguiente. G dice que cada pastor tiene su propio juego de silbidos (Every handler develops a set of his or her own), y el párrafo siguiente lo presupone con un posesivo: Pritchard learnt his from his father. Sin G, his no tiene a qué referirse.

Tentador: H. Podría parecer una digresión histórica tras el primer recorrido, pero no menciona los silbidos, así que Pritchard learnt his from his father se queda sin referente.

Teoría: §4.4 Cadenas léxicas · §3.4 Progresión temática

40 · D · *His dog, a four-year-old called Nell, was not due…*

← Con lo anterior. El párrafo anterior termina con el perro de Pritchard: he would sooner have parted with his dog. D lo presenta de inmediato: His dog, a four-year-old called Nell.

→ Con lo siguiente. D acaba con la explicación de Pritchard sobre los nervios (She knows when I'm wound up, and it goes straight down the whistle), y el párrafo siguiente la recoge con un demostrativo: That, I gradually came to understand, is the strangest thing about the partnership. También anuncia el turno de Nell, que llega después: By the time Nell's turn came.

Tentador: A. I saw it done well only once that morning parece seguir a la mañana de competición, pero it no tiene antecedente: el shed aún no se ha explicado. Y A no dice nada que pueda ser the strangest thing about the partnership.

Teoría: §4.1 Pistas hacia atrás · §3.1 Hilo narrativo

41 · A · *I saw it done well only once that morning.*

← Con lo anterior. El párrafo anterior contrasta el shed bien y mal hecho (Done well, it takes a second); A recoge esa misma idea con it: I saw it done well only once that morning.

→ Con lo siguiente. A presenta a la joven del único shed perfecto (A young handler, barely out of school), y el texto la retoma más adelante como ganadora: the young handler I had watched before lunch. Además, A cierra la mañana y el párrafo siguiente salta a la tarde: a little after three.

Tentador: F. Even the shed, which I had been dreading on her behalf encaja con el tema del párrafo anterior, pero se refiere a Nell (on her behalf), cuyo turno todavía no ha llegado: el párrafo siguiente empieza By the time Nell's turn came.

Teoría: §4.1 Pistas hacia atrás · §4.4 Cadenas léxicas

42 · F · *Even the shed, which I had been dreading on…*

← Con lo anterior. El párrafo anterior sigue el recorrido de Nell hasta By the second gate; F continúa con las dos fases que faltan, el shed y el corral: Even the shed, which I had been dreading on her behalf.

→ Con lo siguiente. F cuenta el pulso con una oveja vieja (One ewe, older and warier than the rest), y el párrafo siguiente lo recuerda al dar la puntuación: 'The old ewe beat us,'. Sin F, la frase de Pritchard no tiene referente.

Tentador: C. Un final de jornada podría seguir a la carrera de Nell, pero el párrafo siguiente todavía está en el campo (Her score, when it was read out) y The old ewe no aparece en C.

Teoría: §3.1 Hilo narrativo · §4.1 Pistas hacia atrás

43 · C · *As I drove back down the valley that evening…*

← Con lo anterior. El párrafo anterior cierra la competición con la puntuación y el ganador (Her score, when it was read out, put her second); C sale del campo: As I drove back down the valley that evening.

→ Con lo siguiente. C termina con la sorpresa del autor (I could not remember when I had last paid such close attention to anything for so long), y el último párrafo la interpreta: Perhaps that is the point. La lentitud que señala C (a very slow way of moving five sheep) es la que less a contest of speed than of patience and trust explica.

Tentador: H. Un apunte histórico podría servir de cierre, pero Perhaps that is the point pide una reflexión del autor a la que responder, y H solo da fechas y cifras.

Teoría: §3.2 Hilo argumentativo · §4.1 Pistas hacia atrás

El párrafo sobrante

H · *Sheepdog trials have a longer history than most people…*

- **Hueco 37.** Tras I was promised hace falta saber quién lo promete, y What matters, rather, is control necesita delante algo que se descarte (la velocidad). H no aporta ninguna de las dos cosas: Sheepdog trials have a longer history than most people imagine.
- **Huecos 38, 41 y 42.** Esos huecos están en mitad del relato de la jornada: el texto que sigue presupone una perra concreta (Her handler, an elderly man in a flat cap), una mañana ya avanzada (the young handler I had watched before lunch) o el pulso con una oveja (The old ewe beat us). H habla de Bala, in north Wales, in 1873.
- **Hueco 39.** Pritchard learnt his from his father necesita delante algo que sea his: los silbidos. H no los menciona.
- **Hueco 40.** That, I gradually came to understand, is the strangest thing about the partnership remite a algo sobre el perro y el pastor; H habla de la historia y de la televisión (‘One Man and His Dog’).
- **Hueco 43.** Por delante podría pasar como apunte final, pero Perhaps that is the point pide algo que interpretar, y H no contiene ninguna reflexión del autor.

Teoría: §5.1 Cómo se fabrica el sobrante · §5.2 Trampas de encaje

Part 7 · Multiple matching

1 punto por acierto. Cada solución da una línea del texto para cada elemento de la pregunta y, cuando hay una sección tentadora, explica por qué falla y de qué tipo es (los tipos de distractor de RDG-P5 §7). Los demás números de sección remiten a RDG-P7_Teoria_v1.

Clave rápida

51	**C**	2	D · medio cierto	§4.1 · §3.3
52	**D**	1	C · medio cierto	§3.3 · §4.4
53	**D**	1	A · lógica	§3.3

Reparto de claves: A 3 · B 2 · C 2 · D 3. Cada sección es la respuesta de al menos una pregunta.

Explicación por pregunta

44 · A · Fiona Grant, figure-skating judge

Pregunta: Which judge is troubled by the hostility of spectators?

En el texto: What I still find difficult is the abuse: los aficionados publican los nombres de los jueces y some of what they write is vile.

Tentadora: B (voz, RDG-P5 §7.4). También recibe acusaciones (I get accused of having favourites), pero de los concursantes que pierden, no del público: usually by someone who has driven a long way with a car boot full of leeks.

Teoría: §3.3 Prever la paráfrasis · §4.3 La sección tentadora

45 · B · Derek Holt, vegetable judge at agricultural shows

Pregunta: Which judge takes steps to avoid any suspicion of bias?

En el texto: I won't judge in my own county any more: I know too many of the growers, y explica el motivo: the ones who lose always assume that's why.

Tentadora: D (voz, RDG-P5 §7.4). La cata es a ciegas (The bottles are hidden, the labels are gone), pero es una norma del concurso, no una decisión suya.

Teoría: §3.3 Prever la paráfrasis

46 · D · Patrick Doyle, wine judge

Pregunta: Which judge was unaware of an inconsistency in their own judgements until it became public?

Elementos (2), cada uno con su línea:

1. Incoherencia: I gave a perfectly ordinary score to a wine I had praised extravagantly in my newspaper column only weeks before.
2. Se enteró al publicarse: I only found out when the results were published.

Tentadora: C (medio cierto, RDG-P5 §7.6). También se equivocó al juzgar (I helped to vote out, in the second round, a young man), pero no hay contradicción entre dos juicios suyos ni nada que se hiciera público.

Teoría: §4.1 Preguntas de uno y de dos elementos · §3.3 Prever la paráfrasis

47 · C · Ruth Okafor, pianist

Pregunta: Which judge believes that group decisions tend to favour inoffensive candidates?

En el texto: Como los jurados solo coinciden en los errores, the prizes go to the safe, polished player whom nobody loves and nobody can object to.

Tentadora: D (no responde, RDG-P5 §7.2). El jurado también decide en grupo (the panel sits down together and fights over the medals), pero no dice a quién favorecen esas decisiones.

Teoría: §3.3 Prever la paráfrasis · §3.4 Señales de postura y de cambio

48 · A · Fiona Grant, figure-skating judge

Pregunta: Which judge says that identifying errors is the least demanding part of the role?

En el texto: People imagine that the hardest part of judging is spotting the mistakes. It isn't: los errores more or less announce themselves.

Tentadora: C (eco léxico, RDG-P5 §7.1). Habla de errores (who made the fewest mistakes), pero como lo único en que coinciden los jurados, no como la parte fácil del trabajo.

Teoría: §3.3 Prever la paráfrasis · §3.4 Señales de postura y de cambio

49 · B · Derek Holt, vegetable judge at agricultural shows

Pregunta: Which judge makes a point of explaining decisions to those affected by them?

En el texto: My answer is to stay behind once the cards are out and tell anyone who asks exactly why they didn't win.

Tentadora: D (voz, RDG-P5 §7.4). También discute las decisiones, pero con los otros jueces (when the panel sits down together), no con los concursantes.

Teoría: §3.3 Prever la paráfrasis

50 · A · Fiona Grant, figure-skating judge

Pregunta: Which judge feels uneasy about how readily they can suppress their natural feelings?

Elementos (2), cada uno con su línea:

1. Reprime lo que siente: every human instinct tells you to reward her courage. You can't.
2. Le incomoda la facilidad: you go home feeling slightly ashamed of how easily you managed it.

Tentadora: C (medio cierto, RDG-P5 §7.6). También siente malestar (I wince whenever I see his name on a poster), pero por una decisión equivocada, no por reprimir sus sentimientos.

Teoría: §4.1 Preguntas de uno y de dos elementos · §3.4 Señales de postura y de cambio

51 · C · Ruth Okafor, pianist

Pregunta: Which judge regrets having underestimated someone's potential early in their judging career?

Elementos (2), cada uno con su línea:

1. Error al principio: Early in my career as a juror I helped to vote out, in the second round, a young man.
2. Pesar: He is now one of the finest pianists of his generation, and I wince.

Tentadora: D (medio cierto, RDG-P5 §7.6). También se equivocó (I gave a perfectly ordinary score), pero hace unos años, no al principio de su carrera, y con un vino, no con el futuro de una persona.

Teoría: §4.1 Preguntas de uno y de dos elementos · §3.3 Prever la paráfrasis

52 · D · Patrick Doyle, wine judge

Pregunta: Which judge values the disagreements they have with fellow judges?

En el texto: Las discusiones del final compensan el día (fights over the medals) y le enseñan: I've learnt more from those arguments than from any course.

Tentadora: C (medio cierto, RDG-P5 §7.6). Discrepa de sus colegas y ya no se calla (I no longer keep quiet when I disagree with them), pero no dice que valore esas discusiones: desconfía del jurado como sistema.

Teoría: §3.3 Prever la paráfrasis · §4.4 Desempatar entre dos secciones

53 · D · Patrick Doyle, wine judge

Pregunta: Which judge explains how a practical arrangement prevents tiredness from distorting results?

En el texto: the order is shuffled, partly so that no wine is always tasted at the end of a long morning, when everyone's palate is tired.

Tentadora: A (lógica, RDG-P5 §7.5). También cuenta un cambio en el sistema de puntuación (the old system of marks out of six was scrapped), pero responde a un escándalo de votos, no al cansancio.

Teoría: §3.3 Prever la paráfrasis
